THE DAILY NEWS.

The Return of the Dove. Only a waste of waters, Only a tideless sea, Which is not life, which is not death, But death in life to me.

Only the years on-coming Rolling their silent waves

Over the bysone trouble.
Over Live's hidden graves.

Only a drear out-looking

For a hope that is-long delayed,

And a w-ariful prayer for patience,

and a wish that may not be prayed. Why am I ever watching?
What can I ever see?—
Only a dove that is coming
From a far-off land to me.

Only a branch it is bringing.

Which tells of a clearer day,
And bears me a promise of peace and
When the waters have passed away.

YOU TAKE. WHEN YOU ARREXS USTED BY OVERWORK of bead or hand, and feel the need of something in vigorating, don't drink whiskey or any intoxics ting thing, whe her under the name of witters or otherwise. Such articles give just as much strength to your weary bods and mind as the whip gives to the jaded horse, and no more. Alcoholic stimulants are injurious to Nerve health, and are ALWAYS followed by DEPRESSING BEACTION.

Dodd's Nervine and Invigorator is a TONIC and GENTLE STIMULANT which is NOI attended by REACTION. Wast it gains for you it maintains. When itrefreshes body or mind, it refreshes with natural strength that comes to stay. We are not recommending teetotalism in the interest of any faction; but long and extended observation teaches us that he who resorts to the bottle for rest or recompanying, will find, as he keeps at it, that he or recuperation, will find, as he keeps at it, that he is kindling a fire in his bones which will consume like the flames of perdition. Turn from it. Take a tonio that will refresh and not destroy. DODD'S NERVINE is for sale by all Druggists. Price One Dellar. See Book of Certificates that accompanies each bottle.

Prof. Dairst. Dear Sir... aving not been engaged for many years in the active duties of the Medica: profession. I am only superficially acquainted with the claims of your Prophylactic Fluid but am well acquainted with the chemical elements.

While, therefore, I cannot speak experimentally of the value of the compound vet the disinfecting and therapeutic properties of the sgents empicyed in its composition, together with the well known reputation of its discoverer, as a chemiet, authorize me to regard its merit as of a high order; on the whole it must be considered as a valuable contribution to the class of articles to which it belongs.

These views, I may add, are sustained by the testimony of many competent judges, who have tested its propertiee.

Believe me, dear sir.

Finally, the instituct of our organism, as 1 in an attempt to expel the noxious infusion, concentrates
the whole blood of the body in the internal excreories to force them to cast it out. The blood leaves
the surface, and rushes to the central organs with
congestive violence. This is the Chill. But in this
effort it ails. Then the Fever follows, in which the
blood leaves the central organs and rushes to the

In this also it fails, and the system aband is the
