## We Do Not Need It.

There was a party in Manning last Saturday prospecting to establish a 'social club," an institution similar to the kind they have in cities which are nothing more than drinking resorts. He told us that he would apply to the Secretary of State for a charter, and wanted us to publish the required notice but we declined unless he could show us where we would have to publish such notice. He left here to confer with the Secretary of State, and said he would be back the latter part of this week. So far as we are concerned, we should rather have an open bar-room in ardson. this town than to have one of these pretended social organizations where drinkng liquor is the source of the social entertainment. We regard the club feature as ten times worse than barrooms because they entice more young men and the effect of these clubs is more dangerous than the bars. We have no idea that the authorities will a "social club" unless the laws of the State make it mandatory, and even then if a license can be required, it could be out so high that would make it prohibitory. We believe the legalized sale of intoxicants properly restricted is the best method of handling the liquor business, but we are opposed to shams. If liquor is to be sold let it be open and without disguise.

It is my opinion that the county superintendents, as a rule, are anxious to see the standard of scholarship raised, and are doing all they can to bring it about; but before they can do so, they must have the co-operation of the trustees. If the trustees throughout the State would adopt the plan of grading the pay according to the grade of certificate, it
