Exchange Your Cotton Seed for Meal.

Director R. J. Redding of the Georgia Experiment Station, says:

"Cotton Seed Meal is a cheaper and more effective fertilizer than cotton seed." "A farmer should never use cotton seed directly as a fertilizer when he may exchange it for a fair equivalent of meal."

800 pounds of meal are the full equivalent to one ton of seed.

Therefore, whatever excess above 800 pounds of meal the farmer can get in exchange for a ton of seed, or by selling the seed and buying the meal, less the cost of hauling or freight, is so much clear profit in comparison with using the ton of seed directly as a fertilizer."

Director Redding has proven by actual field experiments that the above statements are right, and by exchanging your seed with us you can realize nearly 100 per cent. profit on the transaction.
