THE SHIPMENTS OF FERTILIZERS.

The following table shows the quantity of fertilizers shipped from Charleston by railroad and water, during the first four months of 1872, 1871 and 1870. It must be borne in mind that consumption is not indicated with absolute correctness by the figures given, as large stocks were carried over from both 1870 and 1871. At a moderate estimate, six thousand or seven thousand tons remained over from 1871, and must be added to the shipments of 1872 in estimating the consumption of this season:

The hurdles were fallen over in fine style, and at length Mr. A. Dougal reached the goal first and won the prize. These were then presented, with appropriate addresses by President Cameron,

Lights were procured, and Terpsichorean enjoyments, in which the Scotch reel and other national dances played a prominent part, followed. About nine o'clock the company took the steamer and reached the city after the most delightful of days and a most enjoyable and successful picnic.
