Such, Mr. President, are the outlines of my views in relation to co-operation. I regret that I have not time to go more into detail. I have endeavored to be candid and explicit. because I am free to confess that I feel bound to consider maturely a measure which has such distinguished supporters before I reject it. I have done so, and I must dechare in all sincerity that if South Carolin, abandons all purpose of acting alone, and determine patiently and passively to wait, (as she must if she waits at all,) ! the developments of the future in the expectation of such hostile legislation on the part of the General Government as will unite the South in her overthrow of this Union, she will sacrifice the great cause which all her sons, with but few exceptions, profess to be nearest to their hearts, and give a death blow to disunion. Yes. repeat_let South Carolina lay down her arms, let her say she will not secede, and a shout of triumph (shall I say of derition?) will go up all over the land, for we have enemies every where, and the advocates of the Compromise will underwrite the Union for the next generation. These may be unpalatable truths, but they must be told.

I come now to the consideration of the second proposition which I have supposed will be submitted to our convention when it assembles.

Having failed up to this time to obtain any pledge of co-operation from the Government of any other State, shall South Carolina secede alone? I approach the discussion of this question with a profound sense -of its magnitude and importance. I never expected to be called upon to give my counsel on any question under a sense of higher responsibility. I have never entertained or expressed but one opinion on the character of this measure, as my constituents, with whom I have frequently and publicly conferred, can testify. I have told them that secession was a measure which would demand the exercise of all their wisdom and all their firmness. The overthrow of any government and the establishment of anoth-

er is no holiday affair. It is no card house we desire to construct, which can be reared by the hand and destroyed by the breath of an infant .--No! It is a stern work which lies before us, and if we seek for new guards for our future security, we must expect to obtain them at the hazard of many sacrifices.

The questions in regard to secession, which appears to me will demand the careful consideration of the convention, are

First. Has the State a right to secede ?

Second. Is she justified in the exercise of this right at this time ?

The first question is one I presume the convention will have very little difficult v in deciding, as it may be considered a settled question in the judgment of the Southern States at Cabinet line—such as Bedsteads, Ward-this time, though I am aware it is robes Safes, Book cases, Stands, Tables, this time, though I am aware it is seriously denied by some within their | Cuphoards, &co limits, and perhaps, if not brought to judgment at the present day, will in a few years become much controverted, if not ultimately repudiated. Resolutions affirming this right were laid on the table in one or both branches of the North Carolina Legislature at their last session. I am not fully informed of the circumstances under which this was done, but I point to it as a fact which deserves attention. [TO BE CONTINUED.]

A Derangement of the Nervous System. Of in NERVOUS COMPLAINTS, Irruge and Medicines increase the discase, for they weaken the vital energies of the already prostrated system; while, under the strengthening, life-giving, vitalizing indusence of Galvanism, as applied by this beautiful and wonderful discovery, the exhausted patient and weakened sufferer restored to former health, strength, elasticity and vigoriants and several resultants and available and supplied to the strength of the strength o

The great peculiarity and excellence of Dr. Christie's Galvanio Curatives, consists in the fact that they arrost and cure disease by outward application, in place of the usual mode of drugging, and physicking the patient, till exhausted Nature sinks hopelessly under the infliction.

They strengthen the whole system, equalize the circulation of the blood, promote the escretions, and never to the slightest injury under any circumstances. Since their introduction in the United States, only three years since. 60.000 Persons neluding all ages, classes and conditions, among which were a large number of ladies, who are peculiarly subjects to Nervous Complaints, have been ENTIRELY AND PERMANENTLY CURED.

when all hope of relief had been given up, and every thing else neen tried in vain ! when all hope of relief had been given up, and every thing eise neen tried in vain!

To illustrate the use of the GALVANIC BELLY, suppose the case of a person afflicted with that hone of tivilization, DYSPEPSIA, or any other Chronic or Nerry has Disorder. In ordinary cases, stimulants are taken, which, by their action on the nerves and unusoles of the stomach, afford temperary relief, but which leave the patient in a lower state, and with injured faculties, after the action thus excited has ceased. Now compare this with the effect resulting from the application of the GALVANIC SPLIT. Take a Dyspeptic sufferer, even in the worst symptoms of an attack, and simply the the Belt sround the Body, using the Magnetic Fluid as directed, in a short period the insensible perspiration will seron the positive element of the Belt, thereby causing a Galvanic circulation which will pass on to the negative, and thence back again to the positive, thus keeping up a continuous Galvanic circulation throughout the system. Thus the most severe cases of DYSPEPSIA are PERMANENTLY CURED. A VEW DAYS 18 AMPLY SUFFICIENT TO ERADICATE THE DISEASE OF YEARS.

AN EXTRAORDINARY CASE. which conclusively proves that "Truth is stranger than Fiction." CURE OF Rheumatism, Bronchitis and Dyspepsia

REV. DR. LANDIS, A CLERGYMAN of New Jersey, of distinguished attainments and exalted reputation:-BIDNY, New Jersey, July 12, 1848.

Dr. A. H. Christie—Dear Sir: You wish to know of me what has been the result in my own case, of the application of THE GALVANIC BELT AND NEGK.

LACE. My reply is as follows:

me what has been the result in my own case, of the application of THE GALVANIG BELT AND NEGK LACE. My reply is as follows:

For about twenty years 1 had been suffering, Rem-Dyspepsie. Every year the symptoms became worse, nor could I chtain permanent relief from any course of medical treatment whatever. About fouriest years since, in consequence of frequent expourer to the weather, in the discharge of my pastoral duties, I became subject to a severe Chronic Rheumatism, which for year after year, caused me indescribable anguish. Farther: in the winter of '45 and '46, in consequence of preaching a great deal in my own and various other churches, in this region, I was attuabled by the Brouchitis, which soon became so severe as to require an immediate suspension of my pastoral labors. My nervois system was now thereighly preservated, and as my Brouchitis became worse, so also did my Dyspepsia and Rheumatic affection—thus evincing that these disorders were connected with each other through the medium of the Nervous System. In the whole pharmacopoia there seemed to be no remedial agant which could reach and recuperate my Nervous System; every thing that I had fried for this purpose had completely failed. At last I was led by my friends to examine your inventions, and (though with no very samguine hopes of their efficiency.) I determined to try the effect of the application of the GALVANIC BELT AND NEGKLACE, with the MAGNETIC FLUID. This was INABLED TO RESUMS MY PASTORAL LABORS, NOR HAVE I SINGE OBITYED I SINGLE SERVICK ON ACCOUNT OF THE DRAYS MY DYSPERSIA HAD GOME; IN KIGHT DAYS I WAS ENABLED TO RESUMS MY PASTORAL LABORS, NOR HAVE I SINGE OBITYED I SINGLE SERVICK ON ACCOUNT OF THE DRAYS MY DYSPERSIA HAD GOME; IN KIGHT DAYS I WAS ENABLED TO RESUMS MY PASTORAL LABORS, NOR HAVE I SINGE OBITYED I SINGLE SERVICK ON ACCOUNT OF THE DRAYS MY DYSPERSIA HAD GOME; IN KIGHT DAYS I WAS ENABLED TO RECUSE MY. Such is the wooderful and happy recults of the experiment.

I have recommended the BELT and FLUID to many who have been like
