Removing Its Poison Fangs Does Not In Ancient Times the Cure Was Some

A common misconception which is its poison fangs. These fangs, two in number, are situated on the upper jaw strikes, when they become erect and the closing of the jaws compresses the poison glands and injects the venom through minute openings in them. In striking its prey (for whatever charm the serpent may employ to get its victim within easy reach it relies upon the venom to give the coup de grace) these fangs may often be broken, and nature has provided a full supply of reserve weapons which lie dormant in the gums and which within two weeks will develop and replace the injured

An acquaintance who returned from a bunting trip with twenty-five full grown rattlers in a box kept them in his office for two months confined behind a coarse meshed wire screen. He handled them most carelessly, as he had extracted the poison fangs, but when shown that each of them had developed a perfect pair of new ones there was a sudden rise in the local snake mortality. One was preserved and sent to the Bronx zoo, where it a short time afterward produced a large litter of young ones, which could have easily crawled through the screen behind which the mother had been kept. As each of them possessed the poison apparatus in full commission and was without the power to rattle, they would have been even more dangerous than adult snakes.

Professional snake handlers are often ignorant of this power to quickly replace fangs possessed by rattlers, and this ignorance led to a serious accident to one of them. He was badly bitten and narrowly escaped death, his recovery being attributed to the generous amount of whisky which was immediately administered to him, which illustrates another mistaken idea. It is a pity to shatter a pleasant illusion, but alcohol, except in very small doses, is harmful rather than beneficial as an antidote to snake bite poison.

As a matter of fact, although the symptoms of rattlesnake poisoning are most painful and alarming, an adult rarely dies from the bite of the variety common in the north. The diamond backs of the south attain a much larger size and consequently inject more venom, and their bite is proportionately more dangerous.—Francis Metcalfe in Outing Magazine.

He Won the Breeches.

There is a proverbial phrase signifying that the wife is master in the household, by which it is intimated that "she wears the breeches." The phrase is both odd and common and is only half understood by modern explanations, but in mediaeval story we learn how "she" first put in her claim to wear this particular article of dress. A French writer of the thirteenth century (Hugues Piaucelles) relates some of the adventures of a couple whose household was not entirely harmonious. Sire Haines was the husband; Dame Anleuse, the wife. After a quarrel one evening Sire Hains said, ently mark the sites of sunken cities. "Early in the morning I will take off my breeches and lay them down in the middle of the court, and the one who can win them will be acknowledged the master or mistress of the house." Dame Anieuse accepted the challenge. The battle was fought the next morning. It was a long battle, and it was bloody. At the end Sire Hains

dame had convinced the world that she was entitled to wear them in her own Are you having trouble with your sidneys? There are lots of people today who wonder why they have pains across the back, why they are tired and lack-ing in energy and ambition. Your kid-

bore off the breeches, but the good

nevs are wrong. They need relief without delay. Take DeWitt's Kidney & Biadder Pills; they are for weak back, inflammation of the bladder, backache and weak kidneys. Sold by W. E.

The Accommodating Spanish Cow. It was the first cow we had seen in Spain, and she had every right to be the haughty creature that she was. A girl led her about the plaza at dusk, milking a thimbleful of the rare beverage at the houses of the customers. and it is hard to say which of the three concerned was the most proudthe one sold, the one who bought or the one who gave the milk. She of the bovine race was decorated with an oldchenille fringed curtain and, as though that was not enough to boast of, pulled along the streets a very unruly but bouncing daughter. The calf was tied to the tail of the cow by a rope and had already learned the ineffable joy of hanging limp and being dragged by her fond parent. Fortunately the rope was not too long for disciplinary purposes, and when exasperated beyond all polite admonition the cloven hoof of the mother set daughter upon her feet once more .- Louise Closser Hale in Harper's.

Smallest Deer In the World. The "mousedeer" is the chevrotain. one of the smallest of hoofed animals. It stands less than twelve inches in height at the shoulder. The prevailing color of the fur is brown, finely speckled with yellow. The spots are large and sometimes run into each other and form stripes. The underparts of the body are white. It possesses the peculiar habit of walking on the tips of its hoofs. This lends a stiffness to the legs, which has gained for the chevrotain the reputation of having no knee joints. It has no horns or antlers. But, as in the case of the musk deer, teeth or tusks in the upper jaw. It is of exceedingly timid disposition and Opium, Chloroform and other opiates. lies hidden in the jungle throughout They may stop the cough and cause the day and only ventures to feed in sleep quickly, but they also dry up the the early morning and after dusk in the evening. In captivity this tiny native of India is gentle, quite tame, but always shy .- Chicago Tribune.

History has it dled with impunity, by the removal of that it was the mighty leap from rocky heights to the depths below of a hunted deer pursued by the bounds of Kaier Carl IV, that led to the discovery and lie flat except when the serpent of the Sprudel spring and that the deer bunting emperor was the founder of the health resort to which he gave his

Originally the Carls and cure and the mode of life there, a mor which remained in fashion for at least two centuries, consisted sole in the use of was so enerthe baths. This, howgetic that we children of the twentieth century are overcome by a feeling of admiration for the doctors who ordered such cures and still greater honor for the patients who could undergo them, for the bath treatment was so severe that it was not inaptly called the "hautfresser." or skin eater. It was only about the year 1500 that Dr. Payer, the town physician of Elbogen, near by, ordered the Carlsbad water to be drunk as a cure. Quoting from the publications of the period and Dr. Pay-

"I have said that this water must be drunk, and as hitherto it was not usually employed for drinking, but only for bathing, this will appear new to many." The quantity of the water prescribed was in handsome proportion to the "skin eater"-twenty, forty and up to sixty cups of a morning regularly.-Town and Country.

Question. When is a pain not a pain? Answer, when it is due to a condition that can be reached by an external application and somebody has been thoughtful enough to purchase beforehand a half pint bottle of Elliot's Emulsified Oil Liniment for 25c. and rubbed the affected parts freely. Guaranteed by Dr. W. E. Brown & Co.

MASTERY OF THE NILE.

The Method by Which the Flow of Water Is Controlled.

Every morning from a little room of a great white house on the eastern shore of the Nile at Assouan is clicked by telegraph to Cairo the question, 'How much water?" The answer comes so many thousand gallons more or so many thousand gallons less. A button' is pressed, the water which flows under the iron bridge at Cairo is increased or diminished some ten days later in accordance with the telegraphic answer, and the intervening valley between Assouan and Cairo has a little more or a little less water on its surface. The man at the button may bring joy or sorrow to thousands of little farms-it is all according to the

message he receives. From the great white house there extends across the river a granite wall or dam 150 feet high. Halfway up this wall and stretching its entire length a line of shutters opens or closes by a pressure of the button. In the winter months a huge lake expands to the southward, which has every appearance of being a flood, for in certain places the tops of palm trees are discernible above its surface, and the summits of inundated ruins appar-As the days go by and Cairo demands more and more water the palm trees and the ruins seem to rise from their watery beds until in June and early July the river flows freely with all its historic indolence.-New York Times.

Trial Treatment of Dr. Blosser's Catarrh Remedy Free to Sufferers.

If you have catarrh of the nose, throat, or If you have catarrh of the nose, throat, or lungs, if you are constantly spitting, blowing the nose, have stopped up feeling, head noises, deafness, asthma, bronchitis or weak lungs, you can cure yourself at home by a remedy so simple that even a child can use it.

It will cost you only a postal card to get a liberal free trial package of Dr. Blosser's wonderful remedy. It is sent by mail to every interested sufferer. Certainly no offer could be more liberal.

more liberal.

The full treatment is not expensive. A package containing enough to last one whole month will be sent by mail for \$1.00.

A postal card with your name and address sent to H. R. BOGER, Manning, S. C., will bring you by return mail the free trial treatment and on interesting booklet, so that you can at once an interesting booklet, so that you can at onc begin to cure yourself privately at home.

A MESSAGE FROM MARS.

Ebenezer was driving his master's

His Proof That the Planet Was Inhabited and Civilized.

plow straight and true, but none the less with a thoughtful air, as though his thoughts were elsewhere. And so they were; they were soaring far aloft above the plow and the brown earth turned up as to reach Mars. The previous evening Ebenezer had attended a lecture at the village schoolroom on "The Heavens," and what the lecturer had said about Mars being inhabited profoundly impressed Ebenezer. As he mechanically guided his horses and his plow something struck him suddenly on the head, and he dropped senseless to the ground. A balloonist passing overhead had accidentally dropped an empty whisky bottle upon Ebenezer's fortunately thick skull. When he recovered consciousness the balloon had passed out of sight, but the cut on his head and the blood stained bortle at his feet remained. Ebenezer gasped in amazement and

HORSE WHISPERERS.

Men Who Can Control the Most Vicious Animal by Voice.

The horse whisporer aight be an unknown quantity in England and Ireland today, but there are not a few men who exercise a wonderful control with their voices over horses which when the dominating influence is absent are apt to literall kick over the traces. In the thorough bred stables of England and Ireland oday there are not a few stablemen a d jockeys who succeed in holding in c eck the vice in horses which in demon trative manner show that they cannot tolerate the presence of the grooms or attendants. Nimrod claimed for Count Duval a

power and influence of the human yoice over the brute creation, but thatpower was backed up by a lecture to the horse with "his clinched fist in his face." But the horse whisperer of today

avoids all gesticulations and trusts entirely to a combination of sounds or words. There is no bullying done, and the whisperer can face a mad horse with his hands behind his back and apparently at the mercy of the beast that has to come under the charm. One means of keeping remount horses quiet in stations during the South African war was that employed by the yeomen, who sat in a ring of hear to head horses singing as loudly as pos ble and riveting the ears and attention of the otherwise sprawling and hungry animals.

One of the first whisperers to acquire absolute control over fractious equines was Con Sullivan, who migrated in his youth from Kilmallick, where he could trace his genealogy through a long line of snafflers, and became almost exclusively employed by Lord Doneraile. The whisper of this man made an indelible impression upon any horse, bringing the pupil to a degree of docility unattainable in

the ordinary course of discipline. The race horse King Pepin, a famous racer, vicious and reputed to have killed two grooms at the Curragh, once came under his charge. He was wanted to win a race at Ma low, but when saddling time came it found him in one of his unmanageable moods. He reared, plunged and flung out fore and aft until he completely cowed groom and jockey. It was at this crisis that some one recommended that he should be "whispered." As it was the only chance left of taming him in time for the start, his owner gladly availed himself of it, though warned that horses were sometimes thrown into a

state of stupor by the process. Sullivan was soon found, and he was delighted at the opportunity of "fwhuisperin' before so much 'quolity' from all parts." "Show us the wild baste." he said. "and we'll soon tache

him manners." When he got within the circle-and a wide one it was-in which King Pepin was playing his antics he walked up to him, approaching the horse from behind. He mumbled some words as he walked which, though not onite inaudible, were as un'atelligible as a sermon in the unknown tongue, but they had a most magical effect on the horse, for he stood stock still. Sullivan then patted him on the neck, while he whispered a word or twe in his ear, whereupon King Pepin went on his

knees and incontinently lay down. The whisperer then s retched himself on him at full length, took out a pouch containing pipe and to acco, flint and steel, struck a light and blew a cloud as he lounged on the stomach of this high mettled colt with as much composure as if he were seated on a bench in his favorite taproom. After two or three puffs he got up. beckoned the nag to his legs, saddled him and walked off to the starting post, the horse following and fawning upon him like a dog. He won the race in a canter .-

London Live Stock Journal. Great Falls of the Potomac. The Great Falls of the Potomac are about fifteen miles above Washington, but the neighboring country has remained so wild and undeveloped that the falls have been difficult to reach. The famous Conduit or Aqueduct road, so called because it is built over the big conduit which brings the national capital its water supply, leads about up to the falls on the Maryland side and there stops. It is famous as one of the best roads in the country, and it is a favorite drive with Washington awe as he gazed all around the wide people and visitors. About halfway up this road crosses a deep gulch by Then he picked up the bottle and means of the Cabin John bridge, a masmelled at it and at once deserted his jestic stone arch built by the government and until recently the longest single masonry span in the world, about 220 feet. This bridge was beright enough," he muttered. "Civil- gun just before the civil war, and a tablet was inserted in its side, giving the name of Jeff Davis as secretary of war.
