LOCAL LACONICS.

-The steamer Falcon will sail for Baltimore at four o'clock this aftersoon.

-A regular quarterly meeting of the Charleston Library Society will be held at one o'clock, P. M., to-day.

-Winds veering to the west and north, with clear and clearing weather, are predicted for the Southeastern States to-day.

-A reheareal of the Oratorio of the Creation will take place to-night, when a full and punctual attendance is requested.

-The Bruederlicherbund will give, this evening, one of their regular monthly entertainments. Every member may look for a pleasant evening.

-Esther Brown, the colored girl who was burned in St. Andrew's Parish a few days ago, dled yesterday at the City Hospital. Coroner Logan held an inquest, and the verdict of the jury was, death from accidental burning. -The National Zouaves will give a grand

military ball at the Academy of Music on the evening of the 22d instant. Efforts are making to get several other rifle clubs to participate. In the forenoon of the same day the Zouaves will parade.

-An investigation into the causes of the recent fire in Legare street and that on board the bark Doffus, was made yesterday by the chiefs of the Fire and Police Departments. The conclusion arrived at was that the former regulted from a defective flue, and that the latter was the result of an unknown cause.

-In the formula of the excellent remedy for neuralgia, recently published in THE NEWS, there was a typographical error. We reprint it, corrected as follows : Albumen of egg, one ounce; rhigoline, four drachms; oll peppermint, two drachms. collodion and chloroform, of each one drachm.

-A white man named Finegan got drunk yesterday afternoon, and became involved in s difficulty, at the corner of King and Went worth streets, with C. F. Lawrence, a colored man, whom he stabbed slightly in the stomsch. Finegau was locked up in the Main Guardhouse. Lawrence walked to the Guardhouse, and aiter preferring charges against Finegan, went away apparently little incon-

venienced by the hurt. -The Confederate Home, Broad street gratefully acknowledges the receipt of a copying press from Mr. Wm. Shepherd; one tierce of rice from an annual contributor; one ton of coal from Mr. E. F. Sweegan; one barrel apples from Captain B. F. Brown, of schooner Myrover; twelve indestructible basins from Mr. W. L. Webb, and also donations of articles for the Christmas tree from Mr. S. Fogartle, Messrs. Von Santen, Kinsman, Fisher, and

In the impersonation moth balloons. It is his purpose to leave New of the peculiar roles of burlesque, it is by no York from Union Square, cross the Atlantic, means easy to do full justice thereto without arriving somewhere on the Continent in two risking offence to the refined; but Mrs. Oates, days and a half. Your correspondent sent his without sacrificing aught of her sprightliness card to the professor's apartments, and was and charming naivete, has thoroughly overcome the difficulty. To-night "Les Bavards," which had a great success in Savannah last

card to the professor's apartments, and was very kindly welcomed by this the most daring and reckless of all moranus. He remarked as he pointed to a seat, "Next summer I shall have something to notice. I shall show the people that it e ocean can be crossed by bal-loon, and that I can do it." Donaidson is a short, thickset man, about thirty-two years of age, dark complexion; dark eyes, black hair, with a gaudy moustache, waxed and twisted in a most NAPOLEONIC MANNER. Janauschek, the queen of English tragedy, supported by her own great star company and Mr. James H. Taylor, pays her second visit to

Charleston next week, and will appear at the NAPOLEONIC MANNER.

Academy on the 21st, 22d, 23d, 24th and 25th He was born in Philadelphia, and was originste. Mary Stuart, Deborah, Chesney Wold, inally a magician. A year ago he conceived the idea of becoming a balloonist. His first ascension was made in Reading last August. East Lynne, and Macbeth will be presented. Last year Janauschek played at Troy, Buffalo, ascension was made in Reading last August. That was the first and only time he ever used a basket. He has made, since then, some twenty-eight ascensions, and every time has used nothing but the gas chamber of the bal-loon and a simple trapeze bar. His operations have been principally throughout the South and Weet. He has, during the year, encoun-tered all sorts of dangers, and the story of his hairbreadth escapes is thrilling and wonder-ful. The gronaut is guite a cheerful person-Louisville, Washington, Cleveland, Albany. Chicago, Indianapolis, Terre Haute, Kansas City, St. Louis, Cincinnati, during a period of three months, and the aggregate amount which she received as her share was \$54,300. At the time these figures were published in was estimated that \$30,000 would be her exful. The æronant is quite a cheerful person peases for the three months in which she age, and having made his visitors comfort-able and contented, he proceeded as follows: realized \$54,300. Deducting this \$30,000 from her receipts, it leaves the neat little profit of HANGING BY THE TOES IN THE CLOUDS.

\$24,300. The above is published by way of "This ballooning is not as dangerous as some imagine. By the use of a basket p are inclined to look upon au ascension novelty to show how she draws. Her last enare inclined to look upon au ascension with much interest and amusement. I ascentained that the time was at hand when some improve-ment ought to be made in æronauting to at-tract the people's attention. I ascended first in a basket, and after ascentaining a few polats I threw aside that part, and since then have never used it. I next ascended dressed as an acrobat, and used nothing but a trapeze har. The people became irightened, and a gagement in Charleston was a perfect ovation; and her Lady Macbeth filled the Academy with the largest audience that has ever been crowded within its walls. It was an evening of exquisite enjoyment, and one which can scarcely ever be forgotten. In Mary Stuart Janauschek is a queen; in Deborah she is the as an across, and used hours out a trapple bar. The people became irightened, and a new interest was awakened in ballooning. At the height of a half mile I always went outcast Jewess; but in both she commands the highest admiration. It is hard to say in which through various performances, such as skin-ning the cal, whiring around, hanging by my drama she excels. In both her genius must ning the cat, whithing around, hauging by my toes, and other evolutions generally done by circus performers on the bar. At Chicago, when three-quarters of a mile high, I hung by the back of my head from the bar. People be acknowledged; and we doubt not that she will on each night of her stay in this city receive as enthusisastic a greeting as she did on the occasion of her first visit to our beautiful call me reckless and crazy, but they forget that I value my life as much as they do, and that I know exactly what I am about. I feel that I know exactly what I am about.

that I know exactly what I am about. I feel just as contented and safe on the bare trapeze oar, suspended from the balloon three miles high, as I do sitting here. I see no danger, and therefore there is no danger to me. -In noticing the admirable pressing done on the cargo of the bark Investigator, for Liv- found not guilty of selling liquor and tobacco erpool, in our lesue of yesterday, the names of the "Charleston Hydraulic Cotton Press" and "Tyler Ootton Press" were omitted. Three hundred and thirty-one bales of the cargo were compressed at the former, and three hundred and sixty at the latter, forming about one-third of the whole, and these presses are entitled to a fair share of the credit for the excellent work done.

THE COMET STAR ENTERTAINMENT.

The fair and grand promenade prize concert of the Comet Star Steam Fire Company opened at the Military Hall last evening under favorable circumstances. The walls and ceiling of the hall were tastefully festooned with parti-colored paper fringe, flags, evergreens and flowers. A large number of attractive booths, bearing lots of nice things, were ranged on either side of the hall. A good band was in attendance and rendered excellent music. The hall was visited during the evening by large numbers. The Comet Star is a large and efficient company, and well deserves to succeed in the enterprise it has undertaken.

PARSON CAIN'S PECULIARITIES.

A Serious Charge. It will be seen by reference to the Inferior Court proceedings, published in THE NEWS this morning, that the grand jury have found a true bill against the Rev. R. H. Cain for obtaining money under false pretences. The charge is founded upon an affidavit made before Trial Justice Levy by Abram Parris, a colored man, to the effect that the Parson induced him to purchase four acres of land in the Village of Lincoln for fifty dollars. The money was paid to the Parson on the first of November, 1871, but Parris has been as yet unable either to get p ssession of the land or his money. The affidavit further states that Parris has reason to believe that the land he was induced to purchase was never owned by Cain.

A FINE SCHOONER.

The schooser Abby K. Bentley, which ar rived here on Friday last, is a new vessel, built in Connecticut of the best live oak, chestnut and hard pine, has been constructed with great care, and has all the qualities of a first-class craft. She is 124 feet keel, 32 feet beam, 10 feet depth, and measures 288 tons. She has fine sailing qualities and is three masted, now the favorite rig for this class of vessels, and in admirably adapted to the Southern trade. She is intended expressly for the New York Commercial Line, of which Mr. E. F. Sweegan, of our city, in agent here, and is commanded by Captain Mehaffy, a popular and experienced officer. Her owners are Messrs. Bentley, Gildersleeve & Co., Captain Mehaffy and

A HANDSOME GIFT .- The Sisters of Mercy return most grateful acknowledgments to Mr. J. H. Devereux for his valuable gift of a beau tiful altar for the chapel of St. Joseph's Academy, Sumter. We have seen this really beautiful altar. Its chaste decorations reflect great credit on Mr. Devereux's taste, and we congratulate the Sisters of St. Joseph's Academy on this handsome donation to their chapel.

to navigate the air from one point to another, it is not necessary to imitate the wings of an insect. Nature has given this as a principle for us to work on, showing us practically that travelling through the air can be accom-plished. If we consider over the wonderni-plished in other there have been made in other mprovements that have been made in other branches of science it becomes a subject of wonderment why it is, with all our aris and iences, that we are beaten and outdone

sciences, that we are beaten and outdone by the common crow. When Fulton built his first steamboat to travel the waters he did not imitate the movements of the fish; the first locomotive did not move on legs, nor did Morse go to the heavens for electricity. Now, if we desire to navigate the air we must not comply too closely with the movements of birds, for there is a fair chance for much im-provement. We see wriat locomotion in its most primitive state when we look at a bird nost primitive state when we look at a bird flying.

THE BIRD MUST BE SURPASSED,

even as the locomotive passes the horse, or electricity the locomotive. The most difficult part of æriai navigation has been discovered, and that is to rise in the air and hang sus-pended between heaven and earth without the direct ald of propelling power. This is nore than the bird can accomplish

more than the bird can accomplish without bringing into play the movements of its wings to propel it through the air. The great trouble i balloonists cannot persuade scientific lights to accompany them to the clouds. If this were not the case we should have wrial ships navigating the air before this. I am going across the ocean in July. I will start in the neighborhood of Union Square, possibly Madi-son Square, New York City. I can travel east at all times, for at a certain height, say two and a hait milles, there is a constant current of air blowing toward the east, I shall ascend to the required alithude and undertake the journey, certain that I shall. The New York Cotton Market. New York, January 10. The Financial Curonicle says: The tendency of the market the past week has been downwards. This is due almost entirely to the uncreased re-cepts. We have frequently pointed out the causes which have been operating since the early part of Novemer to check the free movement of cotion. Liver, ool has not accepted these ex-planations, but has interpreted the decreased weekly arityals as indicating a small crop. The notivity and advance there has reacted on our market, and the result has been a considerable rise in our quotations. Now these conditions ap-pear to be reversing themselves, and consequent: wethin large receipts large crop estimates are pratt so be reversing incomeeves, and consequent-ly, with large receipts large crop estimates are made, and lower prices rule. GUYOT'S TAR CONCENTRATED PROOF LIQUEUR

M^{*} Guyot has succeeded in depriving tar of its insupportable sourness and bitterness, and in rendering it very soluble. Profiting by this happy discovery. he prepares a con-centrated liqueur of tar, which in a small volume contains a large proportion of the setive principle. active principle.

Guyot's tar possesses all the advantages of ordinary tar-water without any of its drawbacks A glass of excellent tar-water without any disagreeable taste may be instantaneousl obtained by pouring a teaspoonful into glass of water.

Any one can thus prepare his glass of tar-water at the moment he requires it, thus economizing time, facilitating carriage and obviating the disagreeable necessity of hand-ling tar ling tar.

Guyot's tar replaces advantageously se-veral more or less inactive ptizans in the treatment of colds, bronchitis, coughs, and catarrhs.
