Sow wheat and oats in great quantities this fall. Where is the man who said a big crop of potatoes and corn would knock the bottom out of prices? Which way are prices going now when foodstuffs are usually cheapest? What will we pay for food and feeds before the winter is gone? If you have an acre of land and can get a bushel or two of grain sow it, but sow it right and do not waste the seed.

Chesterfield County Is Helping Hoover

The County Council of Defense held its first meeting at the Court House Monday morning. Every township in the county was represented with the sole exception of Old Store, and they were unavoidably detained. The meeting was called to order by the County Chairman, Charles L. Hunley, and he outlined to the members of the County Council present, the work there was before them. The strong talk was made by D. S. Matheson, and there was a round table discussion in which all those present participated.

It was decided that every Township Council should at once arrange a meeting or series of meetings in their respective Townships, and invite public speakers to address the people upon the subject of why we are in war.

The County Council went on record in favor of the food program, and every farmer in the county will be urged to sow wheat this fall, and their attention will be called to the fact that the government has guaranteed \$2.00 a bushel for every acre of wheat grown during 1918.
