The DIAMOND SLASSES, manufactured by J. E. SPENCER & CO. New York, which are now onered to the public, are pronounced by all the celebrated Opticians of the world to be the most Perfect, Natural Artificial help to the human cye ever known. They are ground under their own supervision, from minute Crystal Pebbles, melted together, and derive their name. "Diamond," on account of their hardness and brillancy.

The scientific principle on which they are constructed brings the core or centre of the lens directly in front of the eye, producing a clear and distinct vision, as in the natural, healthy sight, and preventing all unpleasant sensations, such as glimmering and wavering of alght, dizziness, &c., peculiar to all others in use.

They are mounted in the finest manner, in frames of the best quality, of all materials used for that purpose. Their finish and durability cannot be surpassed.

Caution.—None genuine unless bearing their trade mark stamped on every frame.
