"Were any frozen here?" I asked. "Two," she replied. "Right there, (pointing out of the first window, about a hundred vards from the house, we found the body of Mr. Christopheron after the storm."

"So near this house?" "Yes, right there, with houses all around them. But the storm was so blinding, the air so full of snow, that a man could not see more than ten feet. He had come in that morning with a load of wood, bringing his two children. When the storm approached, he started back, although begged not to do so, leaving his children. He never reached his Lome, although he lived out but a mile. All we know is that his dead body was found right out there after the storm. Mr. Norris saw an object moving about on the snow, which he thought was a wolf, and started out with his gun to shoot it. Cletting closer, he saw it was a dog, and near it the body of a had intended to pitch into the Pope frozen man. The faithful dog had after his accustomed manner; but how stayed with the body of his master for could he, now that the poor Pope had four days, through all the storm, and had stepped out? So he softened down his fast as it fell. The poor man had got lost, and wandered about, no telling where, until at last he died right in town, and did not know it. His oxen were found imbedded in a snow drift, nothing but their heads protruding. They were not dead, but died afterwards. The chain was carefully wrapped around the yoke. Mr. Christopherson had if it is a fact, should rouse the bump of when he found that he was lost.

"The other case was that of Mr. James Berry, who lived six miles of here. He had entered a farm, and was preparing a home for his widowed mother, who lives in Ohio. He lived in a cabin on his claim with another young man. He was at a neighbor's house, half a mile away, grinding his axe, when the storm came, They begged him to stay, but he laughed and said he was not afraid of that storm. He has never been seen since, either dead or alive. What is strange about it is, that his path lay along the timber, where the force of the wind was broken. But he died, and his body will likely not be found till spring. No telling how far he wandered, or how long he lived.'

In every County I hear some dreadful tale of death by the storm, although it has been said that only two were frezen on the line of the Northern Pacific. The storm was as furious here as at any other point, and those who were exposed to it died.
That is all. Not until spring comes and
the snow melts, will the death roll be
fully made out. And perhaps not then. I hear of deaths along the stage road leading into British America. I hear of them all around. Death rode on the gale

RAILROAD IRON MANUFACTURE. Eighteen years ago, (1854,) the annual consumption of railway bars in the United States was 447,658 tons, of which 339,439 tons were imported, and 108,016 tons only were manufactured here. It will be seen by these figures that of the total American consumption of railway bars at that time, less than one, third was of American manufacture, and more than two thirds was imported, Since that time there have been vast changes, both in the amount consumed and in the proportions of domestic and loreign manufacture. The figures for 1872, show a consumption of railway hars in the United States amounting to ,504,591 tons, of which 975,000 tons were manufactured in this country, and 529,591 tons were imported. The old conditions are reversed, about two-thirds of our railway bars being made in our own country, and about one third being of foreign manufacture.

To Liquor Dealers.
CHARLOTTE, N. C., February 28, 1873.

HAVING learned that sundry parties are selling an inferior quality of CORN WHISKEY in south Carolina and Georgia, representing it as my make. this is to certify that Mesers. W. H. H. Houston & Co., of this city, have the exclusive control of all my whiskey, and I sell none except through them. U. & W. H. MOTZ.
Attest: W. S. Piarson, United States Gauger for Mots's Distillery.

General Traveling Agent for W. H. H. Houston & Co.
