SYMPTOMS OF CONSUMPTION

Yield to Vinol.
The medical profession do not believe that consumption is inherited, but a person may inherit a weakness or tendency to that disease.
A prominent citizen of Evansville, Ind., writes: "I was ill for five months with pulmonary trouble, and had the best of doctors; I had hemorrhages and was in a very bad way. Through the advice of a friend I tried Vinol, and I feel that it saved my life. It is all you recommend it to be. I believe it is the greatest medicine on earth. I have advised others to try Vinol, and they have had the same results." (Name furnished on request.)
Vinol soothes and heals the inflamed surfaces and allays the cough. Vinol creates an appetite, strengthens the digestive organs and gives the patient strength to throw off incipient pulmonary diseases.
Try a bottle of Vinol with the understanding that your money will be returned if it does not help you. Dickson's Drug Store, Manning, S. C.

The Thrift of Glasgow.
Glasgow sets a splendid example of thrift and enterprise to the other cities and towns of Great Britain. It does not even scorn to collect and sell its waste paper and to traffic in scrap iron, thus adding many hundreds a year to its exchequer. Its cleansing department does business with half the counties of Scotland. It owns nearly 1,000 railroad cars and does a wide range of business from bog reclaiming to market gardening and butcher's work.—London Tit-Bits.

Newton's Fearful Crime.
At the end of a meal at Haydon's house Keats proposed a toast in these terms: "Dishonor to the memory of Newton."
The guests stared at him in questioning surprise, and Wordsworth asked for an explanation.
"It is," answered Keats, "because he destroyed the poetry of the rainbow by reducing it to a prism." And the artists all drank, with one consent, confusion to the savant.

Frugality.
"John, dear, it's too bad that we have to pinch and save and economize on everything we buy. Is-is there such a thing as a money trust?"
"Yes, love; I think there is."
(Pause.)
"John, dear, why don't you join it?"
—Louisville Courier-Journal.

The Stronger Influence.
"Which do you think appeals more generally, art or literature?"
"Art. Almost anybody would rather send a picture postcard than write a letter."—Washington Star.

WALL STREET BANKS.

As a Rule They Make Loans on a 20 Per Cent Margin.
Most Wall street banks insist on having a twenty point margin behind each loan. That means that a man borrowing \$100,000 must put up as security stocks or bonds of \$120,000 market value. If the securities decline to a point where the \$20,000 margin is reduced to \$15,000 the borrower is called upon to put up additional securities. Most brokerage houses do not wait for such a summons, but send the necessary collateral to the bank as soon as they see that the price of their securities has declined.
But the banks are guided always by the character and the financial standing of each borrower. Each bank has a list of favorite borrowers who can secure whatever money they need in times of stress or in times of calm. The loan clerks know who the favorites are and show them every courtesy. It means a good deal for a Stock Exchange house to get on the "favorite list" of a Wall street bank.
Some borrowers, in order to stand well with a bank, never complain when the bank raises the rate on their loans. They go on the theory that it is foolish to dispute a rate with a bank when the difference between 2 1/2 per cent and 2 3/4 means only \$1.89 a day on the interest charge for a \$100,000 loan.—New York Post.

CONTINENTAL SCRIP.

What a Two Dollar Bill of the Year 1774 Looked Like.
One of the few pieces of continental scrip now in existence is owned by a former teacher at Stratford high school. It was given to her at Christmas time by a fellow teacher.
The piece measures about 5 1/2 by 2 1/2 inches and is framed to show both sides. Within an intricate leaf and branch border design, on the front side, is printed:
"This indented bill of \$2 shall entitle the bearer thereof to receive bills of exchange, payable in London, or gold and silver, at the rate of 4s. 6d. sterling per dollar for the said bill, according to the directions of an act of assembly of Maryland. Dated in Annapolis, this 10th day of April anno Domini, 1774. William Eddis H. Latham."

In an upper corner of the reverse side is a picture, about an inch and a half square, representing the British crown, at each side of which is a tiny picture of a man. One of the men is represented as holding a spade, while from the hand of the other dangles a fish on a string. At each end on this side of the scrip are the words, "This scrip is counterfeit," and at the bottom are the names of the printers, A. C. and P. Green.—Indianapolis News.

Meon Rivers.
The so called craters, ring mountains and empty sea beds of the moon are not the only interesting phenomena which our satellite presents to the view. There are on many parts of the moon's surface long, narrow lines called "rills," evidently much below the general level of the ground, some of them comparable in breadth and depth to the great canyons of our western country. Certain astronomers have been disposed to regard these rills as cracks and rents in the crust of the moon, but others have adopted the suggestion, made long ago, that they are river channels. It may be remarked of these ancient lunar river channels, if such they really are, that their wider ends always terminate in pear shaped hollows like little craters, and this end is nearly always higher than the other, so that if the craters were once lakes their waters must have flowed out into the rivers instead of the waters of the rivers emptying into the lakes.—Harper's.

The Education of a Gentleman.
Friday afternoon was "debate day" in a school. On that afternoon classes after 2 o'clock were let go, and the assembled school listened to shly spoken pieces of poetry and addresses to gladiators. Then came the climax, the debate when world issues were settled for once and all. The speeches were after the pattern of this one, which one teacher recalls:
"Mr. Chairman, ladies and gentlemen, I rise to defend the affirmative of the question whether it is better to have wealth or education. Mr. Chairman, if you was to get a kiss letter from a lady and couldn't read it, wouldn't you just feel like going away and dying? I close now to give place to an abler speaker."—New York Post.

A Prophet Scrutinized.
"A prophet is not without honor save to his own country," said the man who complained.
"Well," replied Farmer Corntassel, "that's one way o' sayin' it. You might also mention that it's easier for a man to sell a gold brick in a town where they don't know him."—Washington Star.

Tried to Do Better.
A tramp told a woman a hard luck story about losing his wife and family and home in an explosion.
"But," the woman said, "that isn't the same story you told me last week."
"I know, lady," said the tramp, "but you didn't believe last week's story."

What Three Bushels More to the Acre Means
EIGHT years ago the farmers in a central state averaged crops that ran three bushels less to the acre than they now get. Suppose each acre of farm land in the country were so tended that it produced an increase equal to that of this state. How much more money would you have with which to buy the luxuries of life that you earn and deserve? Your share in this prosperity depends entirely upon yourself. The first step is to fertilize your land properly with manure spread by an

I H C Manure Spreader

The spreader that does its work as it should must have many excellent mechanical features. The apron should move without jerking; the beater should meet the load at exactly the right point to pulverize the manure without too greatly increasing the draft of the machine; the speed changes of the apron should be positive. All these features are provided for in the construction of I H C spreaders.
I H C spreaders are made in low styles which are not too low for use in deep mud or snow, narrow and wide, with both reverse and endless aprons, for use under all conditions. The rear axle is located well under the box, instead of at the rear. Placed in that position (under the box) it carries over 70 per cent of the load and insures ample tractive power.
