## Exchange Your Cotton Seed for Meal.

Director R. J. Redding of the Georgia Experiment Station, says:

"Cotton Seed Meal is a cheaper and more effective ferti-

lizer than cotton seed." "A farmer should never use cotton seed directly as a fertilizer when he may exchange it for a fair equivalent of meal."

"According to chemical analysis of each, 886 pounds of cotton seed meal are about the equivalent in content of plant food, to 2000 pounds of cotton seed. But owing to the superior mechanical condition of the meal and its consequently greater, or more prompt availability, it is safe to assume that

### 800 pounds of meal are the full equivalent to one ton of seed.

Therefore, whatever excess above 800 pounds of meal the farmer can get in exchange for a ton of seed, or by selling the seed and buying the meal, less the cost of hauling or freight ing, is so much clear profit in comparison with using the ton of seed directly as a fertilizer."

Director Redding has proven by actual field experiments that the above statements are right, and by exchanging your seed with us you can realize nearly 100 per cent. profit on the
