

THE JOURNAL.

JOHN KERSHAW, Editor and Proprietor.

CAMDEN S. C., JANUARY 4, 1872.

Announcement Extraordinary!

Having determined to publish a cheap as well as an interesting newspaper, we have the pleasure of announcing to our readers and the public at large, that we have reduced the price of the JOURNAL to \$2.50 per annum, payable in advance, on and after the first day of January 1872.

Should we receive sufficient inducements, after this great reduction, to warrant it, we will enlarge our paper, put up a job office and endeavor in every way to make the Journal more interesting and more profitable both to readers and advertisers, than ever before.

We hope our efforts will be duly appreciated.

The Ku Klux Court.

By reference to our exchanges we perceive that the trials in this Court are progressing, doubtless to the satisfaction of the prosecuting officers of the government and the friends who set in motion this new form of tyrannical oppression. We wish it distinctly understood that we never have directly or indirectly countenanced or encouraged Ku Kluxism, but still we regard the enforcement acts of Congress a disgrace to the statute books of the country and a stigma upon the civilization of the age.

In an Ohio village lately a drunken husband went home and amused himself by breaking furniture, &c. The wife looked on, and when the work of destruction had ceased sat down and made out a bill, embracing each article destroyed and its value. This done, she went to the saloon keeper who sold the liquor to her husband and demanded the amount of the bill.

RE-ANIMATING THE HAIR.—When the hair ceases to draw from the scalp the natural lubricant which is its sustenance, its vitality is, as it were, suspended, and if not promptly attended to, baldness will be the certain result.

We would not be surprised to learn at any moment that Col. McMaster's name was stricken from the roll of Attorneys of the U. S. Circuit Court, for a contempt of the court or some other pretext.

What the end of all this will be it is not possible for us to say, but that the recollection of the scenes now being enacted in that court will embitter the hearts of all lovers of liberty and cause a distrust of the government such as has never hitherto been felt in this country, we have not the slightest doubt.

Our only hope depends upon the Supreme Court of the United States, where Messrs Johnson and Stanberry will do their full duty in endeavoring to lay before the highest judicial tribunal in the land the horrible consequences which have ensued upon the action of Congress. From what we have heard of the opinion of those gentlemen who have nobly vindicated the cause of justice before the Court in Columbia, we regard that they consider it almost a certainty that the acts of Congress above alluded to will be wiped out from the Statute Books.

KERSHAW'S BRIGADE.—In the next number of the Banner of the South and Planters' Journal will be commenced the publication of a Roster of Kershaw's Brigade, compiled by Gen. E. P. Alexander, Chief of Artillery of Longstreet's corps. As this is a matter of interest to the survivors of the Brigade, our South Carolina exchanges are requested to copy the announcement.

FATAL ACCIDENT.—Dr. Ephraim Brevard, of Lincoln, was killed by a fall from his horse, on the 14th. It is not extravagant to say that he was the most promising physician of his age in the Southern country. The late President of Davidson College had the most exalted opinion of his professional skill and when he wished to compliment a student he was accustomed to say, "with proper diligence, you may make a man like Dr. Brevard," though he was careful not to say equal to Dr. Brevard.

Inheriting the blood, bearing the name and adorning the profession of Doctor Ephraim Brevard, the celebrated author of the Mecklenburg Declaration of Independence of 1775, the deceased was as ardent a lover of liberty as his illustrious kinsman. During the four years struggle for constitutional liberty, he was a faithful, zealous and efficient Confederate officer, discharging with signal ability the duties of the profession he loved so well. Brave, chivalrous, generous, warm-hearted, truthful, modest and honorable, he had all those high and noble qualities which win the esteem of the pure and good.

May God in His infinite mercy and

compassion comfort and console the sorely bereaved parents in this the bitter hour of trial. "O, my Father, if this cup may not pass away from me except I drink it, Thy will be done."

The subject of the above notice, taken from the Southern Home, published in Charlotte, N. C., was the son of Theodore W. Brevard, formerly of this State, afterwards a resident of Alabama, and more recently of Florida, and his wife Caroline nee Mays, formerly of Edgefield. The family have still many near relatives, and attached friends in the State from which they emigrated, who will sympathize in the bereavement of the parents as well as for themselves deeply deplore the untimely end of one so elevated and so gifted.

A process for purifying water by means of spongy iron has lately been patented in England by Dr. G. Bischof, of Bonn. The energetic action of iron upon organic substances in solution has been long known, but its application in the form of cast iron, iron wire, etc., were without practical results, the effect being too slow.

Two farmers living in Galesburg, Ill., got to bantering whether a span of horses belonging to one could pull more than a span of mules belonging to the other. It was decided to try it in the middle of the main street of the village. The mules were hitched to the end of a long, stout chain, and the horses at the other end.

In an Ohio village lately a drunken husband went home and amused himself by breaking furniture, &c. The wife looked on, and when the work of destruction had ceased sat down and made out a bill, embracing each article destroyed and its value.

RE-ANIMATING THE HAIR.—When the hair ceases to draw from the scalp the natural lubricant which is its sustenance, its vitality is, as it were, suspended, and if not promptly attended to, baldness will be the certain result.

OF THE COMPLAINTS PRODUCED BY IT.—A sallow or yellow color of the skin or yellowish brown spots on the face or other parts of the body; dullness and drowsiness, with frequent headache; dizziness, bitter or bad taste in the mouth; dryness of the throat, and internal heat; palpitation with a dry teasing cough, sore throat, unsteady appetite, raising of food, churning sensation in the throat; distress, heaviness, or bloated, or full feeling about the stomach and sides; pain in sides back or breast, and about shoulders; colic pains and soreness through bowels, with flatulency, constipation alternating with frequent attacks of diarrhoea, piles flatulence, nervousness of extremities; rushing of blood to the head with symptoms of apoplexy, numbness of limbs, especially at night; cold chills alternating with hot flushes, kidney and urinary disorders, female weakness, jaundice, low spirits, unsociability and gloomy forebodings.

A Body and Mind Disease. Such is dyspepsia. The stomach and the brain are too intimately allied for one to suffer without the other, so that dyspepsia and derangement are inseparable. It may be added, too, that irritation of stomach is almost invariably accompanied by irritation of temper.

The invigorating and tranquilizing operation of Hostetter's Bitters is most powerfully developed in cases of indigestion. The first effect of this agreeable tonic is comforting and encouraging. A mild glow pervades the system, the chronic uneasiness in the region of the liver is lessened, and the nervous restlessness which characterizes the disease abates. This improvement is not transient. It is not succeeded by the return of the old symptoms with superadded force, as is always the case when unmedicated stimulants are given for the complaint.

Such is dyspepsia. The stomach and the brain are too intimately allied for one to suffer without the other, so that dyspepsia and derangement are inseparable. It may be added, too, that irritation of stomach is almost invariably accompanied by irritation of temper. The invigorating and tranquilizing operation of Hostetter's Bitters is most powerfully developed in cases of indigestion.

MARRIED. On the 28th of December, 1871, by Rev. J. E. Rodgers, Mr. J. E. Watkins, of Darlington, to Miss Susan H. Myers, of Kershaw county.

Carolina Fertilizer Triumphant!

WILMINGTON, N. C., August 21st, 1871. For the largest production of Cotton the acre, 1,000 lbs. Carolina fertilizer. For the largest production of Wheat the acre, 1,000 lbs Carolina Fertilizer. The above premiums are for crops produced with the use of the Carolina Fertilizer alone, or in combination with plantation manure only, and the awarding of said premiums is left discretionary with the committee of the Association under the rules.

P. P. Zimmerman, Esq., Secretary of the Fair of the Carolinas, Charlotte, N. C., October 11th 1871. The following is a correct statement of the cotton raised by Stevens & Cureton on 1 1/2 acres of the stubble land, which was manured with 400 pounds of Carolina Fertilizer. The following is the mode of cultivation: it was thoroughly broken up 13 inches deep, and laid off in rows three and a half feet wide, and the fertilizer applied in the drill, then bedded on it on the 16th of May, a half bushel wide, and the fertilizer applied in the row and dry weather, did not come up to a stand until about the 1st of June. First working it was run around with a 3 inch grub, 12 inches long trimmed out with a hoe. Second working it was run around with a half shovel and partially till with a hoe about 12 inches between the stocks, and afterwards it was ploughed every two stands with a sweep 18 inches wide, and hood each time, until it was worked five times. The following is a correct statement of the cotton picked:

1st picking, 254; 2d picking, 410; 3d picking, 413; estimated amount of unopened matured bolls, 816; total, 1,077. Respectfully submitted, STEVENS & CURETON, Agents at Charleston.

At the request of Messrs. Stephens & Cureton we have examined the 1 1/2 acre of cotton, and the estimate made above is true to the best of our ability. W. A. GRAHAM, W. A. GRAHAM, JOSEPH RODGES.

Premiums awarded to Stephens & Cureton on the above certificate. We will sell the above splendid fertilizer at Forty-Five Dollars per ton, or Fifty Dollars payable 1st November, with interest at 7 per cent per annum, delivered at our warehouse in Charleston. Agents will sell at same prices, adding the freight and drayage to their depots.

ATLANTIC ACID PHOSPHATE.

This article, prepared by the Atlantic Phosphate Company under the direction of their chemist, Dr. St. Julien Ravenel, for composting with cotton seed is now offered at the reduced price of \$28 per ton cash, or \$31 per ton payable in November 1872. Free of interest.

ATLANTIC PHOSPHATE.

This Fertilizer manufactured by the Atlantic Phosphate Company under the direction of their chemist Dr. St. Julien Ravenel, is now offered to the planting community at the very reduced price of \$24 dollars per ton cash, or \$27 payable 1st November 1872 free of interest.

PACIFIC GUANO COMPANY'S COMPOUND ACID PHOSPHATE OF LIME.

This article is prepared under the supervision of St. Julien Ravenel, expressly for composting with cotton seed. It was introduced in this country two years ago, and its use is fully attested its value—200 to 250 pounds of this article per acre, properly composted with the same weight of cotton seed, furnishes the planter with a fertilizer of the highest excellence at the smallest cost.
