More Laughter, Less Suicides.

The physiological benefits of laughter cannot be overestimated. It shakes up the diaphragm, sets the pulses beating to a lively measure, stimulates the blood corpuscles, enlivens the brain and sometimes produces dislocation of the jaw when indulged in too heartily by a man with a large mouth. Used with discretion, laughter is as inspiring as a sea breeze, as refreshing as an August shower. Its moral effect is Lying doesn't pay "annyhow, Hinnesbeyond computation. Reason For Heavy Wheels.
