WASHINGTON, April 13 - The official organ contains an elaborate editorial, declaring the present time opportune and gives reasons for the immediate re-cognition of the Ouban republic. The article contains citations from international law writers, showing no just cause of offence to Spain, if recognition is accorded and commercial treaties entered into with the republic, prior to re-cognition by Spain. It declares our commercial interests are greatly suffer-ing by the war in Cuba. The balance of trade is against us \$10,000,000 to \$50,000,000; that complications heretofore existing no longer exist, and that England intrigues for the control of Ouban affairs and trade; that recognition would open new markets for Western grain growers, provision dealers, machinists and manufacturers; the East-ern Middle States furnish occupation to thousands of Southern people, and tend to restore prosperity and good feeling in the Southern States towards the Government. The article is supposed to express President Graut's views, and foreshadows action by the Government.
