WARHINGTON, December 14 -There is at present a general indisposition among the members of Congress to increase taxation. It will not be done unless the necessity can be clearly shown. The recommendation of the Secretary of the Treasury, in the recent letter to Representative Dawes, will be discussed by the Committee of Ways and Means at their meeting to-morrow. Several members of that committee said to-day, there would be no hasty action upon the subject. The Treasury Department is somewhat pressed for money, not only by the falling off in the revenues, but by the extraordinary appropriations of \$4,000,000 or \$5,000,000 for naval purposes, and the early approach of the re-demption of the \$20,000,000 loan of 1858, a bill in relation to which is now pending between the two houses of Con-Over two thirds of this loan are in coupon bonds, which some of the holders are dosirous of exchanging for five per cent, bonds of the funded loan.

Secretary Richardson, in his letter to Representative Dawes, reiterates his previously expressed views, that it is better to obtain the necessary money by taxation than by an increase of the public debt. He says he selected tea and coffee, as the public would feel the tariff on these articles less than on any others, and is to the rates of taxation pertaining to the Internal Revenue Bureau, the money could be collected without additional expense to the Government. The Secretary, to day, after the necessary examination, ascertained that the public debt has increased since the 1st instant \$5,000,000.

There was a long debate in the House on a proposition from the Committee Ways and Means and of Appropriation to refer back the annual estimates to the heads of departments, for the purpose of having them reduced; the object being to avoid, if possible, the necessity of having to meet the esti-mated deficit of \$42,000,000, by imposing a daty on tea and coffee, and increasing the taxation on whiskey, to-bacco and other articles. The party of inflationists was beaded by Butler, of Massachusetts, who favored the issue of convertible bonds to meet the deficit. In the present excited state of the advertising mania, we scarcely know how to address our friebds. "Unprecedented Rushes," Enormous Increase of Biz," ad captandum cigar puffs, a liberal profusion of superlatives, together with the quietly-whispered-in-your-ear assurance that it is astonishing how the young men stand up to the grave demands upon their physical endurance—really haveleft our modest style in the shade. We have, however, no desire or love for the sensational. "Water always finds its level," and purchasers of 10 cent hams and cooking butter vamped under the name of "Gilt Edge," soon find their way back to where good goods only are kept; and where where good goods only are kept; and where no promises are made which are not meant to be performed. Our stock is full, our busi-ness !air, (not unprecedented.) terms are cash, and our goods are up to the standard we have always maintained. We can promise no more. Verbum sap. GEO. SYMMERS.
