CHARLESTON, S. C.,

HAVING COMPLETED THEIR EXTENSIVE MANUFACTORY, ARE NOW PREPARED TO FURNISH

SQLUBLE FERTILIZERS,

No other kinds being available to Planters for immediate returns for their investments.

THIS COMPANY, UNDER THE DIRECTION ENTIRELY OF SOUTHERN MEN OF HIGH CHARAC-TER, offers inducements which will recommend it to Southern Planters. Their works are among the largest and most complete in the United States, and enable them to prepare at home an abundant sup-ply of the proper solvent for the South Carolina native Bone Phosphates which are near by. From these Phosphates they propose to manufacture a

FERTILIZER

even richer in SOLURUS PHOSPHATE than those made from RAW BONES, and containing more than twice the quantity of Superphosphate of Lame found in the best average manures heretofore offered for sale, the rates at which we offer them being no higher than the average price of other Fertilizers, while the Manures contain twice as much fertilizing material; they are in fact much cheaper to the consumer. They are offered on the market in two forms, with a guarantee that the material in each will correspond to the average price.

They are offered on the firsten in two forms, which a guide feet to the advertisement:

Etiman No. 1—SOLUBLE PHOSPHATE, containing from eighteen to twenty-five per cent. of PURE SOLUBLE PHOSPHATE OF LIME, and furnished at sixty dollars per ton.

Etiman No. 2—PERTYIAN SUPERPHOSPHATE, containing from sixteen to twenty per cent. of SOLUBLE PHOSPHATE, and three to four per cent. of AMMONIA, at seventy Dollars per ton, for approved acceptances bearing interest, or such other security as may be acceptable to the sub-agents, a discount of ten per cent. on the above prices will be made for cash.

Orders to be forwarded immediately to the agents, and delivery made as directed on and after 1st January next.

Analysis of Rhodes' Standard Superphosphate of Lime. Soluble Phosphoric Acid......9.00 Common Phosphoric Acid......16.03 Equal to Bone Phosphate......34.99 Total Phosphates......54.77

The above analysis indicates a Manurial Superphosphate of Lime of the highest grade ordinarily found in the American market. Its large amount of Soluble Phosphoric Acid supplies an active nutriment for the development and maturity of the fruitage. The Sulphuric Acid which it contains, by chomical affinity with the elements of most soils, contribute to its Fertilizing Properties. To show its best effects, this Superphosphate should be applied under and in contact with the Seed, and with a moderately shallow covering of soil.
