**FOUR**  
**\$1050**

ONE HUNDRED per cent efficiency in a "Four" is, today, absolutely known quantity. "Efficiency" in the sense used, comprises design, material, workmanship, economy of maintenance, and the relation of power to size, weight and carrying capacity, as well as completeness of equipment.

Four-cylinder cars, therefore, can be exactly graded by the degrees to which they approach the One Hundred Per Cent Standard.

The Studebaker FOUR, judged on the most exacting scale, is not exceeded in actual value or performance by any other "Four" ever built.

After having built more than one hundred thousand "Fours" we believe that it is as near perfection as human endeavor can make a "Four."

It could not be built for \$1050 if Studebaker operations were on a less mammoth scale.

Full floating rear axle—108 in. wheel base—Timken bearings throughout—cylinders cast in bloc—full elliptic rear springs—left hand steering and center control—gasoline tank in cowl—superb finish and maximum of equipment.

Cars in stock for immediate delivery. Get yours before the spring rush exhausts our supply.

### The Studebaker SIX

Do You Want a

## SCHOOL LIBRARY?

If you do you will never get one by waiting for it to come to you. You must first show to your patrons that you are enough interested in a Library to work for it. When you do that your School Library will be assured. For there is always some one that will come to the assistance of those who are making an honest effort.

Instill into the minds of your boys and girls that the road to success is through honest efforts. Win one of the books being offered by Mayes' Book Store.

### Specials for Wednesday.
