# From a Farmer's Note-Book.

Sow for Hungarian grass last week in May; half bushel to acre; cut before seed ripens, to prevent injurious effects on stock. It draws heavily on the fer-tility of the soil, and should be sown only when a deficiency of other hay is likely to occur.

For orchard grass sow with oats, or other spring grain crop, full two bushels of seed to acre; must be thick or will grow in tufts; makes good hay, and, for pasture, grows faster than any grass.

Cayenne pepper, mixed in the cooked food of fowls, will make them lay many more eggs than if not so fed. Make a pudding daily, winter and summer, of Indian meal or meal and bran, and season it strong with pepper, and it will pay well.

When potatoes are planted in the gar-den or field near the house, if a few peas are dropped into every other hill and every alternate row, a good crop of green peas may be secured for the family table, the vines being supported by the potato vines. Marrowpots or other thrifty growing varieties are best. The potato crop is not lessened thereby.

## Making Soft Soap.

Mary C. West has the following chat with a neighbor, and as she gives a few good hints as to making soft soap, we quote entire :

"How did you run your lye?" I asked.

"I put ashes in a large barrel till it as full, and then allowed water to was soak through from the top in the usual

"Was your lye strong enough to bear an egg so soon as it came from the barrel ?"

" Yes." "And did it seem to cut up the grease ?'

'Yes," "Well, that was all right-what was the trouble with it, then?"

"Why, the lye and the grease would not unite; when it had cooled the grease was all on the top and the lye at the bottom—it's always just my luck." "What kind of wood did you burn

" Oak, bay and magnolia." " And what did you put in the bottom of your barrel, under your ashes?"

"Nothing but a little fine brush and broom sedge, to keep the ashes from running out."

All has been perfectly right except the last-in that lies the secret of your bad luck. You should have put at the bottom of your vessel a few pounds of quicklifte-that you are likely always to find necessary when you burn swamp wood. Ashes from swamp wood have a great power to absorb carbonic acid from the atmosphere, and carbonic acid pro-duces the effect which you name; but lime neutralizes the acid and makes it all right."

The art of voicing reeds, the most difficult and important in the manufacture of cabinet or parlor organs, was invented by Mr. Emmons Hamlin, of the Mason and Hamlin Organ Co., in 1847. It has been universally adopted by American and largely by European makers, but none have attained that high standard of excellence in it which is reached in the Mason & Hamlin Cabinet Organs. This fact is universally recognized by musicians.

## A Hint in Dutch.

A plucked goose is the appropriate device (for both parties) in most lawsuits. Victims are rarely lucky enough to realize this as seasonably as in the case here given: A Lancaster (Pa.) lawyer is said to be the originator of the following joke: Being called upon by both parties to a suit, he informed the last one of his inability to serve him, but gave him a note to another advocate, who would, no doubt, take his case. Somewhat dubious, he hunted up a friend who could read the note, the purport of which was "Zwa fette gens; du rost und ich rop" —"Two fat geese; you pluck and I pluck." On sharing the contents with his opponent, they settled the case between them.

#### Died Suddenly of Heart Disease.

Died Suddenly of Heart Disease. How common is the announcement. Thou-sands are suddenly swept into eternity by this fatal malady. This disease generally has its origin in impure blood filled with irritating, poisonous materials, which, circulating through the heart, irritates its delicate tissues. Though the irritation may at first be only elight, pro-ducing a little ralpitation or irregular action, or doll, heavy, or sharp darting pains, yet by-and-bye the disease becomes firmly seated, and imflammation or hypertrophy, or thickening of the lining membrane or of the valves, is pro-duced. How wise to give early attention to a case of this kind. Unnatural throbbing or pain in the region of the heart should ad-monish one that all is not right, and if you would preserve it from further disease, you must help it to beat rightly by the use of such a remedy as will remove the cause of the trouble. Use Dr. Pierce's Golden Medical Discovery before the disease has become too seated, and it will, by its great blood purifying and wonderful regulating properties, effect a perfect eure. It contains medicained seated, and it wing properties, purifying and wonderful regulating properties, effect a perfect cure, It contains medicinal properties which act specifically upon the tissues of the heart, bringing about a healthy action. Sold by all inst-class druggists.

We invite the attention of our readers J. ESTEY & CO. We invite the attention of our readers to the advertisement of Dr. Langley's Root and Herb Bittens, which have for more than twenty years been so favorably known and so extensively used as a spring and summer medi-cine. Few preparations equal these bitters in purifying and cleansing the blocd of all im-purities, and thus recovering the health and correcting all diseases of the stomach and bowels. For the various complaints that are cured by this valuable medicine see the adver-tisement headed "Buy me and I'll do you good," in to-day's paper.—Com.

# Modern Medical Discovery.

It is claimed that disease, with a few exceptions, has been conquered by the research and intellect of enlightened men; and yet a noted professor of New York admits that "of all sciences, medicine is the most uncertain," and that "thousands are annually slaughtered in the sick room." Certain "schools" of the sick room." Certain "schools" of medicine are in existence, one of which "makes the patient ill," in order to claim a cure; and another administers "sugar-coated bread pills," relying upon nature to effect her own cures. Dr. J. Walker, of California, an old and re-spected physician, tried both modes of treatment and both failed. He then appealed to nature's curative—herba: is rumored that the Gorman government has arcested the Papal delegate, who has been ad-ministering the archbishop of Posen since the arcest of the incumbert...A telegram from S.
