THIS PREPARATION IS THE RESULT OF THE combined skill of the physician, dentist and apothecary, and it is offered as a naturalities useful to for the numerous uncertain washes now in vogue. The microscope has also been called into use, and the researches of a celebrated observer have detected the manner in which the tartar is formed, showing it to be the work of animalculæ.

Substances which Fichius found to destroy the life of these infusoria are contained in the Dentallina, and thus it prevents the increase of tartic and consequent loosening of the teeth. It will be found useful to persons in advanced life, giving strength and tone to the gums, while to every one the aroma and sensation of cleanliness after using it will be sufficient recommendation; smokers especially will appreciate usefficacy.

its efficacy.

Numerous dentists of the highest standing being acquainted with the composition of the Dentallina, advocate its use, it containing nothing corrosive or injurious to prevent its unrestrained employment.
