Food For Squirrels.

Most people who feed the gray squirrels in the big parks fail to realize that it is no kindness to give these pretty little animals such soft shell nuts as almonds, peanuts and chestnuts. Human beings who do not have to actually forage for food naturally enough feel that it is thoughtfulness itself to save the squirrels work. The fact is, however, that a squirrel's teeth grow so rapidly that, deprived of their normal use, they might even through their very uselessness become long enough to put this charming rodent of the trees in danger of starvation. Hickory, pecan and hazel nuts are the proper food to

throw to the squirrels.-Brooklyn Life. Where Was the Joke? Mabel-Such a joke with Mr. Gayboy.
