manlike manner. He will make no claim for the coveted goblet, considering discretion the better part of valor. The corner-stone of the East River bridge tower, on the New York side, was laid last Tuesday. Governor Hoffman has changed Thaks_iving Day to the 30th. On election day many of the merchants in the city have agreed to suspend business.

-The German Arctic expedition did not discover the open sea after all, a fact which is ise-and, upon the faith of that collect rather mortifying to the knights of the guill run up the new bonds, as has been done who made such an outcry over the false report. Some practical, scientific individual, who has no soul for sentiment, informs the too confiding public that what they did discover was "an open channel between Splizbergen and Nova Zembla, which, it was surmised (mark the word) might possibly lead into an open polar sea." It remains to be proved that this channel was anything more than a temporary opening through the ice, and that a second expedition may not find it locked as securely as any other part of the Arctic seas.

-What with the conference of crowned

heads and prime ministers, and the army reorganizations in every direction, Europe would seem to be on the eve of a great convulsion. That the great powers are jealous of each other, and the second-rates afraid of the results of the hob-nobbing of the men who have the destiny of Europe in their hands, is evident. France is reorganizing her shattered army; Sweden and Norway are training; England is recruiting and accumulating war material; Russia is making soldiers of all her male population fit to bear arms, and Prussia is quietly repairing her losses by last year's condemned crime, by whomsoever com campaign. All this may be in the interest of peace, but it don't look that way to outsiders.

-A very smart young Chinaman, named Yung Wing, graduated at Yale College in 1854. He stood at the head of his class, and was especially distinguished for his talent as a writer of the English language. He was educated there with a view to his becoming a mis. slonary of the Christian religion in his native country; tut in the course of his studies his theological opinions became unsettled, and he abandoned his proposed calling in order to devote himself to commerce. He has now been employed by the Chinese Government to bring over thirty other young Chinamen who are to be educated at Yale College at the public expense. It is said that thirty Chinese students are to be entered at Yale College yearly during the next ten years, and a sum of \$150,000 a year has been appropriated by the Chinese Government to pay their expenses.

-The Washington Patriot says : "Southern Radical senators now in Washington boast of the continuance of the martial law programme of the administration far beyond the limits of the nine counties in South Carolina One of these ofilcials, who has consulted with the President, declares that the Ku-Klux law will be enforced and the writ of habeas corpus suspended in every portion of the South where the evidence of the Ku-Klux Committee alleges that outrages have been committed. The wholesale arrests in South Carolina but precede those that will shortly be inaugurated in Northern Alabama and Georgia, and Mississippi, and probably Texas. The President is urged daily to take these violent steps by the alvice of Southern Republicans, who also threaten him that the ground is slipping rapidly under their feet. in the face of an impending Presidential campaign."

Governor Scott, Treasurer Par and Comptroller Neagle are in New Yo They control all the moneys of the State, it would be a profitable transaction to f the collection of the taxes of 1871 winter-contrary to the Governor's pr fore, to twice their present price. In way the Ring may pocket additional mill on the plea of maintaining the credit of State. We would urge bona fide owners the State bonds-old or new-to hold to their securities in any event. The preciation of values may not last long, the interest will, doubtless, be regul paid.
