Saw and Grist-Mills.
THE subscriber is prepared to make contracts to furnish Steam Engines, Circular-Saws, Grist-Mills, and other Machinery; and to erect and put the same in operation in this or adjoining Districts.
He is a practical Engineer and Machinist, and his long experience enables him to give ample satisfaction. Mills erected by him or under his superintendance will perform the amount of work stipulated for, or contract forfeited.
Persons having sufficient heads of water, and timber enough to make it an object, can have the Circular-Saw applied to their water-mills, warranted to do more and better work in three months than they can in twelve months with the up-and-down saw.
Owners of Steam-mills at present using the reciprocating saw, can have their Mills made valuable in the same proportion.
All that is necessary on the part of the persons wishing to have their old Mills altered or new ones built, is to give the necessary orders, and the subscriber can command sufficient talent and materials to satisfy the employers, without requiring them to devote any personal attention or giving themselves any further trouble about the work.
One of these mills working under the charge of the subscriber, near Sumterville, can be seen in operation any working day. Where persons wishing to engage in the business, can satisfy themselves of their superiority by actual observation, and have all necessary information as regards cost, amount of work, management, &c., fully and freely imparted.
The subscriber will also furnish estimates to parties wishing to build, for \$10. Estimates, with plans, specifications and references, \$50.
The above and superintending the erection of Engines, not over 20 horse power, to drive circular saw and grist mill, \$900. On each of additional power, 10 per cent on each of additional power and machinery.

Blacksmith, Engineer and Machinist.

LIGHTNING RODS.
THE subscribers respectfully inform the citizens of Sumter District that they have purchased the patent right to sell and put up the best conductors of lightning ever invented, the manner of insulating as far superior to the mode adopted in the Spratt conductors, as Spratt's rods are superior to the old rods used five or ten years ago.
The improvements in these insulators were made and patented by G. W. Oles, and by said Oles conveyed to the "Lyon Manufacturing Company" of New York, and by their lawful Agent conveyed to us for Sumter District, South Carolina.
We will furnish buildings, public or private, at much less cost, and with a far superior conductor, than has hitherto been put up in this District. Pamphlets containing information can be had of either of the subscribers, and a model will soon be on exhibition.
