Mr. M. M. Krasnow, who has been the most prominent in our cities, such as New York, Philadelphia, Baltimore, etc., with the intention of bringing to Manning the largest assortment of clothing, shoes, novelties, dry goods, high-class millinery and furniture.

A wind storm passed through the Sammy Swamp section last Thursday afternoon, and did considerable damage to high corn, blew down some trees and gave the people a scare. Mr. Theodore Lesesse says the wind was so severe at his place that it blew the wool off from a sheep's tail, and it was his favorite sheep that.

Mr. M. M. Krasnow of Manning's merchants is now in New York on the market buying his fall goods. Mr. Krasnow went off early this season so that he could take his time to pick up bargains, and at the same time be on hand as the new fall goods arrive. Watch Krasnow's store when he gets back. He is going to offer special inducements for the tobacco trade.

The News and Courier's report of crop conditions throughout the State shows the crop greatly retarded and not so good. It gives Clarendon as three weeks late, with the cotton small in a yield, and with the present good weather or will in a few days show a considerable improvement, as cotton has wonderful recuperative power.

There will be a good roads convention here on the 27th, which will be addressed by Dr. Winslow and other road building experts. The Columbia Evening Record furnished us with the itinerary of the autoists who are to come on the occasion and an outline of the purpose of the meeting but it became misplaced, nevertheless we shall be glad to have as many as possible here on the 27th.

We are constantly being asked if there will not be more candidates for the legislature, and some people seem to think that it is the editor's business to go out and bring candidates in. From a financial standpoint the dearth of candidates is appalling, but it cannot be helped. It has been hinted there will be at least one more candidate for the House, and he may decide to run his candidacy upon an economical basis by not letting the voters know he is seeking their votes until he tells them so on the stump. Then too, we have heard there may be an auxiliary candidate in the race to help another candidate. There are tricks in politics as well as in other matters.

It was with both pride and pleasure we read in Sunday's paper that one of our Clarendon boys had been awarded a prize for writing an article on a scientific subject. We refer to the article written by William H. Carrigan and read before the State Pharmaceutical Association at its last meeting. After hearing the paper the association voted Dr. Carrigan a prize. Dr. Carrigan is a Summerton boy of whom his friends are justly proud. He is making his way to a high mark, and accomplishing it by his own efforts. His success should encourage other boys to greater efforts. We wish this young doctor every success.

Attention is directed to the rules of the Democratic party which is intended for young men coming of age before the general election in November. Any young man who will be 21 years old by the 3rd, of November next has a right to have his name enrolled on a Democratic club and he can vote in the coming primary. Our reason for reminding you of this matter is to get the secretaries to see to it that these young men are enrolled. It would be well for every secretary of a club to go over his club roll to see if he has enrolled all in his county. Those who have become of age since the last election, those who have recently moved in, and those who will be of age by the general election.

Some of the gentlemen who are sacrificing themselves upon the altar of their country for political preferment have a correct idea of the way in which a country newspaper should be run. In other words, when they want political advertising they send a check along with their matter. But there are some others who seem to think the country publisher neither pays the printer his salary, the landlord the rent, nor the paper dealer for paper—that he eats not, nor neither does he drink—and that he is simply printing a paper for the glory of boosting those who want office. We serve notice right here and now that we do not belong to the latter class, and that gasoline costs 20 cents a gallon when purchased from the local retail dealer. Govern yourselves accordingly, gentlemen—Gaffney Ledger.

There are times when it is almost impossible to get up matter which will be entertaining to our readers; their tire of politics and they become satiated with baseless news, then what is there for a poor newspaper man to do in these hot and long days? He cannot sit down with his hands folded nor can he pick up and go to the springs; he must stay at his post and grind, and grind, even if it seems from his face that he is simply printing a paper for the glory of boosting those who want office. We serve notice right here and now that we do not belong to the latter class, and that gasoline costs 20 cents a gallon when purchased from the local retail dealer. Govern yourselves accordingly, gentlemen—Gaffney Ledger.

The party to be here on the 27th in the interest of good roads will come through the country in automobiles under the auspices of the Columbia Evening Record. This party is touring the State and its itinerary includes Manning. Mr. D. J. Winslow, superintendent of construction, has been detailed by the government to make this tour with The Record party, and wherever he goes he makes addresses on road building which are spoken of highly by the present owners of the property they reach Clarendon should be met at the county line by the automobile people and escorted to Manning. We suggest that the owners of machines have a meeting and get in communication with the tourist and arrange to properly receive them. We also suggest that the attendance be representative from all over the county. If there is one thing the people should be vitally interested in it is good roads, and we hope there will be a large attendance at the meeting on Wednesday 27th.

At the colored summer school for teachers now being held in Manning, on last Friday evening the address was given by Thomas E. Miller, President of the State Agricultural and Normal College of Orangeburg, and Dr. E. M. Brawley, President of the Morris College at Sumter. Several of Manning's prominent white citizens were present and addressing the meeting were both addresses. President Miller discussed the subject of agriculture, and advocated an agricultural school in every school district for white children. He asked for nothing for the colored children taking a course in agriculture by contact with the negro children were uplifted the negro children by contact will get benefits therefrom. He made a capital speech teeming with good counsel. He eloquently urged the negroes to be good citizens, hope shared with white men as well as negroes. He illustrated his meaning by telling stories of the olden time, and said that while slavery is gone the same traditions exist and apply today as they did then "like mass like nigger." If a negro was raised in the contact with good white men he will likely be a good negro, but if his contact is with bad white men, then "lak bucka lak nigger."

Dr. Brawley made the second address, and he is without doubt a captivating speaker. He is an educated agriculturist, and his address was well received. He spoke for about forty minutes, and every word found lodgment in the minds of those who heard him. His subject was "teaching." He stressed the importance of teaching, and then told his hearers what was not teaching. He divided his subject into four divisions. 1st. The teacher. 2nd. The pupil. 3rd. Matter to be taught. 4th. The ultimate object. He treated his subject in a masterly manner, and concluded with an exhortation on character which was as fine as we have ever heard. Dr. Brawley is a splendid speaker, forceful and eloquent. Both of these educators are indeed a credit to their race, and if their people will only be governed by their counsel the future of the negro is a settled problem. They repudiate the idea of education means idleness, but on the other hand they teach that education means work, that respectability and honesty must be instilled, and the only way to succeed in life is to maintain a good character.

The Governor Spills the Game. There was to have been a sparring match, prize fight or some other kind, or character of a scrap at the base ball arena last evening between two bruisers of local repute, but the game was spoiled by gubernatorial interference. The Governor forbid the coming off of anything which may have the scent of a prize fight. The celebrities the match was arranged between were both welterweights, and had it not been for this interference a large crowd would have witnessed the bout. It became rumored that the game would be stopped by the officers, and Jack Flowers hearing of it, wired to his excellency as follows: "Understand you have received communication from parties here requesting prize fight between myself and friend, it is only a boxing contest. Entire council agreed to it. Answer."

The Governor answered promptly: Columbia, S. C., July 12, 1910. To Jack Flowers, Manning, S. C. Your wire received, cannot allow boxing match. JACK FLOWERS, Governor.

So the local sports were deprived of the pleasure of a fur flying exhibition, and on receipt of the news of the governor's action all bets were called off, the gambling houses and saloons closed, and the police given a vacation. Ever since that time the usual calmness there will be no need for the militia to be called into service to uphold the peace and dignity of the State, as Manning's sporting fraternity have respect for the law, especially if there is danger of being pulled. It has not been definitely learned what the principals in the proposed bout were to get, but their seconds were to have given them between each round a bottle of strawberry soda water, and they were to fight according to the rules of the barbery rules.

The whole thing was of course a joke, but since the Governor regarded it as a serious matter, the town authorities had consented to the fight block, where it will be pleased to see all his friends. Owing to the high price of rents, etc., I am compelled to raise the price of shaving to 15 cents. This will go into effect when we move into our new quarters. We will also have a first class bath system in our new quarters. Give us a call. J. L. Wells.

The above complaint should be taken into by the Superintendent of Education and if possible give to the patron of Baywood school the relief they are entitled to. It is a serious proposition, and means much to the children. Steps should be taken right away to have school facilities provided, and if the trustees are not giving them their attention the county board can appoint trustees who will. There should not be in this county a condition where sixteen children are deprived of school facilities. TIMES EDITOR.
