W. M. BIRD & CO.

No. 203 EAST BAY, Agents for Charleston. C. DUCREUX'S PATENT For Instantaneous Detachment of

Horses from Carriages. THIS INGENIOUS AND VERY USEFUL INVENTION, THIS INGENIOUS AND VERY USEFUL INVENTION, which has been patented in the United States, France and England, is now offered by the subscriber to the public, feeling assured they will find it, upon examination, one of the greatest inventions of the age.

Prominent among its advantages are:

Press—The facility with which horses may be harnessed to or unharnessed from a Carriage, also rendering it unnecessary for the person unharnessing to pass between or behind the horses as is customary, thus avoiding any liability of being kicked.

SECOND—In case of a horse falling, he may be loosed from the carriage in one second, without the driver leaving his seat. It is so simple in its operation that a child can work it.

THIRD AND GREATEST—In cases of horses taking fright, becoming unmanagable or running away, the terrible consequences which so frequently follow may be all avoid-

Thind and Greatest—In cases of horses taking fri, lit, becoming unmanagable or running away, the terrible consequences which so frequently follow may be all avoided by this simple application to carriages, as the horses can be loosed from the carriage "in a twinkling," and the carriage is quickly and safely stopped.

Mr. C. DUCREUX gave several public exhibitions. The great favor and praise manifested by the public on these occasions, is one of the evidences of a popular appresiation of its merits.

Terms may be known and orders received for applying the patent to carriages, or purchase of State Rights, by addressing to
