

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Dr. J. C. Ayer* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Purgative, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS
Bears the Signature of

and see it before buying elsewhere.

Condense Your Hay

IHC hay is one of the hardest things in the world to manage. There's no getting around that. The wind plays havoc with it. It slips and slides off poorly loaded wagons. In barn and yard much of it is wasted. It is much too bulky to haul or ship far. Handling hay is a problem, and right here is the answer—in the baling. An **IHC** hay press puts your hay in convenient shape for handling and economical feeding; no need to build outdoor stacks exposed to all weather, for lack of barn space. You can ship the bales to cities and distant places where the hay market and prices are good. Large cities, where storage space is costly, require hay to be baled, and top prices are paid. Shredded corn fodder makes a good feeding substitute for all the hay you may ship to the city.

IHC Hay Presses

are the only kind you will consider in buying, when you have made a comparison, studied the construction, the durability, the features, and the possibilities of the **IHC** hay presses. You will find both styles made in three sizes, 14 x 18, 16 x 18, and 17 x 22-inch bale chamber, baling from six to sixteen tons per day. The efficiency of the **IHC** features, the self-feeder, toggle joint plunger, bale tension, and spring roller tucker, prove their worth on demonstration. If your choice is a motor power press, you will have a year-round machine, for the engine is always ready to do farm jobs for you, pumping, sawing, grinding, running the repair shop, electric light plant, etc. In the horse power press, study the pull power principle, compound leverage, and the low step-over. It is the most efficient press sold. Drop in on your local dealer and look over the **IHC** hay press line. Get catalogues from him, or, write the

HOLDEN PLANS TO PUT ALFALFA ON EVERY FARM

Plan to Unite All Interests in Nation-Wide Campaign for the General Growing of Alfalfa.

Extension Department to Aid Any Community Interested in Conducting Campaign to Encourage the Growing of Alfalfa—No More Difficult to Grow Than Clover and Gives Double the Yield.

Alfalfa Automobile Trains Important Feature of the Work—Schedules to Be Arranged and Meetings to Be Held at Farm Homes—Prominent Speakers to Accompany Each Alfalfa Train—Alfalfa Organizations Will Be Formed in Each Community to Promote the Work—Field Men Experienced in Alfalfa Growing Will Follow Up Preliminary Work Wherever Possible and Give Aid in Getting a Start—Prof. P. G. Holden, Director Extension Department, International Harvester Company, Chicago, Will Direct the Work.

The campaign will be conducted in co-operation with farmers' institutes, bankers, business men, farmers, commercial clubs, granges, live stock and dairy associations and other organizations in any community where the people are anxious to improve their agricultural conditions and are willing to give time and money to carry on the work.

County and city superintendents of schools, colleges, institute workers, Chautauqua lecturers, and others interested in the work will be assisted in obtaining alfalfa charts and lantern slides. Alfalfa literature and booklets will be given wide distribution throughout the country. Special alfalfa articles will be sent to farm journals and magazines, and plate and matrix pages to newspapers. Alfalfa editions of newspapers will be published where campaigns are conducted. Dates will be arranged for "Alfalfa Day" in the schools.

To Begin Campaign Work in East, West and South. Work to be started immediately in the cotton belt states and in the east and west. Thirty to forty meetings will be held in each county, the number depending on local conditions.

To accomplish the most in agricultural development, we must begin with the man behind the crop. Upon him depends the final working out of the principles of agriculture—the simple and practical things—which our schools, colleges and experiment stations are endeavoring to bring into general use.

Professor Holden proposes to carry these principles further even than the very effective work done on the agricultural trains, by using that most modern vehicle—the automobile—going directly to the people on their own farms where the meetings are to be held.

Alfalfa Greatest Soil-Enriching Crop. Agricultural development needs in addition to the work of our public institutions, the individual efforts of every merchant, banker, corporation, or laboring man, and this plan calls for their heartiest co-operation.

This plan for increasing the yields of our crops by the more extensive growing of that wonderful soil improver, ALFALFA, is meeting the approval of all men who have any knowledge of the beneficial results of its introduction as a general crop.

Campaigns are now being conducted in many of the central western states, and Professor Holden is daily answering requests for his assistance in organizing other localities, and invites cordial co-operation with every community interested.

Where campaigns are contemplated it is required, first, that a request be made to the Agricultural Extension Department for assistance in carrying on the campaign.

What the local people will provide:

- (1) Expenses (meals and lodging) for the alfalfa speakers and staff upon their arrival and during the campaign.
 - (2) From ten to twenty automobiles for each day of the campaign to carry the alfalfa crew and invited guests; one auto truck to carry literature, baggage, charts, and other equipment.
 - (3) Arrange for meeting places and publish schedule of same.
 - (4) Local advertising.
 - (5) Photographer, if possible.
- The Agricultural Extension Department will provide:
- (1) Advance men to assist in organization work.
 - (2) Lecturers.
 - (3) Literature.
 - (4) Special educational articles for newspapers and farm journals pertinent to alfalfa culture, object of campaign, etc.
 - (5) Field men to follow up the preliminary work and aid the people in any community where sufficient interest is shown to warrant it.

ALFALFA

Alfalfa is rich in feeding value.

TO PROMOTE ALFALFA.

Burlington to Run Combination Trains Through Southern Iowa and Northern Missouri—600 Alfalfa Lectures to Be Given in Two Weeks' Campaign—700 Automobiles to Be Used in the Work.

The Chicago, Burlington and Quincy railroad will run an alfalfa combination railway and automobile train for a two weeks' campaign, making about 60 stops in southern Iowa and northern Missouri, beginning July 28, 1913, from Des Moines.

The plan, as worked out by the Burlington in co-operation with the Agricultural Extension Department of the International Harvester Company of New Jersey and the agricultural colleges, is far in advance of any agricultural extension work ever carried on.

Will Stop at Sixty Points. Local committees at each of the 60 points on the railroad will arrange for five to ten automobiles to carry the speakers in all directions into the country to farm homes, school houses and inland towns within a radius of from four to ten miles, where alfalfa lectures will be given.

During the campaign over 600 alfalfa lectures will be delivered by the party to as many audiences, and from 500 to 700 automobiles will be brought into the service of this great educational movement.

These campaigns are conducted on a strictly co-operative basis. The people will provide:

- 1st. A guarantee of at least five to ten automobiles at each railroad stop to carry the speakers to the points in the country where meetings are to be held.
- 2nd. Halls suitable for the central meeting in towns where train stops.
- 3rd. Any community desiring a campaign must send in a request to the railroad, agricultural college co-operating, or to the Agricultural Extension Department, signed by a representative number of farmers and business men.

The railroad will provide:

- 1st. Sleeping cars and dining service for the alfalfa campaign party, and baggage and exhibit cars, literature, etc.
 - 2nd. Assistance in organizing and advertising campaign.
 - 3rd. Educational charts and other equipment for lecture purposes, bulletins, literature, etc.
 - 4th. Follow-up men, when possible, to assist the farmers in getting a start with alfalfa.
- Hearty co-operation on the part of the people is absolutely necessary to make these campaigns successful.
