A GERMAN SATIRE.

The Forgotten Life and the Sad Fate of the Herring.

The experiments of men of science sometimes furnish amusement to those who ele not particularly interested in the saw, minute and apparently insignif ant investigations by means of important physical facts are learne. It is interesting to know that if we cut off the tails of forty sucgenerations of mice at their t one mouse, even in the fourth on, will be born without a tail. a cutting off the baby mice's themselves in the sea of Galilee. the world laughed at him. The saw experiments to test the poschang its habitat-a land animal tak-

amusingly satirized in Germany: Some time ago Herr Professor Schlitzer, the eminent biologist who is making emperiments relative to the changes a live herring. He took the fish home ter. Every morning the professor dipped out of this vat half a teaspoonful of salt water and replaced it with an equal amount of fresh water.

The herring survived and passed his days apparently in the best of spirits. In the course of time the water in the tank was rendered completely fresh. still the herring remained cheerful and in good health. Next the herr professor began to deprive the fish, little by little, of the fresh water element gamboled around in a perfectly dry

his pet. He had forgotten to give it anything

to drink. Thereupon he put a dish of water in the cage.

The next morning, when the herr professor came to look at his fish, a melancholy sight met his gaze. The herring had fallen head first into the

dish of water and had been drowned .-Harper's Weekly.

THE MAN KILLING CAMEL. A Turk's Consideration For the

Brute's Future Owner. There had come with us from Hebron a Turkish soldier riding a young camel whose virtues he boasted and indeed exhibited-the clean limbs, the stride and the docility of the beast. It seemed a worthy camel-a camel of excellent humor and of disguished promise -and it was much coveted by the way. At night, as the custom is, the man was used to sleeping close to his beast, the winds being chill, but now at Rafieh, while the mules were unloading and the cook was coaxing his fire, he tethered the camel, flung his saddle on the sand and went off to the mud barracks to hobnob with the Egyptian frontier guard. I was presently alarm i by the cook's outcry and a rising scitement in camp. The docile one in his mouth. Steadily he chewed camei ter's : idle, stupidly believing that he conflict within him. This alarmed aged in his master's murder-

and dreadful attack, a rearing wy plunge. ejaculated the Turk when he wa informed of this, "Have I cherished man killer?"

imel was heartily beaten and The to his knees, whereupon his doubl withd er was not yet convinced. Rise killed him. a persistent, silent effort, and cautio sly approached the saddle, which he attacked as savagely as before, but now with one hoof.

"I have had a narrow escape," said "My camel would have the Turk. killed me tonight. By God and Mo- he is her last chance."-Louisville hammed, the prophet of God," he swore "I will sell the beast in the bazaa at Beersheba."

TRIALS FOR ANIMALS THE PLANET JUPITER

In the Middle Ages.

PROSECUTED FOR HOMICIDE. WHIRLS WITH AWFUL SPEED.

A Bull That Killed a Man Found Guilty, Sentenced to Death and Executed-Fate of a Cock That Was Charged With Having Laid an Egg. Among the many curious customs of

the past is recorded a singular feature of the jurisprudence of the middle ages, when animals were indicted for bled like an old man's and The custom was not abolished in my wind is disordered with re- France until the middle of the eightmorse and horror. Can you help eenth century, and the French court trials took place between 1120 and 1741.

There is some Biblical precedent for these proceedings, for in the twentyfirst chapter of Exodus one finds, "If an ox gore a man or a woman that they die, then the ox shall be stoned

An early instance of the custom was in 1314, when a bull escaped from a at a rate of about 250 miles an hour. "The satrap set out upon his farmyard in a village in France in the search. He traveled many months duchy of Valois and gored a man to death. The Count of Valois, being informed of the case, directed that the bull be captured and formally prosecuted for homicide. This was done, "The satrap came at last to the and evidence was given by persons cobbler's door. The house was who had seen the man attacked and killed. The bull was thereupon senfore it the cobbler lay asleep, tenced to suffer death, which was inthe carcass was suspended from a

tree by the hind legs. In 1386 a sow was executed in the square of Falaise for having caused the death of a child, and three years later a horse was condemned to death have a boon to ask at your hands. at Dijon for having killed a man. In It is that you will exchange shirts | 1457 a sow and her six young ones of having killed and partially eaten a size it turns about in less than ten child. The sow was convicted and condemned to death, but the little ones hours. were acquitted on the ground of their extreme youth and inexperience, the bad example of their mother and the absence of direct evidence of their

having partaken of the atrocious feast One of the most grotesque of these trials took place in Basel when a farmyard cock was tried on the absurd charge of having laid an egg. It was contended in support of the prosecution that eggs laid by cocks were of inestimable worth for use in certain magical preparations, that a sorcerer would rather possess a cock's egg than the elixir of life and that Satan employed witches to hatch such eggs, from which proceeded winged serpents

most dangerous to mankind. The prisoner's advocate admitted the facts of the case, but contended that no evil intention had been proved and that no evil result had taken place. Besides, the laying of an egg was an involuntary act and as such was not punishable by law; also there was no record of the devil having made a compact with an animal. The public prosecutor stated in reply that the evil one sometimes entered into animals, as in But v en the man of science was en- the case of the swine which drowned

sibilit that by degrees an animal may haps the devil in the form of a cock, whereupon the bird and the egg that ing to water, and so on-were thus was attributed to it were solemnly burned at the stake. Even stranger than this were the

proceedings instituted in 1445 and 1487 against certain beetles which had made of halitat made by animals, captured havoc in the vineyards of St. Julian. Advocates were named on behalf of and kept it in a large vat of salt wa- the vine growers and the beetles respectively, but by a singular coincidence the insects disappeared when cited to answer for the mischief they had done, and the proceedings were in consequence abandoned.

That was in 1445. In 1487, however, they reappeared, and a complaint was thereupon addressed to the vicar Not a grain of salt was left in it. And general of the bishop of Maurienne, who named a judge and also an advocate to represent the beetles. A compromise was finally agreed upon, wherein the vine growers consented to in which he lived. In this also he was cede the beetles certain fields to their successful, and after a time the herring exclusive use. Some time after the beetles, through their attorney, protested that there was a right of way The herr professor next put the fish through these fields which would be internal heat of Jupiter. And on these in a birdcage, and the intelligent creato to their detriment. Consequently the ture continued to thrive. But one day case had to begin again, but how it different from ours ply, but about the the herr professor noticed that some- ended is not known, owing to the mutithing seemed to be the matter with lation of the records.-F. HE ATE THE SOAP.

Garland Would Have Swallowed It H It Had Killed Him.

Augustus H. Garland, who was attorney general under President Cleveland, was very fond of practical jokes and during his term of service in the senate frequently turned the laugh on his colleagues. Senators Voorhees and Vest, with whom he was very friendly, finally determined to turn the tables. Mr. Garland had a habit, like Voorhees, of munching candy, and Vest and Voorhees made it up between them to take advantage of his fondness for sweets to play their trick. They had some tempting looking chocolate caramels prepared, with the interior filled with brown soap. These they took to the senate chamber, and Voorhees placed them on his desk. The lid being off, when Mr. Garland sauntered down the aisle he noticed them at once. "What have you there, Dan?" he in-

quired. Voorhees looked up carelessly from his writing and responded: "Caramels.

Help yourself.' Garland needed no second invitation and, picking up two or three, placed was viciously trampling his mas- away, his face betraying no sign of the Voorhees, who went to Vest's desk and

"He's eating them, Vest! What shall we do? The stuff will kill him sure!" Senator Vest replied that it could do nó more than make him sick. Garland swallowed the stuff, although he was foaming at the mouth from the soapfore leg was tied so that he suds. He related the incident aftere but with difficulty, and we ward with great gusto and said he v to observe his behavior, for would have swallowed it if it had

Curious Custom That Prevailed A Monster World, 1,300 Times the Size of Ours.

It Spins Around at Such a Fearfui Gait That a Furious Gale Perpetually Encircles Its Equator-Its Possible Inhabitants and Its Moons.

It is curious how little the average person knows about Jupiter. He has heard a lot, too much perhaps, about Mars, but that world, 1,300 times the size of ours, whirling in the terrible outer distance of space with its five moons, its 144 months yearly, known records show that at least ninety-two as Jupiter is almost if not quite a mys-

In the first place, Jupiter, according to some astronomers, is inhabited. So are some of its moons, in the midst of which the great planet spins around like a top at such tremendous speed that it causes around the equator a furious wind that blows perpetually

In the midst of this never ending, howling gale live the Jovians. Some astronomers say that because Jupiter is so much bigger and heavier than the earth no creature of any weight can support itself. A man weighing 200 pounds on this earth would, if carried to Jupiter, weigh 500 pounds, and. reasoning thus, they believe that nothflicted by strangulation, after which ing bigger than a cat could stand on this vast world.

But this is no doubt a mistake. If Jupiter stood still or revolved no faster than our earth all that astronomy says would be true, and a terrestrial man could not stand upon its surface. But as a fact the tremendous rate of revolution is so much faster than the hours as against our twenty-four

As it is, a man of normal earthly size, if transported to the equator of Jupiter, would actually feel much lighter than he does here on earth, bewould almost lift him from his feet always plainly perceptible. and throw him into the heavens. He an hour tornado that blows incessantaround and around the planet like a speck of dust.

In order to keep on his feet the be about fifty feet tall. Some of them would doubtless reach the height of fifty-five feet. Like all big bodies, the Jovian would have a tendency to slowness of motion. Having once seated himself, he would spend a good twelve hours at his breakfast and perhaps eighteen at his dinner and would proballowed him less than six hours for

his lunch. The oceans of Jupiter, torn into fury by the hurricanes, would pay no attention to one moon such as moves the fewer than five of these satellites to perform this work for Jupiter. They So the poor creature was convicted travel at various rates of speed, some not as a cock, but as a sorcerer or per- fiying very close to Jupiter's surface and others far off. They have atmospheres somewhat like ours on earth, and a moonlight on Jupiter is indeed a glorious sight, for these moons have a variety of colors. Two are blue, one is vellow and one red.

Jupiter needs all its moons at night for illumination, for without them its five hours of darkness would be black indeed. So distant is the sun that broad daylight is hardly brighter than twilight on earth, and one lone moon would not reflect enough of the sun's rays to guide the Jovian footsteps.

In the polar and semipolar areas the 250 mile an hour tornado of the equator is not present. Doubtless there are eddies and occasional windstorms such as there are on earth. And in these localities it is possible for smaller creatures to exist, and here, too, vegetation would flourish. The food supply of Jupiter must come from these areas, where it is cultivated and shipped to the equatorial regions by the diminutive races. The polar oceans are not frozen because of the great still oceans probably ships not greatly equator the unending storm would

If there are ships at all at the equator they are submarines, which dive into the calm depths beneath the surface. Locomotion by flying machines is extremely easy on the equator because, by taking advantage of the wind, the Jovians can navigate their

planet at tremendous speed. It is possible that because of the noise in the wind swept equator the Jovian is deaf.

Quite likely, on the other hand, he artificial or contributed by nature, for wishes to listen.

This tremendous, good natured Jovian has a leather-like skin to protect day," remarked a listener. "It's usehimself from the scratches of flying things and a device for sifting the air that he breathes, for Jovian atmosphere is full of dust, and in spite of with electric lights."-Bothemian Magathe difficulties of his existence be is a | zine. long lived gentleman. On the average he exists for about 800 of our years. Probably many a Jovian exists a full thousand of our little years .- Detroit News-Tribune.

None of us may know when the echo of a careless word will cease vibrating in the hearts of some that hear.

THE GRAMPUS GOURMET.

This Marine Monster's Prey Is the Bowhead Whale. "Of all the gourmets on land or

water," said the captain, "commend me to the grampus." The ladies at the captain's table looked with inquiring smiles at the

handsome sailor. "The grampus," he went on, "is a kind of overgrown shark or a kind of undersized fighting whale. You can take your choice. At any rate, he is a terrible creature to meet with if you happen to be aquatic. "He and his mate travel together

Sometimes they have a friend alongbig, fine, strong chap, as such friends usually are. And their game is the bowhead whale.

"When they find a whale they go at him. They stick to him invincibly. They punch and thump till he is as limp as a rope of seaweed with exhaustion. Then, by means of one horrible deed, they show their unexampled giuttony.

"They take hold of the whale's lower lip; they hang their weight on it until it drops open. Then in go their heads, disappearing inside that great red mouth, that warm, moist cavern of scarlet, and they eat in there the whale's tongue, a tender tidbit, very rich and delicate.

"The tongue consumed, they go on their way again, leaving the whale to die slowly."-New Orleans Times-Dem-

WHITE ISLAND.

Its Strange Lakes, Sulphur Fumes and Clouds of Steam.

White island, a New Zealand natural wonder, derives its name from the clouds of white steam in which it appears to be continually enveloped Its area is only 600 acres and its 19 King St27-12reet, Charleston, S C jutant and Inspector General.

Section 1. Be it resolved by the height about 880 feet above the sea

level. In form and color it is like a repos ing camel, while its interior, with its gray, weather beaten, almost perpenwere tried at Lavegny on the charge earth's that in spite of its monstrous dicular cliffs, recalls the Coliseum at Rome. Overhanging the southern land ing place stands a column of rock closely resembling a sentinel, which has been dedicated to the memory of Captain Cook. The water of the is land is of a pale green hue, and anything dipped into it becomes of a red cause the swift rotation of the planet | brick color. The fumes of sulphur are

On a fine moonlight night a wonder would feel so light that the 250 mile ful sight is afforded to any one who will sit in an open boat in one of the ly would pick him up and carry him lakes of the island. Covering an area of fifty acres is an immense caldron, hissing and snorting and sending forth volumes of poisonous steam, while all Jovian man or woman would have to chances of egress appear to be denièd by the steep, silent and gloomy cliffs.-British Australian.

Flying Fish. Interesting are the habits of the flying fish, that queer denizen of the sea found principally in the region of the trade winds. "Does it rise from the sea ably throw up his job if his employer like a bird?" you ask. No. It shoots out of the waves like an arrow, and with outspreading wings sails on the wind in graceful curves, rising some times, one might say, to the height of fifteen feet, but not often so high, and tides on our earth, and it takes no then, lowering, it again touches the crest of a wave and renews its flight. covers a distance, say, of 500 yards in tance is covered. A ship sailing through the trade winds will often be visited on dark nights by flying fish which hit the sails or rigging and fall on deck, where of course they soon give up life.-St. Nicholas.

> Sponges Are Sunstruck. The sponge being an animal, it is necessary to kill it. This is done by exposing it for several hours on the broad decks of the boats. In summer sponges soon die, but in winter take the sun. After death they are brought ashore and put in the cradles. These are inclosures made on the seashore by setting stakes a little apart from each other. The ebb and flow of the tide wash the animal matter from the sponges, and the work is completed by manual labor. They are then taken to the packing house, graded, strung baled and dispatched to their destination.-Pall Mall Gazette.

Perfectly Correct. A shopkeeper had stuck up a notice in glaring colors and very large letters: Selling Off! Must Close on Sat-

urday!" On Friday he was asked by a friend: 'What! Are you selling off again?" "Certainly. All the shopkeepers are selling off, ain't they?"

"Of course they are. But you say 'Must close on Saturday.'" "Certainly I must. You would not have me keep open on Sumlay, would
