The foregoing analysis authorizes us to pre-neunce thown a Mercer's?! Phosphate a well-balanced and reliable manure. The amount of Ammonia which it contains in aid of that sup-Ammonia which it contains in aid of that supplied from natural sources, furnishes a sufficient atimulus for promoting the growth and maintaining the vigor of the plant, while its liberal supply of Soluble Phosphore Achi in combination with Lime, must give a satisfactory fruitage for the first year. The insoluble Phosphate of the same base, by slow chemical changes, subsequently going on in the soit, will increase its capability for producing a better cropfor the succeeding year.

Original Color. PHALON'S "VITALI differs utterly from all the liair coloring preparations heretofore used. It is limpid, sweet smelling, precipitates no muddy or slimy matter, requires no shaking, imparts no stain to the skin. Hold it to the light and it is clear and cloudless. It leaves no mark on the scalp; yet it reproduces in gray half the natural color that time or sickness *may have

bleached out of it. Phalon's Vitalia

is for one sole purpose, that of reproducing, with absolute certainty, the natural solor of the hair. It is not intended as a daily dressip norforremoving scurf or andruff; nor for cut ring baliness; nor for stimulating the growth of the hair.— These objects may be accomplished after the color has been fixed with the Vitalia, by Phalon's Chemical Hair Invigorator.
