STATE FAIR TO HAVE MAMMOTH FARMER EXHIBIT

Columbia, Aug. 29.—The 1922 State Fair to be held at Columbia, October 23-28, next, will be unique with many educational features. An especial feature is the mammoth exhibit to be staged by the United States department of agriculture. This exhibit will occupy approximately five thousand square feet of space and will be found in a prominent location in the west building. In addition to a wide variety of displays of agricultural products, actual working models will give a realistic presentation of the subjects they illustrate. A feature of the exhibit is the use of the radio news service now employed by the government in disseminating the market news throughout the country. Results showing all phases of the cotton industry will also be featured. The combined exhibit will be of such educational value that it will appeal to all progressive farmers.

Mr. H. M. Cooper, Jr., president of the state fair, announced today that plans were being perfected to honor the Confederate veterans at the state fair. He stated that arrangements would be made to admit these veterans without charge that they may view the progress of the state they love so well. "This is a duty that the state owes her valiant heroes," said Mr. Cooper, "and it will be a distinct honor to the state fair to have these men as her guests. The exhibits this year will be of such magnitude and merit as to truly depict the growth, progress and resourcefulness of our state and none take greater pride in our advancement than the beloved gray haired veterans. All honor to them and may their visit to the state fair scatter sunshine and lighten their burdens. I sincerely trust that every living Confederate veteran will honor us with his presence. The gates will swing wide open to him. 'Welcome' in capital letters will blazon forth over our gateways and with hearts flushed with pride we shall greet our heroes."

Mrs. (Mrs. B. G. G.) "Good gracious, Bridget, have you been using one of my old stockings to strain the coffee through?"

Bridget, (apologetically): "Yes, mum, but sure I didn't take a clean one!"—Majorie Wood, 214 Vall Ave.

Mother pays daughter's dress the sincerest flattery—imitation.

SOIL BUILDING AND WEEVIL CONTROL

Clemson College, Aug. 25.—On Friday, September 8, there will be a field demonstration of soil building and weevil control on the farm of Mr. Wade Drake, Anderson, S. C. All county agents and farmers that possibly can should come to Anderson on that day, says N. E. Winters, specialist in soil fertility, who is planning the demonstration. The party will meet at the county agent's office in the chamber of commerce building in Anderson and leave Anderson under the direction of S. M. Byars, county agent, at 2 p. m., for the purpose of studying the effects of summer legume cover crops and winter legume cover crops, on corn and cotton.

For the third year in succession, Mr. Drake is conducting experiments in which nitrate of soda is applied to corn following a good legume cover crop turned under. For the past two years he has failed to get any result from nitrate of soda where his soil is properly filled with organic matter and the nitrogen is supplied by legumes.

One of Mr. Drake's strongest points as a farmer is that he knows how to produce and does not produce economically large yields of corn, cotton and other crops by using the five important factors in soil management, namely, soil moisture control through terracing and the use of cover crops, the incorporation of organic matter by means of green manuring, the use of good plowing and tillage methods, the systematic use of a ton or more of lime per acre every four or five years in rotation, and the intelligent use of commercial fertilizers.

Mr. Drake is also systematically using calcium arsenate dust in the control of the boll weevil on his cotton this year and it will be well worth the time of any man who is interested in producing cotton under boll weevil conditions to visit Mr. Wade Drake's farm. Remember the date, Friday afternoon, September 8.

PITHY PARAGRAPHS

Charlotte Observer.

Mother: "That's right, dear you go to school and study hard, then some day you can run for governor."

Little 2-year old son: "Dikens! let the governor do his own running."

—Mrs. T. Reeves, Charlotte, N. C., 206 North Church Street.
