We take pleasure in calling attention to the change in the Sumter Dry Goods company's advertisement. These gentlemen propose to go before the people squarely apon merit, without misr-presentation or exaggeration, and the purchasing public may rely upon what they say. The business manager, Mr. G. A. Lemmon is no novice in the mercantile business, as he has had the best of training and under-stands the needs of the people as well as any man in Sumter or any other city. He is the man that does buying for the con-cern and the sellers think him a pretty tough lemon to squeeze. His business is his study and therefore his knowledge of the markets, fashions, quality of goods and all other matters to make a first-class mercantile establishment a success is of great advantage to the establishment with which he is so responsibly connected. This which he is so responsibly connected.
