Sales have been made of 1100 bbls at \$4.80, but la'er, the price was quoted at \$4.754.80. Tar is quiet; and a shade lower. We quote Washington and New-bern at \$3.12%, and Wilmington at \$3.25. Pitch is in limited demand. We quote at \$4.7525 for city delivered.

New York Coffee Market. From the Daily Bulletin, Thursday, January 11: he market, it apything, shows a little better one, and holders seem to be more confident. On The market, ill anything, shows a little better tone, and holders seem to be more confident. On Brazils some negotiations have been epened, and though buyers are not particularly anxious, bids are more plenty than a day or two ago and the feeling is hopeful, especially as country orders are horeasing, and there is a prospect that their teidr outlet may soon be opened. No positive in voice breargo transactions are made public, but rumors prevail of several lost changing hands, among which may be mentioned the cargo of the Thetis (a resale) here and the Lens to arrive at New Orleans. West India stock quiet, and we rearr of nothing except the confirmation of the sale of Maracabo referred to in our last. The movement of East India stock, to which we have under reference, several times of late, has at last been brought to a close and proves quite large. Full prices were obtained and present holders ask an advance, though the figure is not positively settled and quotations would be nominal. Wilmington Market.

WILMINGTON, January 11.—[Weekly Report.]
TURPENTINE.—During the past week the receipts have been very light, with scarcely none at all coming to market. On Frday there was a good demand with very little o 'ering, and figures advanced 5c. On Saturday an advance of 10c was obtained, and the market has ruled strong throughtout the remainder of the week. Receipts would readily command sale when offered at \$355 for hard and \$550 for yellow dip and virgin.

Receipts would readily command sale when of fered at \$3.85 for hard and \$5.50 for yellow dip and virgin.

SPIRITS TORPENTINE.—The market for this article during the past week has shown much animation, and all that could be reached has been taken by buyers, for both foreign and coastwiss shipment. On Wednesday the maket opened at the rollog price of the first of the week but later in the day the favorable telegraphic advices received made the feeling better, and an advance of ic was obtained. The receipts are somewhat larger than previous weeks, but no st ck has been allowed to accumulate, in fact, when the foreign vessels, now loading, shall have salled, the amount of stock will be greaty reduced. At the closing of our report the demand still continues, and the market is firm at 65c.

LOBIN.—We have no change of importance to note in the market for this article since our last report. Strained is a little lower but there is a strong feeling, and holders are asking an advance. The finge grades are a shade firmer, but there has been no change as regards prices. There has been a steady demand from buyers, and a fair amount changed hands in the earlier part of the week, but for the past two or three days the transactions have been limited, sellers generally holding at figures above the views of buyers. The quantity coming to market, both by river and rall, is smaller than anticipated, and the stock here is light.

Tar.—We have no change to report in this arti-

here is light.

Tar.—We have no change to report in this article, prices ruling the same as at the close of our last report. The receipts have been small and the demand light, the market closing quiet at \$2 25 per bbl.

IMPORTANT TO COTTON PLANTERS!

THE MARYLAND FERTILIZING AND MANUF CTURING CO

HAVE PREPARED A SPECIAL FERTILIZER ADAPTED TO THE COTTON PLANT.

UNDER THE NAME OF COTTON FOOD!

Which they claim to be of the Highest Grade of Fertilizer sold in the South, and guarantee to equal in results Peruvian Guano, pound for pound, and of more permanent benefit; the soil.

It has been used by several hundre! Planters in North and South Carolina and Georgia, for two seasons, with the following results:

It increases the crop from 100 to 200 per cent.

It resists drought in all cases. The crop is not affected by rust.

It ratures the crop three to four weeks in advance, thus insuring the crop against early frosts, or in the event of a backward season for planting enables the planter to put in his crop three or four weeks later, even as late as the 1st of June, with a certainty of success.

It produces a better quality of Cotton.

Looking at the low price of Cotton, the intelligent planter will readily comprehend the necessity of using nothing but the highest grade of Fertilizers, and of strictly avoiding those whose value has been reduced by adulteration or the use of cheap materials under the protection of meeting the low price of Cotton.

If his crop is only doubled by the use of "COTTON FOOD" it will give him from one to two hun-

If his crop is only sounce by the use of "Collow room," it will give that from the to two forces per cent, profit on h s outlay, with Cotton at 12% cents per pound, and it will enable him to p fewer acres, with a corresponding reduction of labor and expense, with better results. \$55 PER TON, IN SACKS, TWELVE TO THE TON. TMPORTANT TO PLANTERS AND FACTORS.

MIDDLETON'S FISH AMMONIATED PHOSPHATE.

This excellent brand of FERTILIZER comes before the public well recommended. Having been prepared with great pains and best materials, its adaptation to the crops of this section is unsurpassed, the evidence of which is furnished by the following testimonials of Professor SHEPARD and J. B. BISSELL, Esq., which we amex as follows:

OFFICE OF THE STATE INSPECTOR OF FERTILIZERS, March 31st, 1871.

Messrs. J. A. Enslow & Co.: Gentlemen-Enclosed please find the analysis of the sample of "Middletch's F.sh Ammoniated Phosphate," selected by my assistant from the cargo just arrived. The large amount of organic matter, rich in ammonia, and the highly soluble condition of the phosphoric acid, are sufficient recommendations for this article. I feel sure that the planter will be benefited by its judicious application to cotton and other crops. Respectfully, your obedient servant, (Signed)

O. U. SHEPARD, JR., M. D., Inspector of Fertilizers for South Carolina.

CHARLESTON. S. C., Desember 12, 1871.

(Signed) C. U. SHEFARD, J.E., M. D., Inspector of Fertilizers for South Carolina.

CHARLESTON, S. C., December 12, 1871.

Messrs. J. A. Ensiow & Co., Agents Middleton's Fish Ammoniated Phosphate: Gentlemen—I experimented with the one ton of Middlet n's Fish Ammoniated Phosphate which I procured of you, and beg to state that I applied it to Rice alongside of the Phosphate Manures manufactured in this city and vicinity, and the result was decidedly in favor of your Fertilizer.

I rave not yet threshed my crop, and cannot, therefore, furnish you with the difference in yield, but the growth and vigor of the stalk proved to me the superiority of Middleton's Fish Ammoniated Phosphate over the other Fertilizers used. Very respectfully, yours.

(Signed) J. B. BISSELL.
