CLASSICAL FIGURE FOR GREAT EXPOSITION COURT, PANAMA-PACIFIC INTERNATIONAL EXPOSITION, 1915.

THE vast west court, the Court of the Four Seasons, at the Panama-Pacific International Exposition in San Francisco in 1915 will be adorned with a number of the finest productions of the world's greatest sculptors. Not only will free standing groups and independent pieces of statuary be set throughout the court, but its walls, its lofty colonnades, the picturesque recesses, will be embellished by much sculpture of a decorative type. The classical piece above will be used to decorate the arcade of the court and is by August Jaegers, the famous sculptor.

CANADA AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION, SAN FRANCISCO, 1915.

PLANs for the Canadian building at the Panama-Pacific International Exposition at San Francisco in 1915 have been approved, and the work on the great structure has started.

The Canadian Palace, as it is officially named, will be one of the largest and most imposing of the foreign buildings, having a length of 240 feet, a width of 210 feet and a height of 50 feet, and will cost in the neighborhood of \$300,000. It will be the largest building ever erected by Canada at an international exposition, covering 65,000 square feet, and will house one of the most elaborate and comprehensive exhibits of the Dominion's resources and products ever shown on foreign soil. Six hundred thousand dollars has already been voted by the Canadian parliament for the building and exhibits, but a further grant, bringing the appropriation up to \$1,000,000, will be recommended by the government.

Canada at the Panama-Pacific Exposition is following the same policy that has obtained at former expositions—namely, the display of specimens or exhibits of the natural products of the country—agricultural, horticultural, mineral, forest and fisheries—for the purpose of showing her climatic advantages and her resources to the great number of people who will visit the Exposition. Attention will be devoted to transportation facilities, and the railways will be assigned considerable space in the building. Practically the entire exhibit of Canada at the recent Ghent exposition—and it was conceded by all judges a most magnificent display—is en route here now, while many new and attractive exhibits are being prepared in the various provinces.

The exhibit will be under the supervision of Colonel William Hutchison, who will represent the Dominion government.

COLOSSAL GLASS DOME FOR PALACE OF HORTICULTURE AT WORLD'S GREATEST EXPOSITION.

THE photograph above shows the huge Palace of Horticulture at the Panama-Pacific International Exposition at San Francisco in 1915. The building will be constructed almost entirely of glass. The huge dome will be 186 feet in height and 152 feet in diameter. At night colored searchlights placed within the building will play upon the inside of the dome, giving it the appearance of a magnificent soap bubble, iridescent with all the colors of the rainbow. The building will cover five acres.

THE WORLD'S FIRST INDOOR AEROPLANE FLIGHT, PANAMA-PACIFIC INTERNATIONAL EXPOSITION, 1915.

THE world's first indoor aeroplane flight was made by Lincoln Beachey, the American aviator, on the grounds of the Panama-Pacific International Exposition in San Francisco. Starting at one end of the Palace of Machinery, which is the largest wooden frame structure in the world, being almost 1,000 feet in length, Beachey attained a terrific momentum and rose into the air to a height of fifty feet, actually flying for a distance of 300 feet. At the opposite end of the building barriers of cloth were held by assistants to lessen the impact of the aeroplane. The machine, however, provided with a hundred horsepower engine, easily tore through the cloth, and the aviator received a severe shaking up. The difficulties of the flight were increased by the fact that the interior arrangement of the building consists of three longitudinal aisles each seventy-five feet in width, and Beachey flew down the center aisle, having to keep a straight course in order to prevent the aeroplane from striking the great columns of the aisle.

In 1920.

Kansas City Journal.
"Wife, how did the chandelier get broken?"
"Baby had his first lesson in flying today."

Juvenile Geometry.

Peoples Home Journal.
Teacher (to a scholar)—Johnny, what is a cube?
Johnny—A cube is a solid surrounded

ed by six equal squares.

Teacher—Right! Willie, what is a cone?
Willie—A cone? Why—a cone is—er—a funnel stuffed with ice cream.

Knew Her Bible.

Boston Transcript.
Bobbie—I wonder where animals go when they die. Are there any animals in heaven?
Dorothy—Of course there are, else

what became of the horses that took Elijah up there?

Baltimore Sun.

What little word of four letters means more than anything else in the wide world?" asked the sentimentalist.
"W-o-o-r-k," answered the practical man of affairs.

To Prevent Blood Poisoning

Apply at once the wonderful old reliable DR. CARTER'S ANTI-SEPTIC HEALING OIL, a surgical dressing that relieves pain and heals at the same time. Not a liniment. 25c, 50c, \$1.00.

Not Garrulous.

Pete Mele.
Client—What! You expect me to pay you 253 francs for taking possession of such a small inheritance? You should have warned me it would cost so much.
Lawyer—My motto, sir, is "Deeds, not words."

The Two Essentials.

Western Mail.
"Tommy," said the Sunday school

teacher, who had been giving a lesson on the baptismal covenant, "can you tell me the two things necessary to baptism?"
"Yes'm," said Tommy, "water and a baby."
