The Sumter authorities are not displeased with Alex Williams up to the Supervisor of this county, and it may cause the matter to be taken before the Judge to determine which county is entitled to the prisoner. Williams escaped from the Clarendon cage, and later committed a crime in Sumter where he was captured after a thrilling attempt to get away. It would seem to us Clarendon is entitled to the prisoner, as he is already to serve a sentence, whereas he is only charged with an offense in Sumter and must yet be tried. The Sumter authorities can afford to let Williams serve his Clarendon sentence, then take him into their custody for trial.

Pinewood is breaking into the limelight with its happenings. Moody night an attempt was made to burglarize the store of Mr. R. F. Epperson, but was frustrated by the timely work of a special watchman who fired a couple of loads of shot in the burglar, but he got away. There has been recently two suspicious looking white men in and around Rimini, and it is thought that one of these is the one who tried to get into the Epperson store at Pinewood. It is believed that the man who shot the other in his legs and the other in his back. The fact that he heard from the would-be burglar was he had gone in the direction of Sumter, but that his partner was at Rimini and had nothing to do with the attempt to break into the store.

What is a Baby Worth to Your Community And The Race?

Long ago, statisticians figured out the exact capacity of each race of children until he came of age. The law has tried to settle the question by awarding certain damages to parents of children killed or injured in accidents. But only recently have scientists realized that the use of a baby depends entirely upon the start it gets in life.

A baby is worth to itself and the race much or little in proportion to the working power of the body, founded on proper nutrition, muscular and mental development, and the regular operation of its various functions. The better start it gets during the first three years of its life, the more valuable to itself and the nation does the child become with advancing years.

To prevent this catastrophe, government, national, state and municipal, is giving much time to the consideration of child welfare. By preventive and remedial measures, adopted while the child is in its infancy, the small body is enabled to use its full powers, and the race as well as the individual child profits. The very latest and one of the most popular forms of child welfare work is the Better Babies contest which has taken root wherever thinking men and women are found.

The contest is a practical test for parents because it arouses parental pride, creates a desire to study child life, and helps humanity by teaching each parent to help himself. The Better Babies Contest consists of a competitive examination of children, three years of age or under, by physicians, with prizes for the high scoring babies. The entries are made as in a stock show and measured by practically the same standards of physical perfection, with accurate tests for each organ of the body. Beauty does not count, but the intrinsic value of the baby as a human machine, well proportioned, properly nourished and developed, does.

Propositions are not confined to geometry, nor unknown quantities to algebra. A newspaper correspondent is sometimes confronted with problems more or less intricate, expressed geometrically in the one mind at present might be stated thus: Given a circus in Sumter, on Thursday, the 23rd, and a train on the Northwestern due to arrive there in time for the parade, to find the time people were in attendance from Summerton. The answer is too lengthy to
