We all might do good, In a thousand small ways-In forbearing to flatter, Yet yielding due praise, In spurning all rumor, Reproving wrong done, And treating but kindly, The hearts we have won.

We all might do good, Whether, lowly or great, For the deed is not guaged By the purse or estate; If it be but a cup Of cold water that's given, Like the widow's two mites, It is something for heaven.

A BLIND UNDERTAKING .- A near-sighted school teacher in the town of Centre, Wisconsin, took a lady, from Porter, also nearsighted, to church on a recent Sunday evening. He drove a blind horse. This unsightly combination was disastrous. The cycless equine couldn't keep the road, and the closevisioned couple knew not whither to guide the beast. After numerous mishaps they reached the scene of worship, with one of the tires missing and the box of the buggy badly damaged, and drove triumphantly into the yard which surrounded the church .-But unfortunately a clothes line was streched across the lot, and under this the misguided horse took his course. There was a sudden emptying of the buggy in a back sommersaultic manner, which would have done credit to first class circus tumblers, and Centre and Porter were heaped up promiscuously in the mud beneath the vehicle .-They didn't go into the church, but returned home as solemn as a funeral procession, with the Porter lady in the buggy, and the Centre delegate leading the blind horse. It was a gloomy, cheerless trip, and the school teacher vowed, as he trudged along, with the bridle rein over his shoulder, that he would never be caught out again without his spec-

PLANTING WHOLE AND CUT POTATOES. -Dr. Hexamer, of New York, in a result of an experiment of planting the potato in seventeen different ways, found that best results were given from one large potato, whole, in each hill; the next best from two large half potatoes cut lengthwise: next the · seed end of a large potato; next from mediumsized potatoes planted whole; the smallest from small half potatoes. A medium potato he plants whole; large ones cut in half and the largest in four pieces, each lengthwise, always taking care to select his best and soundest potatoes for seed.

NOVEL CURE FOR DRUNKENNESS .- An inveterate drunkard once asked a Quaker whether he knew of a method whereby he could cure himself of his dominant vice. "Friend," answered Broadbrim, "it is as easy as keeping the hand open.'

"How can that be?" said the drunkard; ent thin c.'

MILLIONS Bear Testimony to their

Wonderful Curative Effects. Vinegar Bitters are not a vile Fancy Drink, Made of Poor Rum, Whiskey, Proof Spirits and Refuse Liquors, doctored, spiced and sweetened to please the taste, called "Tonics," "Appetizors," "Restorers, "&c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the Native Roots and Herbs of California, free from all Alcoholic Stimulants. They are the GREAT BLOOD PURIFIER and A LIFE GIVING PRINCIPLE, a perfect Reporator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition. No person can take these Bitters according to directions and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital

organs wasted beyond the point of repair.

They are a Gentle Purgative as well ns n Tonic, possessing, also, the peculiar merit of acting as a powerful agent in relieving Conges-tion or Inflammation of the Liver, and of all the

WAXHAWS, Lancaster county, S. C. To P. P. Zimmerman, Esq., Secretary of the Fair of the Carolinus. Charlotte, N. C.:

The following is a correct statement of the cotton raised by Stevens & Cureton on 11 acres of stubble land, which was manured with 400 pounds of Carolina Fertilizer. The following is the mode of cultivation: it was thoroughly broken up 13 inches deep, and laid off in rows three and a half feet wide, and the fertilizer applied in the drill, then bedded on it on the 15th of May, and planted the same day, but owing to the cool and dry weather, did not come up to a stand until about the 1st of June First working it was run around with a half shovel and partially trimmed out with a hoe. Second working it was run around with a 3 inch grub, 12 inches long and the middles thrown out with a sweep 18 inches wide. One furrow to a row and thinned to a stand with a hoe about 12 inches between the stocks, and afterwards it was ploughed every two weeks with a sweep 18 inches wide, and hoed each time, until it was worked five times. The fol-

lowing is a correct statement of the cotton picked:

1st picking, 254; 2d picking, 410; 3d picking, 413; estimated amount of unopened matured bolls, 816; total, 1,923. Respectfully submitted,

STEVENS & CURETON. I certify I weighed the cotton picked in the above statement, and it is correct. October 2d, W. A. GRAHAM.

At the request of Messrs. Stephens & Cureton we have examined the 13 acre of cotton, and the D. P. DURANT, estimate made above is true to the best of our ability. W. A. GRAHAM.

Premiums awarded to Stephens & Cureton on the above certificate. We will sell the above splendid fertilizer at Forty-Five Dollars cash, or Fifty Dollars payable 1st November, with interest at 7 per cent, per annum, delivered at our warehouse in Charleston.—Agents will sell at same prices, adding the freight and drayage to their depots. State at Large.—Ex-Governor M. L. Bonham, General M. C. Butler, General John D. Kennedy, Colonel T. C. Perrin, Dr. Isaac Branch, Dr. H. R. Cook

We offer in the Piedmont and Arlington a solid and reliable Insurance Company, thoroughly Southern, in the hands of men of the highest integrity, with abundant assets, recent risks, the most secure of all investments, pledged to retain within the State of South Carolina all funds accruing therein, and, indeed, presenting every advantage that can be desired.

We confidently appeal to every one interested in Southern prosperity to look to their own interests by sustaining their own institutions, and thereby establish that self-confidence without which there can be no permanent prosperity. Bear in mind that aiready over \$10,000,000 are annually sent North for Life Insurance, taking so much from our strength and thereby giving additional power to our competitors. Right of party to non-forfeiture in all its politics. Rights of party to re-instatement paid up

policy, and surrender value where "intervention of armies" or any other cause cuts the insured off from home office. This feature, omitted in policies of Northern companies, cost the Southern people very heavily in the late war, and should make them seek the against such contingency in the future. From an official exhibit, it is shown that the Piedmont and Arlington had a greater increase of business in 1869 over 1868 than any company on this continent. It shows that there were only three companies in the United States that issued more policies; also, that, with their accumulated risks of fifteen or twenty years all combined, this company, though young, stands twentieth in

mount of risks in force. This exhibit, among over a hundred companies, makes the Piedmont and Arlington the leading Life Insurance Company, at least of this country. It shows, not only progress, but caution and economy—its losses being light, its expenses small.
