Between the sunset and the sea My love had thanks and lips on me; Of sweet came sour, of day came night Of long desire came brief delight; Ah, love, and what thing came of thee Between the sea-downs and the sea?

Between the sea-mirk and the sea Joy grew to grief, grief grew to me; Love turned to tears, and tears to fire, and dead delight to new desire; Love's talk, love's touch, there seemed to be Between the sea-sand and the sea.

Between the sundown and the sea Love watched one hour of love with me; Then down the all-golden water-ways His feet flow atter yesterday's; I saw them come and saw them flee Between the sea-foam and the sea.

Between the sea-strand and the sea Love fell on steep, sleep fell on now. The first star saw twain turn to one Between the moonrise and the sun; The next, that saw not love, saw me Between the sea-banks and the sea.

OUR RELATIONS WITH ENGLAND.

THE ALABAMA CLAIMS IN THE BRITISH PAB-LIAMENT-IMPORTANT DEBATE IN THE HOUSE OF COMMONS-FRIENDLY SETTLEMENT PRAC-TICABLE-OPINIONS OF THE PRESS ON THE

A cable dispatch to the New York papers gives the following sketch of the debate in the House of Commons on the subject of the Ala-

bama claims:

London, March 7.—In the House of Commons last evening, Shaw Lefevre, the member from Reading, called up the question of the Alabama claims. He made a long speech on the subject, in which he urged the settlement of this vexed question on the plan proposed by the American government. All future negotiations, he said, would but add to complications already existing. He sketched the progress of the recent civil war in the United States to its termination. He said the fall of Fort Sumter evoked the famous proclamation of Mr. Lincoln. In less than a month after the appearance of that proclamation Great Britain had recognized the Southern insurgents as belligerents. They had no fleet, but they purchased their ships in our ports. These ships, notwithstanding the vigorous measures of our government to stop them, eluded our vigilance, and went to sea and were hospitably received at British colonial ports. They captured and destroyed during the war more than two hundred American merchant vessels. In less than two years the United States was literally driven from the seas, while the commerce of Great Britain was doubled. For this reason the speaker thought we ought to treat these claims generously. They were first made in 1862, by the American Minister, Mr. Adams.

The arbitration of the matter had been proposed by the American government, but re-

1862, by the American Minister, Mr. Adams.
The arbitration of the matter had been proposed by the American government, but refused by Lord John Russell, who repelled the suggestion. But Mr. Stanley had insisted that the responsibility of England was only a moral one in the Alabama case. The speaker thought the less said about morality on this question the better. He regarded the breaking out of a war between England and the United States as extremely unlikely, but thought, on the other hand, that all needless irritation should be shunned.

hand, that all needless irritation should be shunned.

Lord Stanley then took the floor. He praised the pacific oration of Mr. Lefevre, and complimented Mr. Adams for the conclistory spurit he had displayed in the subject under discussion. He said we could not make indiscriminate concessions, but we could learn the right of the case. There never was a case where there was more need of understanding the points. Much allowance is to be made for the feeling of the United States. Great Britain, in the same case, with five hundred millions of debt, contracted through a civil war in which a million of lives had been lost, might appreciate the matter better than merely lookers on only, He thought England had been entirely neutral; but no neutrality would have pleased America.

ate the matter better than a late the declaration of the matter better than a late the late of the matter better than a late the late of the late of the matter better than a late of the from England until 1862, and the battle of Bull Run was fought in 1861. Admitting that it was wrong for Great Britain to recognize the South, would the United States Government say that its case against the Alabama had been altered, had Great Britain made the declaration of neutrality six, rather than eleven months before she sailed? The speaker referred to the speeches of Daniel Webster in the United States Senate, on the subject of recognizing Hungary, in support of his argument. How could England refuse to recognize a war which Mr. Seward himself had announced to be a civil war nine, twelve, or sixteen days before the proclamation? Who could complain that England had recognized a civil war which the United States had admitted some weeks before? In conclusion, he thought a friendly arrangement of this difficulty was still practicable. He deprecated the debate. The friendly reception of Minister Thornton at Washington was a pledge of peace. The ministers were ready to leave the question to the entire world.

ton was a pledge of peace. The ministers were ready to leave the question to the entire world.

W. E. Forster, member for Bradford, thought Mr. Seward's view of the question of the recognition of the Alabama claims deserved better treatment and more careful consideration, as being perhaps the view that was right and sensible. He complained of the abrupt disposition of the question which had been made when the universal wish of the United Kingdom was for its speedy settlement. In thought that if any impartial statesman had been sent to the United States as minister, the point in dispute might be readily adjusted.

John Stuart Mill, the member for Westminster, was the next speaker. He regarded the present condition of the question as the result of a mutual mistake. The real question was whether England was bound to prevent such expeditions as that of the Alabama. He denied that the United States Government claimed or could claim that the recognition of the South was a violation of law, but only that it was an unfriendly, rash and unprecedented act. The American Government only pressed the point for the purpose of showing that but for the unfriendly action of England, the Alabama depredations would not have occurred. Mr. Mill thought that an arbiter between the two countries was needless, and that reparation was fairly due to the United States. He

Mr. Mill thought that an arbiter between the two countries was needless, and that reparation was fairly due to the United States. He concluded by advising the appointment of a mixed commission for the purpose of the adjustment of the question.

W. E. Gladstone, member from South Lancashire, thanked Mr. Lefevre for his able speech, and Lord Stanley for his temperate reply: He (Gladstone) could not understand why the negotiation ended, nor could he agree with Mr. Mill that Lord Stanley had admitted that reparation was due, or that an arbiter would surely decide against England. For himself he doubted if reparation for the Alabama depredations was due the United States. It was unquestionably right that the point ms apprenations was due the United States. It was unquestionably right that the point should be referred to a commission; but if the government feared such a reference, it should settle the matter at once, or leave the decision

with an umpire.

Mr. Gladstone inferred, however, from the closing sentences of Lord Stanley, that the communications between the two governments had not closed, and that friendly feelings between the United States and England would be

tween the United States and England would be preserved. He concluded by saying, if his inference was correct, the whole country would support Lord. Stanley in a just and honorable settlement of the case. The debate was closed with Mr. Gladstone's remarks.

London, March 7.—Nearly all the leading newspapers have editorial articles this morning on the subject of the remarkable debate in the House of Commons last evening on the Alabama question.

Alabama question.

The Times says that the debate must convince the United States Government that England wishes to settle the law in this case in the American sense, and that the failure of Great Britain to refer the Alabama claims to arbitration is due to no desire to shun her just obligations. Mr. Seward has only to meet Lord Stanley in a like spirit to end the misunderstanding. Alabama question. The tone of the journals is generally the

The Charleston Cotton Market. OFFICE OF THE CHARLESTON DAILY NEWS, CHARLESTON, Tuesday Evening, March 10, '69. I
The market was extremely quiet, buyers holding off or asking considerable concessions, while sellers were generally firm and confident; the transactions were consequently quite limited, mostly at 1ate showing Hale, decline; sales 250 bales—say 25 at 2016; 31 at 22; 3 at 23; 36 at 2314; 6 at 24; 30 at 2416; 5 at 25; 17 at 2516, and 109 at 26. We quote:

LIVERPOOL CLASSIFICATION. Ordinary to Good Ordinary.

Low Middling.

Middling.

Strict Middling.

Wilmington Market. WILMINGTON, March 9.—TUBPENTINE.—Market steady at former prices. Sales of 1174 bbls at \$3 35 for soft, and \$2 25 for hard, per 280 lbs.

SPIRITS TUBPENTINE.—Sales of 167 bbls at 67c per

Rosin.—The sales to day are 1005 bbls at \$2 40 for ROSIN.—The sales to the sales at \$2.30 per bbl.

TAR.—66 bbls changed hands at \$2.30 per bbl.

COTTON.—Market firmer, and prices advanced a shade. Sales of 2 bales at 23c, and 18 do at 23% oper lb for Middling.

New Orleans Market.

NEW ORLEANS, March 5.—Corron.—The sales to-day amounted to 5000 bales at Irregular prices, showing an average advance of 1/sc on yesterday's figures. We now quote Ordinary at 2021c, Good Ordinary at 20221/sc, Low Middling at 23223/sc, Middling at 24224/sc, and Strict Middling at —a 25c.

Middling at 24a24%c, and Strict anothing at 25c.

The market opened under the influence of the favorable telegrams from Live.pool received last evening, and factors raised their pretensions 3/ale per lb. At the same time there was a fair demand, and though buyers were unwilling to operate at the extreme figures claimed, yet they evinced a readiness to go on at ½c cdvance on yosterday's prices. Hence the bulk of the business noted above was done on the basis of 23a23½c for Low Middling, and 24a24½c for Middling, the general tendency being to the outside rates. Some sales, however, were made at still higher figures, but at the close, after the receipt of the cable reporting an unfavorable reaction at Liverpool, the market lost much of its previous buoyancy. Strict Middling sold at 25c, and some extra staple brought 25½c.

Was firmer to-day under a better inquiry. Cable advices also were steady. We report sales as follows: 55 bales, comprised of good ordinary, at 22c; ordinary 21, and low middling 23c; 24 bales low middling at 23½(c; 24 do do 23c; 16 bales stained 20 150 bales good ordinary and low middling mixed at 23c; 165 bales good ordinary and low middling mixed at 23c; 165 bales good style low middling. Late in the day we note a sale of 205 bales good style low middling at 24c.

In the day we note a sale of 205 bales good style low n'iddling at 24c.

COFFEE—There is a very firm feeling on the part of holders, on account of ½c advance established at New York to-day. No large sales here. We have only to note 100 bags Rio on private terms.

FLOUR—Was in demand to-day, with sales of 600 bbls Northwestern Super at \$875:9:100 bbls at \$962; 300 bbls Howard-street Super \$9. 75:10; 500 bbls Howard-street Super \$9. 75:10; 500 bbls Howard-street Extra \$10. 75:12; 100 bbls common City Mills Super \$9.

GRAIN.—Wheat offerings continue light. We note a better inquiry from millers, and prices firmer, particularly for Pennsylvania. Included in the sales were 140 bushels choice white Karyland at \$3.05; 625 bushels Southern red \$2.75:2 80; 1000 bushels choice Pennsylvania \$2.50; 5000 bushels good and prime do \$2.60:2 56. Corn—12,200 bushels white and 8000 bushels yellow received; market was weak for white, but firmer for yellow; we report sales of 700 bushels white at \$1.08; 3400 bushels do \$1.10; 800 bushels \$1.12; \$50 bushels yellow \$1.10; \$50 bushels do \$1.10; Aust—2170 bushels offered, with sales of 1200 bushels at \$1.65.

Molasses.—Nothing doing ito-day; market unchanged.

Molasses .- Nothing doing ito-day; market un changed. Provisions.—There is very little abatement in the Provisions.—There is very little about enter in the Southern orders for bacou, which are steadily and quite uniformly filled by the trade at 12½c for shoulders; 14½c for rib sides, and 15c for clear rib, when packed in regular bacou hhds; sugar hhds ½c less. No round lots on the market of either bacon or bulk meats. Mess pork is steady at \$25ac15 50 per bbl. Lard 16½a16½c for Western tes, and 20c for refined, in pails and kegs. Bacon hans 18a20c for sugar-cared—latter for best brands convessed.

Fertiligers.

MAPES'

NITROGENIZED SUPER-PHOS-PHATE OF LIME.

THE PRACTICAL EXPERIENCE GIVEN BELOW of planters during the past season, fully establish the advantages claimed for this well-known FER-

Received the highest premium awarded to Fertilizers by the American Institute of New York, held October, 1867.

For full report, with analysis made by the Committee of the Institute, composed of Dr. C. E. Buck, Professor J. G. Pohle, and other prominent Chemists, see pamphlets.

The distinguished feature of this SUPER-PHOS-PHATE from other similar Fertilizers is, that all of its ingredients are of animal origin, and are either soluble in water, or in a condition to fuickly become soluble in the soil and be taken up by the crop. Contains no inert or mineral materials. Contains no inert or mineral m

The proper relative proportion of the ingredients in MAPES' SUPER-PHOSPHATE to meet the rein alares' soften Phornate to meet the re-quirements of the Cotton crop on Georgia and South Carolina soils, is fully proved by the experience of planters who testified that toherever applied, even to land notes for rusing cotton, the disease is entirely corrected, and a healthy, vigorous growth produced. On the same land Peruvian Guano and other fartil-izers have failed to secure a healthy growth.

REPORTS FROM PLANTERS, 1867.

For Letters in full see Descriptive Pamphlet. For Letters in full see Descriptive Pamphlet.

Dr. E. M. ROYALL, Christ Church Parish, writes:
Applied at the rate of 150 to 200 pounds per acre on
11th April, on 22 acres blue clay land, a good deal
word from being planted in cotton from 1857 to 1867,
with only one year's restduring that time, and notwithstanding the long continued cold and heavy rain,
and gries during the spring and summer, about the
first of September the crop on this field was estimated by some of our best judges to promise a yield of
180 to 200 pounds fine Sea Island Cotton Lint to the
acre. Notwithstanding the ravages of the cater, illar,
the first cotton picked was from the field on which
MAPES' PHOSPHATE was used, and it has made
about 65 pounds to the acre, while no other manured land made over 45 pounds. Has used MAPES'
PHOSPHATE on melons, potatoes and the garden PHOSPHATE on melons, potatoes and the garden with satisfactory results.

THOMAS S. SALIFER, Washington County, Ga., reports that seventy-five pounds per acre on oil land increased both the Cotton and the Corn three-fold. Considers it far more economical than Peruvian

Ga., says:

"My observation is that MAPES' SUPER-PHOS-PHATE is a preventive against rust in (totton. Has about doubled the Cotton and trebled the Corn. Has done better than Peruvian Guano per pound."

J. W. Scort, of same section, reports:

"That his crop manured with Peruvian Guano was far more effected by drought and excessive rains than where MAPES' SUPER-PHOSPHATE was used. Shall use MAPES' in preference to any fertilizer he has seen used by his neighbors."

W. H. Sparss, Fatonton, Ga., reports:

"On land about half covered with eedge, and which had not been cultivated in two years, when the manure was put on, badly manured, crop would yield two pounds where the unmanured would yield one."

Dr. E. Parsons, Sandersville, Washington County

one."

B. B. HAMILTON, Americus, Ga., reports:

"Obtained the most satisfactory results from
MAPES' SUPER-PHOSPHATE, applying it as a top
dressing. Considered to have hal the best garden
this year in Southwestern Georgia."

W. J. ANDERSON, Fort Valley, Ga., reports:

"MAPES' SUPER-PHOSPHATE has doubted the
Grand Cotton in avery case resorted and some re-

"MAPES' SUPER-PHOSPHATE has doubled the crop of cotton in every case reported, and some report it has more than doubled their crop. On wheat and cast the results are very satisfactory."

D. A. Warstock, Beach Branch, S. C., reports:

"On land which always rusted cotton, increased the crop twofold; as fine cotton as he has sen this year. Prevented rust. Four rows unmanuned rusted in August. Everything the MAPES' SUPER-PHOSPHATE was tried on did well. Cotton stood the cold weather in Spring; kept perfectly green, and growed finely; has best Perusuan Guan; in his neighborhood. Believes it to be the nest Manure now in use."

ow in use."

E. R. Liles, Lilesville, Anson County, N. C., reresults, intervent, 2 most outlier, N. C., reports:

"As compared with Peruvian Guano and Baugh's Super-Phosphate, the result was decidedly in favor of MAPES' SUPHER-PHOSPHATE; attributed, beyond doubt, to the fact that the ravages of the rust were not, by a marked dufference, so severe where it was applied as where the other manures were."

JAMES MOMERIN, Alston, S. C., reports:
"Used a ton of Peruvian, and found the result but one half as compared with those from MAPES' SUPER-PHOSPHATE. Soll mostly sandy, with clay subsoil. Marked difference in the size of the bolls, in favor of MAPES' SUPER-PHOSPHATE. On Cotton plants the increased growth was about 100 per cent."

cent."

John R. Hair, Mims, S. C.:

"Cotton was more vigorous and healthy, and matured at least two weeks earlier where MAPES'
SUPER-PHCSPHATE was used as compared with other Fertilizars applied. MAPES' SUPER-PHOS-PHATE produced 100 pounds per acre more Cotton than Rhodes' Super-Phosphate, and 50 pounds per acre more than Soluble Pacific Guano. Sami-quanty of each, 150 pounds, used to the acre, cultivated in the same manner. MAPES' SUPER-PHOSPHATE more than doubled the yield of Cotton."

R. S. VENNING, Christ Church Partsh, E. C., reports:

ports:
"One application, 200 pounds MAPES' SUPER-PHOSPHATE, per acre, made the cotton grow to the height of six feet, where it grew only two feet the year before. Considers MAPES' SUPER-PHOS-PHATE the best Fortilizer for SEA ISLAND COTTON, and would safely recommend it to all plant-

S. C. Means, Spartanburg, S. C., writes:
"Used 240 pounds per acre, applied May 13th. Can
safely say never saw a more vigorous growth impart
ed to cotton from the use of any manure. Satisfied
the use of MAPPE'S MIPPER PROPER ANY ASSESSED. MAPES' SUPER-PHOSPHATE pays ha omely,"
Rev. W. A. MERRIWETHER, Valle Crucis, near Co-umbia, S. C., reports:
"MAPES' SUPER-PHOSPHATE has given perfect

"MAPES SUPER-PHOSPHATE has given perfect satisfaction, and that it permanently improves the soil. Has no hesitation in saying it is the special manure for the turnip and Irish potato."

P. C. PENDLETON, Valdoston, Ga., writes:

"MAPES' SUPER-PHOSPHATE has exceeded my most sanguine expectations. The effects of its use on Corn, Peas and Garden Vegetables was most marked. If it can be always kept up to the standard it must take the preference of all ferlilizers in use."

use."

M. B. Hunten, Quitman, Ga., reports:

"Applied at the rate of 150 pounds per scre upon every alternate four rows. The result was truly astonishing. The manured rows yielded fully double the neighboring alternate rows." TERMS-\$65 A TON, CASH.

TIME SALES CAN BE ARRANGED FOR, PANABLE IN NOVEMBER.

H. W. KINSMAN, SOLE AGENT FOR SOUTH CAROLINA FOR MAPLE' SUPER PHOSPHATE OF LIME AND GUANO COMPANY.

THE WANDO COMPANY,

No. 15% EAST BAY.

CHARLESTON, S. C., IS PREPARED TO FURNISH FARMERS AND PLANTERS

AMMONIATED SOLUBLE PHOSPHATE,

COMBINING IN THE HIGHEST DEGREE THE requisites for the largest yield of Cotton and Corn. Our friends who have tried this FERTILIZER give their unqualified testimony of its complete success in largely increasing the yield of their crops. Where the application was doubled, the increase of yield was fully as great, and we ree assured that it has proved for cotton

"THE MANURE." PLANTERS WILL FIND IT ADVANTAGEOUS TO work less ground, to cultivate more thoroughly, and to apply liberally a preparation such as the above. Our

FERTILIZERS ARE MADE UNDER THE SUPEK, ISION OF Dr. St. JULIEN RAVENEL, Chemist,

WHOSE REPUTATION AND SKILL ENSURE A eliable article. We have no hesitation in stating hat in our STANDARD MANURE the public have a that in our STANDARD MANURE the public have a FERTILIZER which will give the most satisfactory results. WE CLAIM THAT AT THE SAME COST PER ACRE, THIS ARTICLE WILL DO BETTER THAN PERUVIAN GUANO, our riends writing that Guano loses its effect upon the plant generally about the beginning of September, and this sustaining the plant in a green and healthy condition until killed by frost. Directions for use set, with shipments. Price \$65 per ton of 2000 pounds.

A SUPERIOR ARTICLE OF PURE BONE FLOUR

ALWAYS ON HAND, SGS PER TOY OF 2000 POUNDS. Rhodes' Super-Phosphate Fertiliger.

MANURE! MANURE!

TO THE PLANTERS OF SOUTH CAROLINA.

USE RHODES' SUPER-PHOSPHATE,

THE OLD AND LONG ESTABLISHED STANDARD FERTILIZER.

THIS MANURE, IN ITS PREPARATION, IS MADE EQUALLY ADAPTED FOR FORCING large crops of cotton, corn, wheat, tobacco, potatoes and other root crops.

The manufacturing depot is conducted by one of the most skilful chemists and manufacturers It is endorsed, approved and recommended by all the most prominent chemists and agricul-

It can be relied on as uniform in quality-always reliable-productive of large crops-and un-

excelled by any in the market in the high per centage of TRUE FERTILIZING PRINCIPLE. Witness innumerable endorsements, among which we quote from Prof. JOSEPH JONES, Chemist to Cotton Planters' Convention, 1860, whose Report, page 7, says:

"It is but just that I should state to the convention that both the manufacturers and venders of this Fertilizer have thrown open everything to my examination, and have manifested a denation to conduct all their operations in an open and strictly honesr manner.

We have established a CENTRAL DEPOT at Charleston, and will be represented by

Messrs. B. S. RHETT & SON.

AGENTS, BROWN'S WHARF,

To whom Factors and Planters will please apply.

fertiligers.

MAPES SUPER-PHOSPHATE OF LIME

AWARDED TO FERTILIZERS AT THE FAIR OF THE

HELD AT NEW YORK, OCTOBER, 1867. THE EXAMINING COMMITTEE ON FERTILIZERS at this Fair reported as follows: "Entry No. 298—FERTILIZERS manufactured by the Map et edecidedly first in order of merit. The "IMPROVED" SUPER-PHOSPHATE is the best article of its class known to the judges, while the NITROGENIZED is fully equal to the best manufactured. These Fertilizers are entitled to a first premium, as they are far superior to all others in the Exhibition."

Analysis of Mapes' Nitrogenized Super-Phosphate of Lime, exhibited at the American Institute Fair in New York, October 22d, 1867, made at the direction of the Committee on Fertilizers:
Phosphoric Acid, soluble Moisture expelled at 212

RODUNDA ISLAND GUANO. A Pure, Unmixed, Natural Guano, a Fine as Flour (although not Ground)

Imported from the Island. THIS GUANO IS FROM A RECENTLY DIS-

just in the Condition in which it is

COVERED deposit on Rodunda Island, in the Carribean Sea, West Indies, latitude 16 degrees 56 minutes north, longitude 62 degrees 23 minutes west.

It has been used for many years in the West India Islands in the cultivation of Sugar Cane and cereals with great success; was introduced for the first time to the farmers and planters of the United States in the spring of 1866, and has met with unprecedented success, as the subjoined reports and testimonials fully corroborate.

success, as the subjoined reports and testimonials rully corroborate.

The RODUNDA GUANO is not a mineral phosphate, requiring the action of the Sulphuric Acid to render it soluble; its great power as a fertilizer is in its entire solubility, without the sid of acid. It is not a "manipulation" or Compound of I ish or Flesh with Mineral Phosphates, the regularity of which is always uncertain and dependent upon, and controlled by the honesty of the manufacturer. The RODUNDA is a PURE NATURAL GUANO (that term being understood to mean the excrement of fish-eatbeing understood to mean the excrement of fish-eating birds), as the large per centage of organic mat ter sufficiently attests, and as found upon the Island of Rodunda, in the very state as imported and sold

The regularity and uniformity of the fineness and condition of the various cargoes already imported by us into the United States, tested by the analysis of the most eminent Chemists of this country and Europe, is sufficient proof of its origin and a guarantee of our ability to furnish this Guano of the quality and purity represented. and purity represented.

The PRICE of the HODUNDA GUANO is not the

The PRICE of the MODUNDA GUANO is not the least unimportant in these days of agricultural competition and pecuniary embarrassment.

The very low price at which it can be sold places it within the reach of every farmer, and avoids the risk of large loss frequently incurred by failures of the crops in the purchase of high priced fertilizers.

In the preparation of lands for Wheat and other creals this Guano possesses properties that render it more desirable for these crops than any yet offered to the public.

Pamphlets containing the analysis and experiments made by the most prominent Chemists of this most prominent Chemists of this Pamphlets containing the analysis and experiments made by the most prominent Chemists of this country and in Europe, together with innumerable certificates of its entire success from farmers and planters, can be obtained at our Office, to which we Price \$40 per Ton, in bags or barrels, in Charles-

on.
A liberal deduction made to dealers and purchas ers of large quantities.

Where the above Fertilizer is ordered in quantities sufficient to warrant it, the terms will be made accommodating to approved purchasers, and reasonable time given for satisactory city acceptance.
