Apple Orchards.

The best site for an apple orchard and we may add a peach orchard. too-is undoubtedly a northern exposure. Experience in every direction proves this. We do not say that apples will not do well in valleys or southern exposures but not uniformly so by any means. Any one who chooses to know, ought to be informed that uniformity of temr of 5-Ton \$50 Freight-Paid Sold on fruit tree. An orchard planted, say in this latitude, on a hill side, with a full northern exposure, always stands the winter, and is uniformly productive. That with a southern exposure, planted in valleys or protected by belts, is liable to constant changes of temperature: buds early and is subject to late frosts, which prevail only in low situations, and to consequent destruction of the crop AGENTS WANTED of fruit.

It may be just as well for those who may contemplate setting out an orchard this fall to bear this in mind.
