THE FOLLOWING CORRECT and intelligent article is from the Boston Post, of the 7th instant:

"There are rumors that the so-called Ku Klux of the Southern States, in which category are included all the original citizens—without regard to age or sex, who are unable to acknowledge carpet-bag governments, monstrous State debts and ruinous taxation unalloyed blessings, are to enjoy a surcease of prosecution. There are more than 1,000 cases now pending in the United States Courts against persons indicted for violating the Enforcement Act and similar offences; but the Attorney-General gives notice that further proceedings will be suspended if everything continues quiet. This evidently indicates that the bloody chasm can be bridged for a time, and even the Administration can hardly afford to wantonly pursue a course of rank injustice where no political capital can result from it. As a campaign string the Ku Klux agitation was vigorously pulled, and no matter how heavily or indiscriminately its hardships might fall, there was no interruption of the remorseless policy. But it has now done its work and the machinery may rest until a new shibboleth is wanted to make terrified countrymen fear for their safety and vote against the threatened wrath to come. Justice, however, will be only half done by stopping the wicked persecutions that have been conducted for so long and are still in a condition to be resumed at any time. The Albany penitentiary contains men who should receive the President's attention immediately. Ku Klux can hardly be less worthy of mercy than repeaters and murderers, and while Gen. Grant was so near, looking after the interests of New York, it would have been easy as well as commendable for him to pass on to Albany and deliver the passports of freedom to men who have never deserved anything else."

THE LAVA BEDS.—Mr. Jesse Applegate, one of the Indian Commissioners, gives the following graphic description of the "lava beds," which figure so extensively since the beginning of the Modoc troubles:

"The strong-hold of the Modoc Indians is a 'predeal' (an irregular volcanic surface) of the most extensive and elaborate description. It occupies, with but few intervals, 100 square miles. If you can, imagine a smooth, solid sheet of granite ten miles square and 500 feet thick, covering resistless mines of gunpowder scattered at irregular intervals under it; that these mines are exploded simultaneously, rending the whole field into rectangular masses, from the size of a match-box to that of a church, heaping these masses high in some places and leaving deep chasms in others. Following the explosion, the whole thing is placed in one of Vulcan's crucibles and heated up to a point when the whole begins to fuse and run together, and then suffered to cool. The roughness of the upper surface remains as the explosion left it, while all below is honey-combed by the cracks and crevices caused by the cooling of the melted rock. An Indian can, from the top of one of these stone pyramids, shoot a man without exposing even a square inch of himself. He can, with due haste, load and shoot a common muzzle-loading rifle ten times before a man can scramble over the rocks and chasms between the slain and the slayer. If, at this terrible expense of life, a force dislodges him from his cove, he has only to drop into and follow some subterranean passage, with which he is familiar, to gain another ambush, from whence it will cost ten more lives to dislodge him, and so on ad infinitum."

THE MANUFACTURE OF ICE has commenced in Augusta, Ga. The ice is manufactured from the river water, completely purified by double distillation. Water for cooling purposes can be obtained, however, from wells dug on the premises of the company. A new and larger ice machine has just been erected by the company, and artificial ice to the extent of ten tons a day, if necessary, can be manufactured. This new industry, the patent for which is of French origin, appears at last to have a fair prospect of success at Augusta and New Orleans.

A FATALITY IN NILES.—The Charleston Courier relates the case of three fine ocean steamers that have been built and named after three great oceans, which have all been unfortunate, and have all been the coffins of an hundred souls and more, viz: The Arctic, the Pacific and the Atlantic. The Arctic came in collision with the French steamer Vesta, on the Newfoundland coast, and sunk, causing a loss of 250 lives. The Pacific, with a large number of passengers, was never heard of after she left Liverpool. She doubtless foundered and went down with all on board. The sad fate of the Atlantic, with its awful destruction of 500 or 600 lives, is still the engrossing topic of public interest. The god Neptune, like the God of the Hebrews, seems to frown upon having any graven image to commemorate his majesty and power.

VIRUS IN THE AIR.—We know that a peculiar poison is evolved from marshy ground and from the decomposing filth of cities by the sunshine of spring, and that this element which is too subtle to be detected by scientific analysis, produces epidemic and endemic fevers, aggravates dyspepsia and all bilious disorders, disturbs the bowels, relaxes the nerves and debilitates the general system. Luckily an antidote to this atmospheric virus, and a specific for the diseases it generates, has been provided. For a period of more than twenty years Hostetter's Stomach Bitters, a medicine in which the finest vegetable tonics and alteratives are combined with a perfectly pure stimulant, has taken precedence of every other preparation, as a specific for the ailments most prevalent at this season of the year. It is agreeable as well as effectual, and eminently safe and wholesome. Ap20+3t1

VITAL STATISTICS recently published in Europe go to confirm the received opinion that the duration of human life is longer than in past centuries. In the city of Geneva, Switzerland, registers have been kept of the yearly average of human life since 1590. In that year it was twenty-two years six months. At present it is over forty years. The tables compiled by life assurance companies in England, and adopted in this country, show a similar result. In the fourteenth century, the average annual mortality in the city of Paris was one in sixteen. It is now about one in thirty-two. In all England in 1690 the rate of mortality was one in thirty-three. Now it is about one in forty-two.

DESERTER ARRESTED.—Detective J. A. Canton, of the United States Service, came to this city yesterday, from Columbia, S. C., and with the assistance of the police arrested a man named Schneider, the driver of a straggle, No. 3, as a deserter from Company H, 18th United States Infantry. Schneider deserted last July. He is also charged, we understand, with having killed a man in South Carolina. He was delivered to the commandant at the Arsenal.

PROPOSED COMPROMISE WITH CUBA.—A report was circulated in New York on Tuesday, that the new Captain-General of Cuba will endeavor to effect a compromise with the Cuban patriots, and that he had been empowered by the authorities at Madrid to restore to the widows and orphans of Cuban patriots the property seized from the former on account of their relatives taking up arms against the Spanish Government.

AT A MEETING of the directors of the Chester and Cheraw Railroad Company, held in Lancaster on Tuesday last, the following officers were elected: President—J. A. Hasselline. Directors—Lancaster—W. Stevens, W. A. Moore, J. B. Irwin; Chester—A. H. Davega, H. Hoffat, Col. Wilson; Chesterfield—C. F. Maloy, W. A. Evans, Miller. Secretary and Treasurer—B. J. Witherspoon.

AMONG THE EASTER offerings this year, that of Christ Church, Baltimore, on St. Paul and Chase streets, stands pre-eminent. The church was in debt to its building fund \$50,000, all of which sum, covering the entire debt and interest, was generously made up from voluntary contributions by members of the church. The new Christ Church is thus fairly started on its good work completely unencumbered.

YET ANOTHER loophole of escape for murderers has been found out. The latest "dodge" is to do the deed while asleep. A boy has been killed in Camden, N. H., and a youth is suspected of the deed who has been in the habit of walking in his sleep, armed with dangerous weapons. The plea of somnambulism will be added to the long list of "defences."

DEATH OF MR JAMES H. STEWART.—It is with regret that we announce the death of this gentleman, which took place at the residence of Dr. A. McLeod, in this County, on the 2d instant. He had suffered with a carbuncle on the neck for several weeks, but was not considered in a dangerous condition until a few days before his death.

THE DETROIT Free Press serves up another boy in this style: "Got any medicine?" asked a boy entering a Woodward Avenue drug store. "Yes, lots of it—what do you want?" inquired the clerk. "Oh, it don't make any difference so it's lively. Dad's fearfully bad." "What ails him?" asked the clerk. "Dunno," replied the boy, "but he's run down awful. He just sits under the stove all day and mopes, and he hain't wholoped mother since Christmas. I guess he's going to die."

POETRY AND FACT.—"Oh, that this too, too solid flesh would melt," sighed Jones the other morning, as he wrestled with his beef-steak, "thaw, and resolve itself into a dew." "And so it might, Mr. Jones," snapped Mrs. Ologger, "if there was not so much due from some of my boarders whom I might name." Jones did not reply, but continued to ruminate upon the stale, flat and unprofitable uses of this world.

THE BOSTON Transcript, a Republican journal, throws its soul into the following poetical sentiment, so characteristic of that ancient sheet: "There was once a man, his name was Schuyler, and he scalded himself in the Credit Mobilier; he floundered about, but couldn't get out, and that was the last of our virtuous smiler."

AT AN ELECTION for Intendant and seven Wardens for the town of Mount Pleasant, held on the 16th instant, the following were elected: Intendant—H. L. P. McCormick. Wardens—H. S. Tew, B. H. Bequest, Peter Weinheimer, John Weitschen, Abraham Smith, Charles F. North, Fred. Robinson.
