Personal.—We had the pleasure of a hearty shake of the hand yesterday in our sanctum from the well known enterprising young Banker and Broker, ANDREW M. MORELAND, Esq., of No. 8 Broad street, who has just returned from a recessional trip North. Mr. MORELAND informs us, that he has induced Northern capitalists to invest their capital in Southern securities, and has made arrangements by which our people may negotiate loans upon Southern securities at reasonable rates.

Parties having Southern securities of any kind for sale will find it to their advantage to call and consult with Mr. MORELAND, Banker, No. 8 Broad street.

**DUREYA'S STARCH AND MAIZENA.**—Few inventions have acquired more popularity than DUREYA's starch. Since it was first presented to the public it has gradually grown in favor, and is now considered an indispensable necessity by every house keeper. This starch is prepared by the Glen Cove Manufacturing Company, and is admirably adapted for stiffening fine linens, lace, &c. Mr. T. S. KIRK is the agent for this starch and maizena, and has opened an office at No. 189 East Bay, in the store of Mr. B. O'NEIL. We have been made the recipients of a package of the starch and maizena, and can confidently recommend them to the public as superior articles. Mr. KIRK is preparing to receive orders for DUREYA's starch.

**REGISTRATION OF SCHOOLMEN.**—The first of October closes the Fall vacation, and commences the scholastic term for the Winter. A reference to our advertising column, will show all kinds of institutions of learning in this city, that are now re-opening their doors on this day. Charleston's reputation in possessing so large a number of schools and seminaries where the youthful minds are trained by minds stored with every useful knowledge. Among the schools that will reopen on the 1st, proximate, is that conducted by Mrs. JOHN A. BLUM, in Mary street, opposite Elizabeth. The situation is pleasant, and the advantages offered the pupils are fully equal to those of similar establishments. Mrs. BLUM is an experienced teacher, and is assisted by a competent corps of instructors.

**BATELLINO.**—The rage for base ball has at length seized upon the African mind, and the young gents have it now heavy on the brain. In the unfeignedly streets small clubs of juvenile dandies assemble, and, with extemporized bats, formed from shingles and pieces of boards, they bang the ball about with an utter disregard to its comings and goings. A few days since we were leisurely pursuing the even tenor of our way, when we were surprised at the appearance of a ball which was skimming its way toward our left optic. With great presence of mind, we threw up our arm, caught it on the fly, and warded off the intruder; but being an outsider, and ignorant of the rules of the game, we did not change our base, but simply bawled at the players. For the safety of those persons who wish to preserve themselves from bodily harm, and who have no desire to become ballists, we would suggest that the police be directed to act as umpires, and to make the street performances of the juvenile African foul play, subjecting the culprits to be put in prison's base, there to remain until the lesson is learned that the streets were never intended as a play ground.

**A. DUNTRIMMED VINEGAR.**—Our friends and neighbors, Messrs. H. H. BADENHOP & Co., have received recently from the West a noble specimen of the Ultra Major. He is evidently one of the sharpest, but possesses the happy faculty of making himself at home under any circumstances, and is now thoroughly domesticated with Messrs. BARNES & Co. A polo has been created in their yard, upon which Brins exercise his prodigious powers and show by the closeness of his hug strength exists in his embrace. Fortunately he is a civilized animal and has received the benefit of a thorough education and is not disposed to carry his politeness to such extremes as hugging his visitors. His trip from his native soil has not affected his health; for though only sixteen months old he is large and well developed, and in a wild state would prove an ugly customer. He rejoices in the name of Cuffe, probably on account of his black hide, and like many two-footed Cusses, likes to take a drop or two. When this rare privilege is accorded him he will seek himself with great gravity on his hind legs, and taking the bottle between his fore-paws, empty the contents down his throat. Cuffe is, perhaps, the largest specimen of the black bear that has ever been exhibited in Charleston, and is far more tractable and docile than those seen in travelling menageries. He is well worth a visit, and we advise those who are interested in zoology to pay him a morning call at Messrs. H. H. BADENHOP & Co.'s, No. 133 Meeting street.

**THE CHARLESTON CHIFONIERS.**—The chifoniers belong to the grand family of scavengers, but are merely an humble branch as they pursue their calling on foot, and toil early and late while collecting the rubbish thrown into the streets from the different houses. In Charleston this business has been conducted principally by old colored women whose implements of trade were a huge canvas bag and a piece of bent iron hoop, with which they scratch the piles of dirt and refuse matter before the scavenger's cart has made its appearance. Many of these characters are revenueless, but the business, and have from long service become bent almost double; but they are still indefatigable, and the early riser can see them at their daily toil before sunrise. Nothing is too mean for their chitons but bones; iron and rags are invaluable prizes that are rapidly seized, and during the day taken to some of the numerous junkshops in the city and sold for a few cents.

The citizens of Charleston are too poor to throw valuable articles into the street, and the chifonier's tools for months, and even years, before their search is rewarded with the sight of any prize of more importance than old iron. No golden ducats have ever been known in this city, and the calling presents no attractions, to any except those negroes who are too depraved to engage in any business, and who can make a few cents by crawling round the streets and collecting the trash and garbage.

It is a difficult matter for half of the world to sell how the other half exists, and the chifonier belongs to that class that make their living while the rest of the world is asleep. They are the night birds whose home is on the street, and who consider all articles found on that domain as their property.

At 6, class they are incidental to every large city, but they are generally quiet, and will flock ed; they fly like evil spirits, and will flock in the necessary features of city life, and are never molested in their gnawing pursuits.

**THE CLarendon Press.**—We had the pleasure of a visit last night from E. T. LUCAS, Esq., of the Clarendon Press. The Press is not yet a year old, but has already distanced its competitors, and won for itself an enviable name among the interior papers of the State. The Press is published in a rich section of country, and in our opinion, offers two facilities as an advertising medium to our merchants. Mr. Lucas is staying at the Mills House, and will remain here a few days longer.

**THE CITY SQUARE SALOON.**—During the autumnal hours there is nothing better calculated to restore the equanimity and make the physical man equal to the burdens of the day than a slight reflection about noon. This is so well known that a rush is made to the different restaurants, where refreshments are provided for the weary between the hours of eleven and one. Since the mandate of liquoraders, but few of these restaurants have been licensed, and it is not until certain local hosts that a free lunch and its concomitant drink, can be obtained. The City Square Saloon is one of those pleasant resting places, and the weary, dusty, foot-sore pedestrian, can find rest for his feet, and the choicer delicacies of the market to tempt the palate. Messrs. WILDEMAN & STELLING, the proprietors of this saloon, have spared no pains to please their numerous guests, and have always on hand a choice supply of liquors, which are, by a few magical touches, transformed into various fancy and fascinating drinks. Their lunch is a spread consisting of every delicacy of the season, prepared in a faultless style; and those who pay them one visit need no inducements to make them repeat.

**CABINET ORGANS.**—MASON & HAMLIN have gained a great reputation for the excellence and durability of their workmanship, and they allow no instrument to go out of their factory which, through any defect, would be likely to injure the "good report" of them which now everywhere prevails. They take equal pains with their small and their large organs. All of them are warranted, and are perfectly reliable. The variety and beauty of the organs which can be produced with some of the large instruments are truly surprising, and can be properly understood and appreciated only by such intelligent persons as have heard those organs fully and effectually displayed.

(Providence Journal.)

11. 11.

If you want cheap Blanks; If you want cheap Stationery, Envelopes, Paper, &c.; or, MILTON'S Almanac; If you want Printing executed neatly;

If you want Books bound in any style, or Account Books made to order, with any desired pattern of ruling, go to HIRAM HARRIS, No. 69 Broad street.

**A Factual Review.**

The best investment for an invalid, who suffers from debility or loss of appetite, is a bottle of PARSON'S Patent Bitter, as it will be sure to give relief. For sale by all Druggists.

**A Card.**

WHAT IS TARRANT'S EVERLASTING SALTZER APERTURIST? What are its effects? These are questions which the general public are anxious to ask, and it also has a right to expect an exact and satisfactory reply. The preparation is a mild and gentle saline cathartic, aperient and tonic, and is most carefully prepared in the form of a snow white powder, containing all the wonderful medical properties of the famous Saltzter Spring of Germany.

Of its effects we would say that those who have tested the effects of the medicine, and the best judges, and they declare over their own bodies, that the preparation will promptly restore digestion. Stimulates the flow of the bile. Cure every species of headache. Tranquillizes the nervous system. Refreshes and invigorates the heart. May cure the gout. Relieves rheumatism. Neutralizes acid in the Stomach. Cleanses and tones the bowels. Assist the falling appetite. Cure the heartburn.

If you are a sufferer give this Remedy one trial, and it will convince you of the above facts.

TARRANT & CO., Sole Proprietors, New York. Sold by all Druggists. ———— September 12

**Kentucky State Combination Lottery.**

MURRAY, EDY & CO., Managers, draw EVERY DAY at Covington, Ky.

Whole Tickets from \$1 to \$10. Shares in proportion. Capital Prizes from \$4000 to \$35,000.

H. T. PETERS, Agent, No. 95 Hazel street; Charleston, S. C. September 6 Imo

**The Time to Advertise in the Country.**

THE PHOENIX has a large circulation throughout the middle and upper Districts of the State. Advertising rates as reasonable as the stringency of the money market will warrant. Merchants and others, wishing to use the columns of the paper will address

JULIAN A. SELBY, Proprietor, Columbia, S. C. February 25

**ARE YOU BILIOUS?**

Malady of the spleen will answer this question in the affirmative. For heart & spleen, the stomach, liver, complaints &c. It cures the following diseases of all forms:—

Its usual dose is a grain or two, which in the dimness of the eyes, especially near the inner corners, an uneasy or slightly painful sensation in the right side, pain between the shoulder-blades, sick-headache, lameness, mental dullness, lack of appetite, and irregularity of the bowels. Whoever recognises this diagnosis as applying to his own condition, may be quite sure that his existence lies in the blood and its passes through his bowels than is expedient for his health, and that his liver requires toning and regulating.

HOTTESTER'S BITTERS is to meet such exigencies as this. Its tonic principle routes the liver from its torpor, and its apertient gently relieves the intestinal spasms of the accretions consequent upon an insufficient supply of nature's own bile.

Persons of weak habits will find it the best safeguard against the attacks to which they are constitutionally predisposed, and should certainly avoid all the ordinary alcohol stimulants.
