General Howard proposes to continue the educational work at the South, which was commenced when he was at the head of the Freedmen's Bureau. It is stated in recent reports that State Superintendents, under the Bureau, now have a continuance of this work at all points except in Texas, where the Freedmen's Bureau has been closed. For the purpose of continuing the work, General Howard proposes to raise the funds in the North.

It is said that General Lee was, at last accounts in Baltimore, is about to visit President Grant. A dispatch to the New York Herald says: "A gentleman who professes to know the facts connected with this projected visit of General Lee, who is now in Baltimore, has been staying for a week past with the President, and will be the subject of an interview with the President, which will have one or more interviews with the President, who has been invited to call upon him. It is stated that the object of the interview is to obtain from General Lee his opinion in regard to the wisdom of the reconstruction laws in the State of Virginia, and of the present temper of the leading citizens of the South. What other matters are to be touched upon is not definitely known, but from all that has leaked out concerning this proposed conference it is fair to infer that it will be of more than ordinary significance."

A New York letter, of Tuesday, says: "It is a long while since anything has occasioned so much remark in newspaper circles as the scandalous developments contained in the Sun, of this morning, concerning the way in which, it is alleged, Mr. John Russell Young, managing editor of the Tribune, has been using the influence of his position to promote his own pecuniary interests at the expense (as it is alleged) of Senator Cameron, of Pennsylvania, Judge Chase, and other prominent politicians; also, the Tribune stockholders; also, the New York Associated Press. The whole means feel that the profession has been disgraced by these doings of one of its members, if true; and, if not true, that it has been needlessly disgraced by the publications in the Sun. It is due to Mr. Young to say that he is to have a hearing before the public, and that it would be unfair, in the meantime, to condemn him, unproved, however much appearances may be against him. And yet, it must be added, that at a meeting of the Tribune stockholders last evening, he was deprived of his position—though, for some reason or other, the vote was reconsidered, and so the gentleman still holds on."

The project of a ship railway across the Isthmus has been discussed of late, and a memorial in that behalf was lately offered by Mr. Wilson in the Senate. The Stream of Immigration.

We are glad to see that business organizations at the North are at last actively interesting themselves in the good work of forwarding immigrants to the Southern States, and so far, with the most encouraging success. It is true that their operations, for the present, look mainly to the establishment of colonies in Virginia; but, now that a beginning has been made, the movement must inevitably extend Southward, and when inquiry is made as to natural advantages of the States, South Carolina certainly need not fear the result of a comparison with the best of her neighbors. The following from the New York Times, of Wednesday, shows the character and extent of the movement to which we have referred: "The Manhattan Company have sent Southward within two weeks 416 persons, and many others are leaving daily. The locations chosen are Bedford, the James River, in Kemble, Amherst, south of Franklin, Mocklenburg, and Halifax in Virginia. Each settlement numbers from twenty-five to fifty families, and the lands have cost them, in a state of half cultivation, from \$150 to \$100 per acre. The colonists have purchased from 20 to 300 acres each. The payments may be made as follows: Some quarterly, in advance, some semi-annually, and some in labor. The Old Dominion line of steamers carry Southward every trip one member or family of this colony. The next regular batch will leave May 2, and 5000 members are expected to leave within the next three months. The company have added \$800 to its treasury within the past week, making \$3000 therein at present, with a reserve fund of \$14,000 deposited in city banks."

CHARLESTON. SATURDAY MORNING, MAY 1, 1869.

The Future of the South, as Seen Through Northern Spectacles.

If anything were wanting to reassure our people in regard to the prospect that is before them, it might be found in the remarkable change of tone noticeable of late in all the allusions of the Republican press of the North to Southern affairs. The New York Commercial Advertiser tells its readers that "all classes of our people have a common interest in the prosperity of the South. Another season's good crops in that section of the country will do more to place the nation in a condition to resume specie payments than all the theories of politicians, or the long-drawn out wisdom of Congress. Through much distress and misery the South, in spite of politicians and the blunders of legislators, is now entering upon a new and substantial career of prosperity that may soon eclipse the glories of the West and North." The Philadelphia North American, hitherto one of the bitterest and most uncompromising of our enemies is in high glee at the signs of our material recuperation. In its issue of Wednesday it says: "It is found by a careful investigation into the amount of last year's crops, and their selling prices, that the South retains about \$200,000,000 gold from them. It is known that there is little debt there, the general crash having cleaned away everything down to the foundation, and economy of expenditures having been substituted for extravagance. There is much more than the war as any, has over 8,000,000 head of cattle within her limits, and can export 1,000,000 annually—better beef at lower rates than can be furnished from any other section. The freed people are working contentedly for wages. The old credit system that ruined the planters is dying out. The planters are using their current profits to stock and improve their lands. The books of our manufacturing establishments and shipping lines show the value and amount of material that is weekly going forward to enable greater production. This will be wealth, since it is paid for beforehand, and not by mortgages on crops. These facts come directly home to our own interests. They underlie a good and growing demand for our manufactures of every sort, with a pleasing assurance of payment and a comforting certainty that the raw material will sustain the consumption, and that prices will slowly tend downward. They are the very facts that are wanted to give to our commerce the impetus it feels on the Pacific coast, but has so long been without on the Atlantic. These are fair specimens of the spirit in which the whole Radical press of the North, just now, not excepting the two papers, both daily, of the notorious Forney—treat the affairs of the long maligned and persecuted South.

Pacific Railroads.

To-day, we are told, the last rail of the Pacific Railroad will be laid, and within a fortnight passengers will be able to sweep through on a continuous line from Washington to San Francisco. The completion of this great work, which was begun only five years ago, marred as it is, by gross defects incident to hasty construction by a pack of greedy speculators and soulless contractors, is yet a mighty stride in the progress of the country. The next step in the same direction must be taken by the South. That the Southern Pacific Railroad is to be built, and built soon, is one of the facts of the future, although Congress has denied to such a road even the right of way. It will be constructed probably without the use of money abstracted from the pockets of the people, and, rightly managed, it will accomplish for the South double what the other railroads to the great Western ocean can achieve for other sections. Let the Southern press see to it that the subject is incessantly agitated.

Technical Education.

The latest recognition of the importance of technical education in this country, is afforded in a report transmitted by General R. E. Lee, President of Washington College, Virginia, suggesting a plan for the extension of the scientific and practical departments of that institution. The main points of the plan presented are as follows: 1. The establishment of new departments of agriculture, of commerce, and of applied chemistry. 2. A more complete development of the engineering schools now in operation, so that to the course in civil and mining engineering shall be added a distinct course in mechanical engineering, to embrace, besides machinery, the most important branches of practical mechanics. 3. The opening of a farm and workshops in connection with the instruction in agriculture, industrial mechanics, and practical chemistry.
