The Charleston Market.

[FOR THE WEEK ENDING AUGUST 18.] THE CROPS.—There has been no change in the general favorable aspect of the crops in this State and adjacent regions during the past week; the cotton plant is maturing rapidly, and new bales are coming to hand at various points, two having been received here from Florida, and four from this State. The weather has been hot, with, perhaps, too much rain, but in most respects favorable to a rapid and healthy maturity. The absence of extended reports of caterpillars or other destructive cotton worms up to this of North Carlina white was sold at \$1.25 % bushtime, gives hope that the plant will escape the el, weight, buls. About 1000 bushels prime white action of the destroyers this season. It is stated that the caterpillars have been seen on James Island, near this city, on severa' plantations, and

that the rust has commenced in some sections. THE RECEIPTS .- The arrivals at the port for the week up to Friday last were 5517 bales, in contrast with 5740 bales the week before, and 1759 bales for the period last season. At New Orleans the receipts were 895 bales, against 366 bales the year before. The total supplies at the cotton ports from September 1, 1869, up to the latest mail dates were 2,887,613 bales, against 2,114,738 bales last season, showing an increase of 772 875 | tra and \$9@10 for family grade. bales. The receipts at the chief Southern markets frem September 1, 1869, up to the latest telegraphic intelligence were as follows:
