## Slaughtering Prices!

Friends, this is no mere catchy advertisement. I mean what I say, and a visit to my store will prove that there has never been such bargains offered in Manning before.

Remember this is only a Clearance Sale to make room for a large spring stock already contracted for, and this

sale only lasts through the month of January.

To conduct this Special Sale I did not employ a salvage company, but instead I simply MARKED DOWN, CUT AND SLASHED the prices, that my patrons will get the full benefit.

Don't fail to attend this sale.

Watch the train as it dashes past you with a speed of sixty miles per hour, and after it is lost in the distance sit down on the track and figure a little on the velocity of light. The train has passed with a mighty rush and great noise, but the silent beam of light flits past with a speed 11,179,-560 times greater! The initial velocity of a ball fired from a twelve pounder is 1,765 feet per second; that of light 1,560,134 feet in the same length of time. Comparisons give us but a very poor idea of the velocity, but they enable us to partially comprehend the immensity of the universe, for we know that with all its prodigious speed it takes light four hours to flash from that they were not coming to my office, Neptune to our earth.

Early Autograph Hunters. A certain Atossa in early Roman days

seems to have been the mother of autograph collectors. Cicero had a collection, which must have been a fine one. for he speaks of it with particular pride. Pliny speaks of Pompeius Secundus, at whose house he had seen autographs of Cicero, Augustus, Virgil and the Gracchi, and his own collection was valued at \$15,000 of our money.
