It is with a degree of satisfaction that we note Senator Tillman's change of heart with regard to the management of local dispensaries. In the session of the General Assembly of 1900, in the Senate, there was introduced "A Bill" looking to the reformation of the liquor management in this State, and for the system, a provision was adde for the management to be a board consisting of the system. He just cannot stop the swelling tide, but he can throw himself in its way and he destroyed, as will probably be his fate, if he continues in his present course. Senator Tillman is a shrewd politician, and he can come near creating a popular issue to advance his individual interests; it would not surprise us to learn that the suggestions he makes to the General Assembly are deliberately and cuningly planned with the expectation of not being accepted. He suggests measures and plans, to accept, would mean stultification; hence, he has no idea the legislature will adopt his suggestions, and then he will take their refusal as an excuse to join in the popular demand for the destruction of the dispensary. He will beat his tom-tom to revive factionalism, and stir up the "wool hat boys" by telling them his oldtime enemies are after his scalp and, he will lull the anti-dispensary people to sleep by telling them that he could not stand for corruption, had tried to purify the dispendo it, and he is with them to kill ports. misrepresentations, the dence.
