CITY IMPROVEMENTS.

An Extensive Steam Tinware Manufac tory-Other Buildings in Progress.

A large wooden building has recently been

erected on Line street, opposite Nassau, by Mr. H. Wragge for Messrs, H. A. Due & Son, dealers in tinware. It is eighty feet long by forty feet wide, and one story, of fifteen feet, in height, and is covered with a tin roof of the ordinary form, well supplied with skylights. It is designed as a steam manufactory for tinware. An addition of twenty feet long is about to be made to the rear. Messrs. Duc & Son have made arrangements to furnish it with the most improved machinery for making up every kind of tinware. Some of this ma-chinery has already arrived and been put in position, and the rest is expected to reach here from New York in a lew days. It is worthy of remark that one of the machines to be used in this factory is entirely new, and is an invention of Mr. H. A. Duc, Jr., the younger memoer of the firm. It is used for seaming tinware by steam, and is calculated to do the work of five men. . This will be the only steam manufactory of tinware in the Atlantic States south of Baltimore, and will have a capacity for turning out five hundred

DISTURBANCE IN COMING-STREET. - James Gibbes and wife having quarrelled with James Grant, in Coming-street, yesterday afternoon, came at length to blows, bringing fists and brickbats into play. the following paragraph: We regretted recently, in the correspond-ence of THE CHARLESTON NEWS from this place, to see an attack upon the private char-acter of three of our citizens. We differ widely with the gentlemen in their political views, but, personally, they command the respect and good-will of our community, and have and good-will of our community, and have credit for the sincerity of their motives. We see no reason why a political campaign should of itself bring assault upon private character, and regret it in this instance.

A GREAT INVENTION FOR WARM WEATHER. No lady who uses a sowing mach! in this warm weather can afford to be without the simple, but exceedingly lagenious and comfortable sewing-machine fan, which has been introduced into the Charleston market by Mr. D. B. Haselton, of No. 307 King street. It can be attached in a moment to any kind of sewing machine that is worked by a treadle. It is so cheap that Haselton is selling hundreds of them, and every buyer is delighted with the purchase. Call at No. 307 King street and see the fan in operation.

THE BOAT RACE To DAY, it is expected, will be one of the most interesting and exciting aquatic events of the season. A STARTLING STAMPEDE.

Yesterday afternoon, about half-past six o'clock, a large herd of cattle were driven into the city by the meeting street road. When they reached the neighborhood of Columbus street eight or ten cows took fright at some boys playing in that vicinity and boited from the rest, some running down Meeting and others through Columbus street towards King. These last, terrified by the cries of a large crowd which had collected around them, dashed down King street at a frantic pace knocking down several persons, goring one or two, trightening many and creating a tremendous commotion all the way down to

A butcher named Hogan, in attempting to turn the cows back up King street, had his horse severely gored in the side. Two ladles were knocked down at the corner of King and Calhoun streets. A colored woman, named Mary Small, was gored in the left cheek, at the corner of George street, and several boys and two or three pollcemen were upset and bruised in King street. A white woman was knocked down in Spring street, and a colored woman in Alken's Park. One of the cows that had run down King street wheeled into Market, and gave chase to two colored women, who saved themselves by scampering up the Market steps. The whole force of police at the upper

Guardhouse turned out, under Lieutenant Webb, and succeeded in capturing four of the cows. One of these had to be tied on a dray to carry it to the Guardhouse. One cow wa shot and killed by a policeman on the Battery, another jumped from South Battery into the river and swam in the direction of James Island, and still another is said to have been shot by a butcher at the corner of Broad and Rutledge streets.

Great credit is due to the policeman, as but for their coolness and persistent efforts to capture the cows the damage to life and limb might have been much greater. The cows are said to have been driven into the city by two men named Harley and Stuart.

O'Hara & Bullard's Rice, Coffee and Spice Circular.

BOSTON, July 16. RICE.—Our market for Carolina has ruled very BOSTON, July 16.

RICE.—Our market for Carolina has ruled very duil for the past fortright, out without change in figu.es. Foreign—we note an active demand for foreign rice, particularly for the better grades, and stock in second hanns are rapidly deminishing. Paina is being taken largely by the trade, its comearative cheapness and the fact that the lots offered are much handsomer than that which has been offered heretofore, giving it a preference over Carolina. The market for foreign rice is very strong and the tendency is upward.

COFFEES.—Since our last a large business has been done, particularly during the first week of the month. Most of the goods bought previous to the first instant have now been delivered, and everything will no doubt run smoothly in the future. There has been quite a demand for low grades Rio, and choice Capes and Gunalves are being sold to supply the want of these. A noteworthy feature is the arrival of several parcels of Hayten cuffees of extra fine, even quality, and these are quickly taken up, being the cheapest confee, quality considered, obtainable. At the close the market is a little dropping, though with the encouraging advices received from the chief confee centres there appears no probability for any decline. In the main our quotatious are un-

coffee centres there appears no probability for any decline. In the main our quotations are un-

changed.
SPICS.—More firmness prevails for all kinds and we believe an increased demand would surely advance prices. Many kinds are now, and have been for some time, selling belw actual cost of importation, and when this is the case it is always safe to look for higher prices. We notice an improved demand for nutmegs and cases as and the prices for the former are decidedly former. Cassis in cases are now held higher than sia and the prices for the former are decladely firmer. Cassia in cases are now held higher than in mats, being in much lighter stock, and on this account it will probably remain ½ to 10 per pound higher. Though we look for no very great improvement in cassia, we do not believe it will go any lower, but that the tendency will henceforth be upward.
