

London, September 18.—Earl Hardwicke has been elected to the office of Lord Chancellor of Great Britain.

PARIS, September 18.—The King of Italy has arrived. He was cordially received by the Emperor and the population.

MADRID, September 18.—A minority of the Cortes oppose a recess until the Constitution is adopted. The police have seized the Carlist newspapers circulating here.

LONDON, September 18.—A heavy gale prevailed around the British coast yesterday. Disasters are apprehended.

NEW ORLEANS, September 17.—The Cotton Exchange Committee on Information and Statistics, under date of the 15th instant, make the following report, condensed from letters received from August 31 to September 12:

In answer to our interrogatories sent out during the month of August, Mississippi sends fifty-four answers, from thirty-nine Counties. The reports are very conflicting in regard to the weather—some complaining of too much and some of too little rain. The caterpillars and boll worms have nearly everywhere appeared, and while they have done but little damage on some plantations, on others they have out short the prospects very considerably. Great fear is expressed that the crop will be entirely lost, especially where the plant is backward. Complaints of rot and rust are likewise serious. The yield will hardly compare with last year's, and with uncertain weather and further deprivations from worms, the result will be materially contracted. In Louisiana, we received thirty answers, thirteen of which report too much rain, and nine dry and more favorable weather. The caterpillars, which are reported in great numbers throughout the State, have already done considerable damage, and still continue their devastations. Rot and rust have also injured the crop to some extent, especially in those parishes reporting rainy weather. Picking has generally commenced, and one parish reports a greater yield than last year, while the balance report shorter crops. Fifty letters have been received from forty-eight Counties in Texas. The general character of the weather has been favorable since last report. Most of the complaints are from the Counties bordering on the Gulf. We have much complaint of damage by any or boll worms, but little from rot or rust. Thirty-one letters have been received from twenty-four Counties in Tennessee. The weather in this State was generally warm and dry, and its effects are represented as rather favorable. No worms, rust or rot are complained of. The only cause of dissatisfaction is the shedding on the ground of bolls and forms, reducing the prospects for the top crop. Picking has commenced, and will be general about the 20th instant. The yield will be about equal to that of last year. The majority of our correspondents seem inclined to think favorably of the yield, although our reports are rather conflicting. We have fifty-two letters from forty Counties in North Carolina. All but three complain of excessive rains, causing the plant to shed badly; no complaints of worms, but considerable damage from rust. Picking will be general by the 25th instant. With frost at the usual time, the yield will be somewhat less than last year. From South Carolina, seven Counties send in twenty-one letters. The weather, since our last report, has been exceedingly wet, and complaints are universal of shedding and rust having injured the plant materially. Worms, also, are reported in most cases heard from, but without doing much serious injury so far. Picking has generally begun, and will be under full headway at the date on which we write. The probable yield per acre, compared with that of last season, and frost occurring at the usual time, is variously estimated, but the majority of opinions indicate a material reduction on last year's figures. Eighty letters are received from sixty-one Counties in Georgia. The weather has been precarious. In some sections, complaint is made of drought, which stopped the growth of the plant and caused premature opening of the bolls, while in three districts excessive rains promoted the growth of weeds and caused the young bolls to fall off, and at the same time favored the worm. Rust seems also to be quite general, but no alarming results have followed. Picking has commenced everywhere, and must be progressing rapidly. The prospects for a full yield are not as flattering as they were a month ago, and with frost at the usual time, the product per acre must fall somewhat below that of last season. Reports have been received from only three Counties in Florida. Army and boll worms, as well as rust and rot, have done some damage. Picking has generally commenced, and with favorable weather, the yield is likely to exceed that of last season.

RICHMOND, Va., September 17.—The American Pharmaceutical Association, to-day, elected the following officers for the ensuing year: John F. Hancock, of Baltimore, President; William Saunders, of London, Ontario, John T. Buck, of Jackson, Miss., and Paul Bailiff, of New York, Vice-Presidents; Charles A. Taft, of Dover, N. H., Treasurer; John M. Maisch, of Philadelphia, permanent Secretary. Executive Committee—Thomas O. Wiegans, Philadelphia; Governor Heiss, Lawrence, Kansas; Charles Tiberia, Philadelphia; N. J. Menninger, North Carolina; and John M. Maisch, Philadelphia. Professor Elbert, the retiring President, presented to the association \$500, the annual interest whereof to be appropriated for a prize for the best essay, investigation of a medicinal substance, determining new properties, or for improved methods of determining merit for the preparation of chemical or pharmaceutical

products. Mr. C. Lewis Dahl was appointed to prepare a report on the progress of the industry. The business of Jay Cooke, McAllister & Co., in London, is entirely broken, and that house is perfectly solvent, so that it will meet all its outstanding drafts and letters of credit, without inconvenience to travelers, and have a large cash surplus to apply to the American house. The firm of Jay Cooke & Co. and its members have a large amount of real and personal property, upon which, however, they cannot immediately realize. They are confident their depositors will be paid in full.

All reports about suspensions of firms, excepting Jay Cooke & Co., Richard Sobell, and the small firm of Robinson, Suedan & Co., upon investigation, has proved to be without foundation. When this fact was made known on the street, confidence was again restored, and at the close of business, a stronger feeling prevailed. It is not thought that any other firms of prominence will succumb.

BALTIMORE, September 18.—The Grand Lodge of Odd Fellows of the United States meet next year in Atlanta, Georgia.

Telegraphic—Commercial Reports.

COLUMBIA, S. C., September 19.—Sales of cotton yesterday 50 bales—middling 17c.

I. P. STOVALL. G. O. HULL. Flour Made by the New Process. STOVALL & HULL, Proprietors of Stovall's Excelsior Mills, 253 BROAD STREET, AUGUSTA, GA. AMONG late improvements in the manufacture of FLOUR, by far the most important is the recently discovered method of PURIFYING MILLINGS. This wonderful invention is destined to revolutionize the entire Milling system in this country. By it a more thorough separation is effected between the outer husk and the farinaceous portion of the grain, and a flour is produced of greater and more uniform purity and sweetness than can be made in the old style, and with no increase in cost. We have, at heavy expense, introduced this "NEW PROCESS" into our Mill, and are prepared to offer Flour greatly improved in color and quality over corresponding grades made in the usual method. Liberal deductions made on car-load lots. Aug 26 3mo STOVALL & HULL.

SENECA CITY. A SECOND Auction Sale of LOTS here will commence on WEDNESDAY, OCTOBER 1, 1873. And continue until all the lots shall have been sold which may be wanted. We propose at this sale to offer a few twenty-acre tracts of woodland adjoining the town. For former statements, as to the delightful salubrity of the climate, goodness of the water, and innumerable advantages of the place, located at it is in a section of the country where every thing known to the temperate zone may be grown; abounding in minerals and dotted with numerous and superior water powers, available the year round, as also as to the excellent moral character of our people, will be remembered. Terms—One-third (or more, at the option of the purchaser) in cash; balance 1st December and 1st April next, in equal installments, secured by notes and mortgages. J. J. NORBON, A. W. THOMPSON. Sept 14 14 New Auction and Commission House. THE undersigned have again associated themselves under the old firm name of H. & S. BEARD, for the purpose of transacting BUSINESS in the city of Columbia, and have purchased from Mr. Thomas Steen his interest in that business. The business will be continued in the store formerly occupied by Mr. Steen, on Main street. Any interests entrusted to their care will be faithfully and promptly attended to. Assignments of all kinds solicited. HENRY BEARD, SAMUEL BEARD. COLUMBIA, September 11, 1873. Having disposed of my Auction and Commission Business to Messrs. H. & S. D. GAMBRIEL, Broker, Main street, Aug 10 2mo 24 door South Wheeler House.

I. P. STOVALL. G. O. HULL. Flour Made by the New Process. STOVALL & HULL, Proprietors of Stovall's Excelsior Mills, 253 BROAD STREET, AUGUSTA, GA. AMONG late improvements in the manufacture of FLOUR, by far the most important is the recently discovered method of PURIFYING MILLINGS. This wonderful invention is destined to revolutionize the entire Milling system in this country. By it a more thorough separation is effected between the outer husk and the farinaceous portion of the grain, and a flour is produced of greater and more uniform purity and sweetness than can be made in the old style, and with no increase in cost. We have, at heavy expense, introduced this "NEW PROCESS" into our Mill, and are prepared to offer Flour greatly improved in color and quality over corresponding grades made in the usual method. Liberal deductions made on car-load lots. Aug 26 3mo STOVALL & HULL.
