

ENAMELING THE FACE AND THE RESULT.
 A lady in Louisville paid seventy-five dollars, we are told, for having her face enameled for the ball given at the Galt House to the Grand Duke Alexis. The enamel was warranted to last three days, and so it did. The lady was taken ill upon her return home from the ball, her face became greatly swollen, the most acute pain succeeded, and it was only by the employment of the best medical skill that her life was saved. This statement we have from an undoubted source. But the case of this lady is not so bad as that of another Louisville lady who became enamored of the odious fashion of enameled the face. She visited another lady far to the Eastward some five months ago for the sole purpose of having her face enameled according to the latest Parisian mode. She had heard that a noted Parisian was engaged in the enameled business at the city in question, and to him she went upon her arrival. For the sum of \$500 he agreed to enamel her face so scientifically that the enamel would remain undamaged for three years, and a year or two longer if extra care was taken in washing the face according to his prescribed method. The devotee of fashion concluded the bargain and paid \$300 of the sum named, the balance to be paid in yearly instalments, divided into three years. The lady received the enamel, and returned to her home in this city. Since her return she has disappeared from society. There was so much poison in the enamel that its effects were almost immediately developed in the almost total paralysis of the facial nerves; and, what was once a truly beautiful face, is to-day a distorted, disfigured and ulcerous one. The lady's beauty has disappeared forever, and if her physicians succeed in saving her life, they will have accomplished more than they had a right to hope for. Her eyes are terribly inflamed and disfigured, and the sight of them fast failing.—Louisville Ledger.

A CUREL HOAX.—A London news paper calls attention to an ingenious fraud lately perpetrated in that city. It appears that a canard had been put into circulation to the effect that the penny pieces of 1864, issued by the British mint, by some mistake contained a large quantity of gold. The authors of this statement seemed to have commenced operations by going about to the newspaper boys and flower girls and offering them two pence or three pence for pennies of the above date. The news spread, and these boys and girls, out of their scanty earnings, began buying instead of selling, and the authors of the deception gradually raised the price, and succeeded in disposing of a large number of pennies which they had been for some time accumulating, at prices ranging from six pence to a shilling.

Don't let the moss gather on the roofs of your buildings. It may be ornamental to some eyes, but not very beneficial to shingles. They will rot out fast enough by the moisture it retains; so sprinkle some fine lime upon them just before a rain, and you will be surprised to see how clean it will be taken off.

It is reported that a Boston landlord refrains from collecting rent from one of his tenants for seven years, that he might avoid payment of the income tax thereon, and that by the recent failure of the tenant, he has lost the entire sum, amounting to many thousand dollars.

One of Cromwell's letters is said to furnish the origin of the maxim in regard to the relative power of "sword and pen." In it there is a device of a sword crossing a pen, and underneath the legend: "Two to one the feather beats the iron."

Mexico obtained an independent existence in 1821, and since that time it has had thirty-five presidents and dictators.

WHAT SPRING BRINGS WITH IT.
 Regarded from a medical standpoint, spring is not the delectable season described by vernal poets. On the contrary, its yield of intermittent fevers, bilious attacks, rheumatic pains, disorders of the stomach, nervous complaints and pulmonary diseases, is almost as large as its crop of violets, snowdrops and cherry blossoms. The invisible seeds of innumerable maladies rise with the morning mists, and are scattered broadcast by the vapors of night. Who can resist their mephitic influence? Certainly not the weak by nature, or those whose nervous energies have been overtaxed by mental or physical labor, unless they tone and invigorate their systems, and thus enable them to cope with the unhealthy influences by which they are surrounded.

The only medicinal agent by which this object can be rapidly and safely accomplished, is the great vegetable renovator and invigorant, **HOPKIN'S STOMACH BITTERS.** The operation of this celebrated specific is four-fold. It strengthens the digestive organs, regulates the secretions, improves the condition of the blood, superinduces a regular habit of body, and thereby imparts such vigor and elasticity to the whole physical structure, as to render it capable of resisting the action of the atmosphere in ways, to some extent, impregnable. Here, then, is a ready and certain means of escaping the disorders prevalent at this season, or (if they have already fastened upon the system) of conquering them speedily and thoroughly. The flavor of a medicine is not of much consequence provided it does its work properly, but of Hopkier's Bitters it may be fairly said that they effect a cure without outraging the patient's sense of taste.

Premature Loss of the Hair may be entirely prevented by the use of Burnett's Cocaine. It has never failed to arrest decay, and to promote a healthy and vigorous growth. It is at the same time unrivaled as a dressing for the hair.

Cast Them Out.—If there are any diseases which deserve the name demonic, Dyspepsia is one of them. It racks and tears the system like a veritable fiend, and renders life a burden. The morose and the despondent will not expel it. Cast it out with Dr. Walker's Vegetable Vegetable Bitters. There is no term of indigestion or liver complaint that can withstand this potent tonic and alterative.
