tention is directed to a meeting of the Democrats of Ward No. 2, called for to-night, at the Hibernian Hall. A full attendance is particularly requested. GENERAL BURTON.-This officer, lately in

command of the post of Columbia, has returned to Richmond, Va., after a few weeks' absence in Pennsylvania. He now assumes command of the 5th Regiment United States Artillery, of which he is colonel. Brzele's "Hone Kong" Hars.-We have

seen cupalos on the top of houses, and piazzas around dwellings, and we have heard the song "All around my Hat," but the "Hong Kong" beat all. They are so ugly that Steele has named them men's "Waterfalls." DEATH OF A CHARLESTONIAN IN NEW YORK

BY SUNSTROKE.-Mr. John Hogan, an old resident, left Charleston a few days since on a visit to the North. While in New York during the present heated term he tell a victim to a sunstroke, and the telegraph on Wednesday advised his family of his sudden demise.

LOWANDE'S CIRCUS.—This entertainment was well attended last night, the report that a man would "walk on the ceiling like a fly" having proved a powerful attraction. The circus is the only amusement in the city at present, and the proprietors are making every effort to please. There will be new and varied attractions offered each night during the stay.

TRANSMOGRIFIED,—The Columbia correspondent of the New York Times, who writes under the name of Boise, says a certain debate brought out the most decided opposition "from J. J. Wright, B. F. Randolph and C. P. Leslie (all colored)." Leslie was believed to be a white man a fortnight ago, and must have been transmogrified corporally in Columbia as he was mentally in Charleston.

THE CROPS IN FLORIDA.—We are permitted to publish the following extract from a private letter received in this city yesterday:

Madison, Fia., July 18, 1868.—We are having very unfavorable weather fir cotton—gluts of rain every day, coming too late to do the corn much good, are seriously injuring the cotton. I hear of considerable complaints of the cotton "scalding" and shedding its fruit. This, however, I believe is not yet general.

THE EX-ATTORNEY-GENERAL.—The Hon. I. W. Hayne having been relieved from his official duties as Attorney-General of South Carolins, a position which he has filled acceptably to the people for many years, announces in to- Bryan, Esq., it was ordered, that hearing be day's paper that, in connection with his son, had before W. J. Clawson, Esq. ac Hayne, Esq., he is prepared to transact all legal business appertaining to the South Carolina Courts. Mr. Havne's legal attainments are too well known to need comment or praise, and it is a matter for congratulation that the bar of Charleston is to retain such a bright and shining light.

AN AFFRAY IN WALTERBORO'.-We understand that a personal difficulty of a serious na-Ture having arisen between Messrs. W. H. Bellinger and Clarence Fishburne, residents of Colleton District, they met for the first time in the streets of Walterboro' on Monday last. Fishburne approached Bellinger in a hostile manner, which the latter observing, drew his nistol and fired the first shot, wounding Fishburne in the neck, but not seriously. They then approached each other, both firing. Fishborne was struck twice in the knee, the second shot being considered serious. Bellinger was struck near the collar bone. The ball ranged down, and had not been discovered at the latest advices. Both of the combatants are seriously wounded, and it was feared that Fishburne might loose his leg. The origin of the difficulty is not known.

REAL ESTATE SALES. - Mesers. Leitch & Bruns sold yesterday two lots of land, containing one acre each, on the King-street road, opposite Noisette's farm, for \$805; one-half cash palance in one year.

A one-story wooden house and outbuildings. on Smith-street, known as No. 91, for \$800: one-half cash, balance in one year.

A blacksmith and wheelwright shop and residence, in Calhoun-street, known as No. 90, opposite Zion Church, the lot measuring twentyfive by one hundred and fifteen feet, for \$930; one-half cash, balance in one year.

Messrs. Leitch & Bruns also sold for James W. Gray, Master in Equity, a lot of land and there was nothing to show for it. Why, what buildings on south side of St. Philip-street, the lot measuring twenty-six feet six inches front by one hundred and one feet deep, for \$1725; one-fourth cash, the balance in one, two

and three years. THE PEABODY FUND .- Dr. Sears, the agent, has, since he was appointed, visited ten of the Southern States. The plan which Le adopts is to visit the city government of the various cities, and communicate to then his mission; and if they establish the system of free schools, he offers from his fund to bear a portion of the burden for the current year, generally about two-fifths of the amount required for instruction. In seven of the States free schools have thus been established in the principal cities, and the plan has everywhere met with the earnest co-operation and sympathy of the intelligent portion of the Southern people. In only one place has Dr. Sears mat with a decided rebuff, and in that place the city authorities—the majority of whom were bachelors thought that every man ought to educate his own children. The provisions of the fund do not extend to Maryland, Kentucky, Missouri and Texas. Attention has this far bear given only to the largest towns lanta; D. B. Clayton, Columbia; W. A. Nerland. and cities, and it has generally been found that only about one-third of the white children in H. R. Fich, wife and child, United States those places were attending schools—generally from the wealthier families-in private schools at great expense, and that in the same places about two-thirds of the colored children were in some way provided with means of education and were actually at schools.

THE THERMOMETER. - Yesterday the mercury did not go out of sight, but it did go up to the vicinity of one hundred degrees. In THE Darly News office, at 9 A. M., the thermometer stood at eighty-seven; at 11 A. M., at ninety-three, and at 12 M., at ninety-five. In the sun the the mometer stood for some time at ninety-nine, and for a little while at over one

DEATH IN THE GUARDHOUSE .- Francis Wisnansky, who was brought to the Guardhouse on Wednesday night in an insensible condition from liquor, died in that place a few hours later. It appears that Wisnansky had been employed for some time as a watchman on the government wharves, but had been discharged on account of his dissipated habits. He had been on a prolonged spree at his boardinghouse, in Tradd-street, but was taken from there to the hospital by some friends. They were unable to carry him the whole distance and left him at the Guardhouse. Dr. Frost was called in and every attention paid him, but to no avail. The coroner was notified, and an inquest being held a verdict of death from intemperance was rendered.

AROUND Town.-Although the heat is at present too oppressive to permit any but the most circumscribed walks, yet those who can raise the requisite amount of energy to make a tour of the city, would be surprised to note the various improvements now in progress. It was long the opinion that building should be confined to the winter season when the rays of the sun were harmless, but this idea has evidently been discarded, as the work still goes bravely on. The different improvements and building operations have been frequently mentioned, but a city tourist who is able to compare the past with the present, will certainly exclaim that the half has not been told. Charleston is slowly, though surely, recovering from her prostrate condition, and there is no better sign of progress than the new buildings now in course of erection. Since the war, the Battery, City Square, Mall and streets have been subjected to a thorough overhauling, and now approximate closely to their ante-bellum condition. Throughout the city the same improvements are noticed, and if only the "good times" come Charleston may soon shake off her sackcloth and ashes, and take again the front rank among the commercial cities of the Union. With good railroad facilities, a fine harbor, and every inducement to win trade, this great desideratum may not be far distant.

permitted, sava the Baltimore Gazette, to take the following extract from a private letter received in this city. It speaks for itself, and needs no comment:

Dear - : I have sometimes seen (and in

one of your papers) the remark made, how little lasting good has been done by all the money that has been sent to the South, and can such remarks mean? Do you call saving people from starvation nothing? Is it nothing to save life, to restore hope, to remove suffering, to life up him that is weary and ready to perish, to put heart once more into the hopeless, to give strength to the feeble and to see smile; once more upon the face of old age? Oh! the one who says this does not know what want and suffering and statvation mean; he has never left the pungs of lunger, or seen the child and the aged die for food. What sort of tangible proof of this can be given? I know not; but I know this, God notes every deed of tripdees and all is marked by his even deed of kindness and all is marked by his eys, and I firmly believe a blessing will rest upon your city and the ladies of Baltimore for all they have done for the south. "It is more blessed to give than to receive." will be verified in her. Words cannot tell what I fee!, but I know many tears were shed over those boxes (which God knows, were grateril), for all those wally ble gifts. "Our tax will have a not ten valuable gifts. Your tea will taste as no tea ever tasted before. I can only say, but for what has been sent from you and through you, we would all have been in a state of starvation. God knows: God records! Not ever a cup of cold water given in secret will fall to the ground; and may God's blessing rest on those who have done so much for the South; their record is on High.

How To KEEP Cool .- A corresponden furnishes the London Times with the follow ing hints, which will be found pertinent to our own climate: In these hot days a cool apartment is a real luxury, a luxury to be had far oftener than most suppose possible. The secret consists, not in letting in cool air, for naturally all do that whenever they have the chance, but in keeping out hot air. If the air outside a room or house be cooler than the air doors be not shut; but it must be closed at atmosphere outside be cool or scorching. "Let us have some air," they say, and in comes the treacherous breeze-for even hot air is ORDINATION.-Mr. Everett C. Edgerton, a pleasant while it is gertly blowing, taking uncomfortable than before. Let in cool air, keep out hot; that is the only formula to insure egress, and the windows be kept closed and shielded from direct sunshine by a blind. If the atmosphere of a room be impure from any cause, let it be renewed; hot air is less in. jurious than bad air. If a room be small in comparison with the number of persons engaged in it, free ventilation becomes indispensable. In cooking apartments the temperature will probably be higher than outside. hence the free admission even of hot air will be desirable. If persons do not object to sit in a direct draught of sir, windows and doors may be opened, a breeze being more refreshing, even though several degrees warmer than still air; but under nearly all other circumstances rooms should be kept closed as much as possible till after sundown, or till the air outside is cooler than that inside. Let in cool air, keep out hot.

MRS. POTTER.-The following extract from the proceedings of the United States Senate on Tuesday night will be interesting, at least to Mrs. Potter:

Mr. Howe called up the bill appropriating \$20,000 for Mrs. L. T. Potter, of Charleston, South Carolina, for services rendered by her to the Union cause during the rebellion and at-

tending to the Union prisoners.

Mr. Stewart objected to the passage of such a bill as this without a quorum was present.

Mr. Harlan called for the reading of the report in the case, from which it appeared that Mrs. Potter had spent of her own fortune over \$49,000 in ministering to the sick and wounded

nion prisoners.
Mr. Harlan desired to call attention to this class of claims. It was true that this was only
the second one so far, but there were a thousand such cases. He had thought that the reward which our noble women received for their
attention to our brave men was laid up in a
higher place. If the nation was to pay for all higher place. If the nation was to pay for all the charity that was bestowed upon our sol-diers during the war, where would it stop? There were numerous cases in this city where the wives, daughters and sisters of senators and members of Congress had poured forth their means with just as lavish a hand as this lady. He knew it was an ungracious task to oppose such bills as this, but deemed it his duty to call the attention of the Senate to what they were doing.

they were doing.
The bill was then passed.

WARM .- The New York Tribune, a journal which loves hot water and not weather, speaks

as follows of New York on Mondry last:

The heat yesterday was excessive, the day was hotter, in fact, than any we have had this year. New York wat simply one vast sweltering mass of humanity, crying out everywhere for fresh air and being unable to get it. Nearly every one down town and on Broadway carried a large palm-leaf fan, and the time of each pedeatrian was equally divided between fanning with one hand and wiping his perspiring brow with the other. Old residents say that it was the hottest 13th of July that has been experienced in ten years. The thermometer in various shady places throughout the city marked 100 degrees. Soda water dealers drove a flourishing trade, and in the fashionable saloons iced drinks were in constant demand. There were some cases of sunstroke, though not so many as, judging as follows of New York on Monday last : sunstroke, though not so many as, judging from the intensity of the heat, might have been expected. Dear Sm:—I take pleasure in recommending your ROSADALIS as a very powerful afterance. I have seen it used in two cases with happy results—one a case of econdary syphilis, in which the patient proughneed himself cured after having tiken five bottles of your medicine; the other a case of escofula, of long standing, which is rapidly improving under its use, and the indications are that the patient will soon recover. I have carefully examined the formit three rooms.
