NEW YORK, February 5.-Blanton Duncan has addressed a card to the editor of the Sun, in which he explains his connection with the Memphis and El Paso Railroad. He says he was retained by that corporation in December, 1868, for general service in advising and otherwise siding in construct-ing the road, and he adds: "I labored in good faith to secure the completion of an enterprise which, in my judg-ment, was to be of vast benefit to North and South alike: I paid my own expenses and gave nearly a year's continuous and steady work, until the conclusion was forced upon me that there had been frauds of such a character that I could no longer permit my name to remain connected with it. and to this day I have never received reimbursement for my expenditures, nor a cent for by services." WASHINGTON, February 6.-De-

spatches from New Orleans to the New York Times and Herald report a compromise, which was adopted by the Conservatives-39 to 27. It involves the recognition of the Kellogg Government, reseating five expelled by the military from the lower House. AN INVALUABLE TRAVELING COM-PANION. - Change of climate, water or diet is apt to induce harrassing and often dangerous diseases. The three ohanges combined are fatal to thonsands of emigrants every year. Is it not, then, of the last importance to know that Hostetter's Stomach Bitters are an absolute preventive of the hurtful consequences arising from these causes? Travelers, voyagers, and emigrants to new countries cannot be too often reminded of the fact, that this agreeable vegetable tonic is the most reliable safe guard against disorders to which they are far more liable than the habitual denizens of healthy regions. The primal effect of the unwholesome atmosphere which produces what are called malarious fevers, is to depress and debilitate the system. The body, then, becomes an easy prey to the maliguant principle in the air. It is manifest, therefore, that the surest way to avoid all epidemic and endemic maladies of an intermittent type, is to counteract the weakening tendencies of miasma by artificial invigoration. That Hostetter's Stomach Bitters is thej surest resuscitant of flagging vigor, is a fact which is best appreciated wherever influences inimical to health exist. But it is not alone against malaria that they protect the system. They so toughen it as to enable it to endure with impunity extremes of heat and cold to which travelers are often subjected, and they neutralize those elements in unaccustomed water or The diet, which would otherwise beget disorders of the stomach and bowels. The brackish water with which voyagers by sea are often compelled to quench their thirst, is apt to provoke dysentery and other serious com-plaints, but when the Bitters are mixed with it, it becomes harmless. Truly, this great protective invigorant is an invaluable traveling companion. J 5†391
