CARGO FOR HAVRE .- There was cleared from the Custom House here, on Monday last, by Mr. Wm. Roach, the brig Shannon for Havre, being the first cargo for the French market which has left this port this season, and consisted of 5 bags Sea Island, 1103 bales Upland Cotton, and 25 tierces Rice. The last article is the first shipment of the Carolina grain to a French port, worthy of notice, made since the war. The trade from this point to Havre was formerly very large, but has been somewhat interfered with by cotton from other parts of the world; but we hope that this shipment is the revival of an old business that may largely increase and be mutually advantageous.

THE CHARLOTTE NEWS .- This spicy sheet, published in the flourishing little city of Charlotte, North Carolina, has recently changed hands. Messrs. S. D. Hutson and Henry Meetze have purchased the paper and purpose making it a live agement. Messrs. Hutson & Meetze are natives of this city, practical printers, and energetic and intelligent gentlemen. They carry with them our sincere wishes for their success in journalism, and we bespeak for them a warm and hearty reception and abundant support from the citizens of Charlotte. Our merchants and business men will find the Charlotte News an excellent advertising medium in which to extend their acquaintance in the section of country in which it circulates.

C. DUCREUX'S PATENT

For Instantaneous Detachment of

Herses from Carriages.

Herses from Carriages.

This ingenious and very useful invention, with has been patented in the United States, France and England, is now offered by the subscribes to the public, feeling assured they will find it, upon examination, one of the greatest involving or the age.

Prominent among its advantages are:

First—The fichity with which horses may be harnessed to or unharnessed from a Carriage, also rendering it unnecessary for the person unharnessing to pass between or behind the horses as is customary, thus avolving any dability of being kinked.

SECOND—in case of a horse falling, he may be loosed from the carriage in one second, without the driver leaving his seat. It is so simple in its operation that a child can work it.

can wors it.
THIRD AND GREATEST—In cases of horses taking fright,

becoming unmanagable or running away, the terrible consequences which so frequently follow may be all avoid-

contestance imple application to carriages, us the notice of by tals simple application to carriage "in a twinking," and the carriage is gracify and safely stopped.

Mr. C. DUCKEUX gave several public exhibitions. The most favorand praise mannested by the public on these

great (avor and proise manifested by the public on these co-ssions, is one of the evidences of a popular apprecia-tion of its merits.

ion of its merits. Terms may be known and orders received for applying

the patent to carriages, or purchase of State Rights, by addressing to C. DU(REUX, Patentee, No. 93 Elizabeth street, New York.

ASE FOR THE "AMERICAN LEAD PENCIL."

TESTIMONIAL
SHEFFIELD SCIENTIFIC SCHOOL,
FUGINEERING DEPARTMENT,
TALE COLLEGE, November 16, 1886.

I have always recommended the Faber Polygrads
Lead Pencils as the only pencils fitted for both ornamental and mathematical drawing; but, after a thorough trial of the American Polygrade Lead Pencils, manuactured by the American Lead Pencil Company, New Yore, I and them superior to any pencil in use, even to the Faber or the old English Cumberland Lead Pencil, being a superior pencil for sketching, ornamental and uschanical drawing, and all the ordinary uses of a lead pencil.

peacil.

These pencils are very finely graded and have a very smooth lead; even the soitest pencils hold the point well; they are all that can be desired in a pencil. It gives me great pleasure to be able to assure Americans that they will no longer be compelled to depend upon Germany or will no longer be compelled to depend upon Germany or will no longer be compelled to depend upon Germany or will no longer be compelled to depend upon Germany or will no longer be compelled to depend upon Germany or will no longer be compelled to depend upon Germany or will not only the pencils.
