REMARKABLE INVENTION. - The Philadelphia correspondent of the New York Graphic describes an invention of John W. Keeley, of Master street, which is intended to supersede steam. By the use of two gallons of water, he By the use of two gallons of water, he claims to be able to run a train from Philadelphia to San Francisco and back. The secret is known only to the inventor, who states that his simple process will create a pressure of 6,000 pounds to the square inch, that of steam being only about 30 to 200 pounds. A model for the patent office is being finished. Many prominent men in New York and Worcester, Massachusetts, are reported to have advanced money for its ported to have advanced money for its completion, on condition of receiving the exclusive right of its disposal in certain localities. The water is used over and over again, and no fuel, che-micals, electricity or magnetic currents are used. On the 10th ultimo a successful and astonishing test was made in the presence of three experts, pledged to secrecy. The machine is locked up, and even its shape is concealed. It holds about fourteen gallons of water. In working it the water was taken from water was taken from a common bydrant near by.

Another "orquel war" will soon be declared. Grant and Butler, it is said, are now at sword's points. Print that book, Benjamin, that book on Grant which was held back in 1868. It will never sell better than now.

Seegers' vs. Cincinnati Beer.

The Cincinnati Gozette makes the astonishing announcement that Cincinnati Beer is no longer pure, but adulterated with molasses, sugar of staroh, fusel oil and the poisonous colchicum. The Commissioner of Agriculture, in his report for 1865, says that Prof. Mapes, of New York, analyzed the beer from a dozen different breweries, and found all of it adulterated. Cocculus Indicus and nux vomics entered largely into its composition.

J. C. SFEGERS guarantees his beer to be pure and reliable. He does not adulterate it, but brews from the best barley, malt and hope.
