LONDON, August 26.—The prosecution closed the case against the Bank of England forgers, and the defence have opened. This morning, in the absence of counsel for the accused, George Bidwell, the principal in the frauds, himself began the cross-examination of witnesses for the Crown.

LONDON, August 26.—Morsell, Postmaster-General, tendered his resignation, but at the solicitation of Gladstone, consented to remain in office temporarily.

MADRID, August 26.—On Sunday, there was a severe engagement near the town of Estella, between 5,000 Government troops and 3,000 Carlists, under Olio. The Carlists were defeated and Olio wounded.

LONDON, August 25.—Some interesting Shakespearean documents have been discovered, which contradict the recent theories touching Shakespeare's business connection with the theatre.

The Times, of this morning, says the British Government, at the request of Germany, has sent orders to the commander of the British squadron in the Mediterranean to deliver to the Republican authorities the Spanish steamers Alamanza and Victoria, but that the inferior force under command of Admiral Lobos, renders the recapture of the vessels by the insurgents highly probable, if they are surrendered.

A special despatch to the Telegraph says cholera is raging in Hungary, and that fifty per cent. of the cases prove fatal.

At a demonstration of trades unionists, at Edinburgh, Saturday, there were 15,000 men in procession. The object of the demonstration was to protest against the criminal law amendment.

The storm of Sunday and Sunday night was one of unprecedented severity. Accounts from Cambridge, Peterborough, Wisbeach, Newark and other towns represent that the wind and lightning were appalling. Thousands of people refused to go to bed, lest their houses should be overwhelmed while they slept. A number of fires were kindled by the lightning, and many deaths are reported. Childery Hall, at Cambridge, historically connected with the reign of Charles I, was struck by lightning and burned to the ground.

MADRID, August 25.—In the Cortes, to-day, Senor Olave demanded the prosecution of Hidalgo, on the charge of having abandoned his post as captain of the iron-clad Victoria. He inquired of the Ministers whether the report that he (Hidalgo) was going to Washington on a mission to the United States Government was correct. In consequence of Olave's action, a duel with Hidalgo was imminent, but through the interference of friends, the meeting has been avoided.

Rear Admiral Almy has been ordered to the command of the South Atlantic station. The United States flagship Wabash, Rear Admiral Case, left Corfu August 5, for Carthage and other ports on the coast of Spain.

A Carlist force has entered the town of Fraga, in Arragon.

A caucus of a majority of the Cortes have decided to elect Senor Castellar President of the body, and Senor Frey Vice-President.

Further details of the battle near Estell, on Sunday, are to the effect that the Carlists, who were in large force, and under their favorite leaders, were completely defeated by the Republican troops. They asked a truce to remove their dead and wounded, which was granted. The remains of the Carlist army retired towards the French frontier. Don Alfonso, brother of Don Carlos, and Gen. Teristoury are among the wounded.

The Carlists have withdrawn from the neighborhood of Berge, having apparently abandoned the idea of its reduction.

The fleet under the command of Admiral Lobos, which commenced to bombard Carthage, has been compelled to withdraw out of range of the guns of the insurgents, on account of the inferior armament of the vessels. They cannot cope with the artillery of the forts.

LONDON, August 25.—The expedition which is laying a cable between this city and Rio Janeiro, after having proceeded 383 knots, was stopped by the discovery of a fault in the wire. Tests have been made from which it is believed the fault is near the land. The expedition will continue paying out until it reaches Madeira, whence the cable steamer will probably return to repair the fault.

VIENNA, August 25.—Of the 30,000 medals awarded the exhibitors at the exposition, 400 go to America. There is much dissatisfaction with the results of the exposition. It is charged that a number of articles which were never entered for competition received medals, and that several firms which had none of their goods on exhibition were awarded diplomas, through manipulations of the judges. It is alleged that those who knew how the prizes were secured will attach no value to the medals of the Vienna Exposition. The quantity of the goods and specimens, which will be returned home from the American department, is very small. Most of the stuff will be sold here. The exhibitors have been leaving in crowds as fast as they could get away since the close of the exposition.

Hoar is Chairman, will to-morrow publish an address to the Republicans of Massachusetts, urging upon them the importance of attending a primary meeting to be called to choose delegates to the State Convention, and of securing through them an honest representation of the Republican sentiment of the Commonwealth. The address will support Washburne for re-election, and denounce the course of Butler.

LITTLE ROCK, August 25.—General Bishop has just returned from Perry County. He reports that Morse is near Perryville, with about thirty men. General Bishop made a speech to the people, telling them that Hambricht, the Sheriff, should make all the arrests. While speaking, however, the Sheriff left the crowd and was seen no more. The people are very well disposed if the Sheriff would do his duty. The General recommends the organization of militia in that County, and to-night the Governor commissioned officers for three companies. More trouble is apprehended.

MARSHALL, TEXAS, August 25.—Last night, about 7 o'clock, a construction train, laden with ties, forwarded by Dewey & Co., penitentiary leesees, ran off the track a mile and a half West of Gladewater Station, throwing seven cars down an embankment, killing the conductor, Mr. Kendall, of Council Bluffs, Iowa, and seriously injuring many others. The other was dragged till the train was stopped. The engineer, John Day, stopped the train as soon as possible, and got off the engine to see what was done. In passing in front of the locomotive, he saw it covered with blood and brains, and was so overcome by the shock, that he walked but a few steps, when he fell. He was carried into a smoking car, and died in a few minutes.

HALIFAX, N. S., August 26.—A severe storm passed over this city Saturday night and Sunday morning, doing considerable damage. The gale was the heaviest experienced here in many years. Most of the shipping in the port was prepared for the gale and rode it out. Several small yachts were smashed at anchor. The United States frigate Powhatan dragged from her anchorage off the Cunard wharf, and drifted to the Ordnance wharf, where she was secured. Steam was kept up all day Sunday in readiness for any emergency. The particulars of the effects of the storms have not come in, but it is feared there will be bad news from the country and sea coast. The steamship Herbernear arrived from England and Newfoundland Saturday night, and brought Miss Bird and a party of destitute English children—fifty girls and fifty boys. The ship St. Louis, Captain Pearce, from Liverpool for Philadelphia, struck on Jib Lock off Cape Pine in a dense fog on Sunday, the 10th, and sunk. General Myers, chief signal officer,

sailed August 23, under orders from the War Department, on a rapid trip to Vienna, to attend a meeting of the chiefs of meteorological services at that place. The General hopes to see this convention take the first steps to bring about a world-wide system of weather reports, connecting the United States and Europe. During his absence, the signal office will be in charge of Col. Garrick Mallory.

SAN FRANCISCO, August 26.—Orin Duboise, a resident of San Jose, in this State, had in his employ a young Chinaman cook. Yesterday, he gave the picture back to her, and in the same instant fired three shots at her from a revolver. Her steel corsets turned the bullets, and she escaped. The Chinaman then blew his own brains out.

NEW YORK, August 26.—235 ancient and twelve out diamonds from the South African fields, valued at \$30,000, were seized by the Custom House officials on the person of N. A ROMANTIC STORY.—The following story is told by the Galveston (Texas) Commercial, of a man who was sent to the penitentiary of that State a week ago: "He is a German of noble birth. His uncles and brothers distinguished themselves in the late Franco-German war; they were high in rank, and live in princely pomp. Yet this brother, perhaps of morals as good as the best of his family, will for two years live in the Texas Penitentiary. This young man seems to have been the favorite of his mother, but the hatred of his father. He was sent to the first schools of Germany, and is proficient in ancient and modern languages; but he was allowed to spend money at random, being taught nothing that is useful. When of age, he was given a few thousands and sent to this country. Here we may premise, that while the young man is neither crazed nor a fool, he does lack that which is called gumption. He married a woman, who, after a season, deserted him. From the time of his desertion, he became a wanderer. Being sick, he returned to Germany, and was sent by his family to the most celebrated springs in Germany, and when he was fully restored, they returned him to this country, with sufficient to have established him in a small business, but he wasted all—and it is strange that he did so, for he does not appear to be addicted to any of the money-eating vices. Reduced to beggary, he walked from Mobile to New York, hunting employment. Then he got back to Galveston. Here he acted as scullion in a fourth rate boarding house, waiting on the table and cleaning knives. While engaged in this work, he stole two watches, worth \$7, and on being charged with it, he confessed the offense, and begged the recorder to send him to the penitentiary, that he might learn a trade and be able to support himself. He told the recorder, that if he was not sent to the penitentiary, where he could learn a trade, he would go out and commit some crime that would send him there. He was the most anxious man to get in jail we ever saw. We hope that his residence at Huntsville will be productive of all that good he anticipates from it, and that when he leaves it, he will be a self-supporting, respectable citizen."

The man who walks the streets recognizing the excellences of other men and honoring them, will find his fellows conceding and esteeming his own virtues. He who gives helping sympathy, abundantly and warmly, to the suffering and sad, will himself have help and sympathy, abundant and warm, when he suffers and is sad.

A correspondent of the New York Graphic, speculating on the probable causes of paralysis, says that there is one prolific source of it, which but few have any knowledge of. It is water impregnated with the quality of leadon pipes through which so much of it in this and other cities is conveyed. He says that when chewing tobacco was first put up in lead foil, without a paper lining, how many, even young persons, were complaining of occasional numbness in their arms, especially after having lain on them awhile in bed. The correspondent of the Graphic adds, that he has had the same experience himself, and has it now sometimes after accidentally drinking water contained for a time in lead pipe. The only and best remedy in such cases is sweet milk and loaf sugar as sweet as it can be made. This effectually neutralizes the poison.

FINED \$1,000 FOR GETTING MARRIED. Miscegenation is not encouraged in Indiana. Nicholas Keiger, of Jeffersonville, has been sentenced by the Clark County Criminal Court to pay a fine of \$1,000 and suffer one year's imprisonment in the penitentiary, for marrying a white woman.

AMONG late improvements in the manufacture of FLOUR, by far the most important is the recently discovered method of PUFFING MIDDLINGS. This wonderful invention is destined to revolutionize the entire Milling system in this country. By a more thorough separation is effected between the outer husk and the farinaceous portion of the grain, and a Flour is produced of greater and more uniform purity and sweetness than can be made in the old style, and with no increase in cost. We have, at heavy expense, introduced this "NEW PUFF-CRESS" into our Mill, and are prepared to offer Flour greatly improved in color and quality over corresponding grades made in the usual method. Liberal deductions made on car-load lots. Aug 26 3mo STOVALL & HULL.
